Pringle's American Triumph Oats.

It is with great pleasure that we introduce to public notice, and offer for sale, this new variety of Oats as one of rare excellence and great superiority over the older varieties now cultivated. The valuable services which Mr. C. G. Pringle of Vermont has rendered to the farming world are too well known to every progressive agriculturist to require mention here.

This variety, now offered for the first time, is a cross between the Excelsior and Waterloo Oats, combining, in a remarkable degree, the excellent qualities of both. To present a clearer idea of the character of its growth than words could give, we present a photograph taken from a sheaf chosen at random in the field. The man holding the sheaf was 5 feet 10 inches high, so that by comparison, the proportionate sizes are readily seen in the annexed illustration.

The average height, as the grain stands in the field, is six feet, yet the straw is so strong and firm that it holds up well, without lodging, the tall, luxuriant heads filled with plump, heavy grains. The quality and productiveness of the grain are unequalled, yielding from 50 to 100 bushels per acre, according to the condition and state of fertility of the land.

The crop from which our seed was obtained was, while standing on the field, examined by many experienced Oat growers, all of whom declared that they never saw anything to equal the "American Triumph Oats" in health and vigor of straw nor in yield and weight of grain. Price per package of 1 ounce, 25 cents; 5 packages, \$1.00.

A NEW POTATO.

HALL'S EARLY PEACH BLOW.

Having been the original introducer of the Excelsior, Early Ohio and Burbank Potatoes, I now invite the attention of all my customers to a new variety which is brought before the public for the first time this season, viz.: "Hall's Early Peach Blow." If any one asks why I introduce another seedling of the Peach Blow when there

"The Favorite" Tomato.

Mr. A. W. Livingston has made himself famous by originating three new tomatoes, which are now grown in every section of the United States, and by reason of their beauty, symmetry of form, productiveness, and other good qualities, have probably been most generally adopted of all the late sorts; they are the Paragon, Acme and Perfection. To these he adds this season for the first time his new tomato "The Favorite," of which he speaks as follows:

"The Favorite" has several advantages over my other varieties. It is smoother than the Paragon, and never hollow late in the season. I had tomatoes ripen in July, and the same vines had an abundant crop on them Sept. 22. Does not crack after ripening, like the Acme; is of a darker red than the Perfection, and is larger than either. It has very few seeds, is ripe all through at once, and is very productive. It will bear shipping finely, and for canning cannot be excelled. It is heavier in proportion to its size."

If to so attractive a description we add the fact that it has been heartily endorsed by several prominent seedsmen who have seen it or grown it, I think we shall conclude that it is well worth a trial in every garden. Price per package, 25 cents; 5 packages, 1.00.

Is already one in the market, I reply, because it has the rare merit of being really an early Peach Blow which the other is not, it being six weeks earlier than the old Peach Blow, and a better cropper than Early Rose. It is a Vermont seedling, originating from seed ball of the famous Jersey Peach Blow, which for years has been the standard of excellence in the Middle State, with the great drawback of being very late. The following extracts from letters tell their own story:

We, the undersigned, have raised Hall's Early Peach Blow Potato and have no hesitation in claiming it to be the best yielding potato we have ever grown; we also affirm that it excels any potato we have of late years raised for cooking.

A. CLARK,
F. SANFORD,
JAMES BRENNAN.

MR. HALL,
Dear Sir:

In reply to yours I would say, I planted a sample of "Early Peach Blow" that you gave me last spring, and am well pleased with the same. It proves to be a good yielder and an excellent table potato. I think it will prove to be a leading variety.

Yours truly,
D. FINEL.

For earliness, compared with Early Rose, they are full medium. As a cropper it excels many standard varieties.

H. N. MORGAN.

I have raised Hall's Early Peach Blow Potato in my garden, and have eaten some of them. I consider it a standard potato, mealy, a good baker, and a tip-top potato for the epicure. I planted my seed on the 10th of June, and in 90 days I found the potatoes ripe.

GEORGE H. HARRIS.

This certifies that I have eaten a potato originated by B. P. Hall of this place, called Early Peach Blow, and find it to be a superior potato, in my judgment, second, to no variety with which I am acquainted as an eating potato, whether baked or boiled.

G. S. SCRIBNER.

Price per mail, post-paid, per pound, \$1.00; three pounds, \$2.50; per express or freight at purchaser's expense, half peck, \$2.50; peck, \$4.00; half bushel, \$6.00; bushel, \$10.00; barrel, \$20.00.

PLEASE NOTICE. My customers will please notice that I now give my rates for quarter-pounds, pounds, pecks and bushels in the body of my catalogue in connection with the ounce and package quotations, and not on two separate pages as formerly. Some of my customers may not be aware of the general rule that the lowest rate for freight is for 100 pounds (this does not apply to goods sent by express) therefore the freight on 100 pounds of merchandise, would not, as a rule, cost more than for 10 pounds or less. My prices are by mail post-paid by me, or by express or freight at purchaser's expense. When not ordered by mail it is desirable that customers should indicate whether they wish their seed sent by express or freight; when no preference is given I will use my best judgment in their behalf. I make no charge for boxes or packing.

When comparing my rates with other dealers, my customers will please remember:—1st, That all orders for seed, (with the exception of Potatoes, and Onion seed, for discount on which latter see page 34,) to the amount of five dollars and upwards, are subject to a cash discount as stated below; 2d, That I grow over half the varieties of the seed I sell; 3d, My three warrants.

JAMES J. H. GREGORY'S

ANNUAL SEED CATALOGUE FOR 1883

With the exception of Cabbage seed the best quality of which (American grown seed) is very scarce, the past season has been a good one for most kinds of vegetable seed. Let me here thank my friends for very acceptable presents I am constantly receiving from them of vegetable seed that are new or choice in their localities. I plant them on my experimental grounds to compare them with standard varieties, and will be happy briefly to report results when desired to do so.

My seed growing facilities now include five farms, besides several scattered tracts of land, located in three towns, carried on directly under my own supervision, with over one hundred acres in annual tillage. With these advantages for complete isolation I grow about a hundred and fifty varieties of the vegetable seed contained in this catalogue. All roots, bulbs, &c., intended for seed purposes, are selected with the utmost care.

THE THREE WARRANTS. All seed sent out from my establishment are sold under three warrants; viz.: 1st, That my seed shall be what it purports to be, so far as that I hold myself ready to refill the order anew, gratis, in other seed, should it prove defective in any respect. 2d, That all money sent for seed shall reach me, with the single proviso, that all sums to the amount of one dollar and upwards be sent in the form of a Post-office Order on Marblehead, Registered Letter, Draft, or Cashier's Check. 3d, That the seed ordered shall reach every one of my customers. Thus I warrant everything but the crop, and make the purchase of seed the *safest investment possible*, instead of being what it has so often proved to farmers and gardeners, very unreliable and vexing.

There happens occasionally an instance, where I have complaint against the vitality of seed, when the seed was grown by myself that season, and thousands of customers were supplied from the same lot to their satisfaction. Such cases are very obviously of the class where the cause of the trouble was owing to the season, or soil, or manner of planting; in short, to some cause utterly beyond my control and consequent responsibility. It is my labor and my anxiety to send out none but just such seed as I would be willing to plant myself, and the thousands of cheering letters that I open are very pleasant testimony to the success of my undertaking. With all care that it is possible to exercise, mistakes will occasionally, (though very rarely,) occur; these my customers will always find me ready to rectify in accordance with the promise of my three warrants.

PAYMENT FOR SEED. When the value of seed ordered is less than one dollar, the sum sent is at my own risk; and when the value is greater than one dollar, the amount remitted will also be at my risk, provided it be sent by Post-office Order, Draft, Cashier's Check, or Registered Letter. When in making change it is necessary to enclose postage-stamps, be sure not to moisten them in the least; the higher denominations, such as tens and upwards, would be preferred. Money-orders, when of the value of one dollar and upwards, may be purchased at my expense, the cost being deducted from the amount remitted. Cash must accompany all orders. Occasionally a customer remits more or less than sufficient to pay for the seed ordered. In the former case the balance will be returned to his address; in the latter the order will be filled out as far as the money goes. When necessary to send specie, wrap it securely in a bit of paper, to prevent it from getting loose and

cutting through the envelope. Let me advise my friends before ordering their seed sent by Express to figure carefully and see if it would not be much cheaper for them (as is almost invariably the case with small parcels) to have them sent by mail.

I would advise my customers not to order their seed by Express C. O. D., particularly when the orders are small, as I have to add the cost of collection and return charges to the cost of the seed to make myself whole.

ADVANTAGES OF BUYING SEED DIRECTLY FROM THE GROWER. But few seed dealers grow any of the seed they sell, — hence, as a general rule, seed dealers know only what is told them of the careful selection of seed stock and of the freshness and purity of their seed; now if the person of whom they purchase should be careless, ignorant or dishonest, you who plant have to suffer, as the dealer can only re-affirm what is told him. On the other hand, if the seed dealer grows his own seed, he is able to affirm what he himself knows as to its freshness and purity; and it is that I may be able to give this guarantee that I raise so many varieties, some of them at double the cost at which I could purchase them.

From what I have said let it not be inferred that I raise all the varieties of seed I sell; I do not; many choice varieties I import from England, France and Germany, some of which cannot be raised in this latitude, others I purchase of reliable dealers, or have grown for me by careful men, whom I supply with stock seed of my own raising.

When writing that seed have failed to reach you, always REPEAT YOUR FIRST ORDER, or send for the same value in other kinds of seed.

BE CAREFUL TO WRITE YOUR ADDRESS IN FULL, giving the STATE as well as the town, for a town of the same name will oftentimes be found in a dozen States. I find by my record that in one season 218 of my customers forgot to sign their names to their letters. Before closing your orders be sure that you have given your address in full, your name, especially, being written very distinctly. Please be particular in this matter.

POSTAGE ON SEED. With the postage rates as now I prepay postage on seed ordered by mail at list rates. It matters not how many varieties are sent in the same package, provided the weight of the entire lot does not exceed four pounds. If a larger lot is wanted, it may be divided into lots of four pounds each. This law, in effect, brings my seed establishment to every man's door. My CUSTOMERS IN CANADA will please note that by recent construction of the postal laws, seed can be sent into Canada and British Provinces by express or freight only.

DISCOUNTS ON LARGE ORDERS, &c.

Five per cent. discount allowed on all orders for seed to the amount of five dollars and upwards, (excepting Potatoes and Onion seed, for discount on which latter see page 34,) whether the order be for packages, ounces, pounds or quarts, either separately or combined; eight per cent. when the amount ordered is as high as ten dollars and under twenty-five; ten per cent. when twenty-five and under forty dollars; and twelve and a half on orders to the amount of forty dollars and upwards. For special discounts on Flower seeds, see page 51. **TERMS TO DEALERS, CLUBS AND LARGE MARKET GARDENERS ON APPLICATION. I DO NOT SEND OUT SEED TO BE SOLD ON COMMISSION.**

ESSEX HYBRID TOMATO.

I am not as a rule in favor of hybrid vegetables; they are so much inclined to sport back and forth towards one or the other of the original parents; but this tomato held its own in form, size, color and quality so well and is so early withal, that

I deem it worthy of a more general introduction. There are many varieties of tomatoes offered well worthy of cultivation, but among the millions who grow them there are a great variety of tastes, and with such an excellent field to select from all can be satisfied. Per package, 15 cents; per oz., 50 cents.

LONG STANDING SPINACH.

This new Spinach runs to seed later than other sorts. The leaves are very thick and of excellent flavor. It has given great satisfaction wherever grown. For prices, see page 30.

PURPLE TOP MUNICH TURNIP.

This is emphatically the earliest of the whole turnip family. It resembles every way the common Early Red Top, with the exception that the purple is of a darker and richer color. It can be left rather thicker than Red Top, as the neck is smaller. It is

beyond all comparison the variety for early market, and every one of my customers will endorse it as a decided acquisition. See page 31.

BAY VIEW MELON.

This new sort received first prize at the annual exhibition of

the Pennsylvania State Agricultural Society, as a new variety superior to the old sort. Flesh green, sweet and spicy. With one vine in a hill it has been grown to weigh 17 pounds. It is hardy, very vigorous and productive. Ripens a few

days after Jenny Lind. Per ounce, 20 cts.; per package, 10 cts.

SUGAR LOAF LETTUCE.

In the spring of 1879 a customer in Illinois sent me a sample of a new Lettuce. Having tested it I present my patrons with its picture and also offer seeds of the same.

Its habit of growth is that while it branches out, (growing under good cultivation to ten or twelve inches in diameter) it also grows thick and high, thus making a large plant with plenty of heart. It is

medium green in color, the top leaves, as the plant attains perfection, assuming a fine brown tinge. It is of most excellent quality and does not quickly run to seed. I recommend it as being among the best of summer lettuces. Per package, 15 cents; per ounce, 60 cts.

MINIMUM PEA.

I herewith present a photograph of Mr. Laxton's new dwarf wrinkled pea, the Minimum.

This new seedling, of Mr. Laxton, (the originator of Alpha.) is described as the most dwarf of all peas, and was found to be the most prolific of 100 varieties tested at Girtford, England. Tested on my own grounds this season, on a somewhat large scale I find it as described, the most dwarf of all varieties, growing to the height of about six inches. It is as early as that very early pea, the Tom Thumb. The pods are not as large as Tom

Thumb, (which is the objectionable trait,) but in yield it far surpasses that variety or indeed any dwarf sort. The above engraving was taken from a photograph of one grown on my grounds, and, as will be seen, has 24 pods on a single vine. Planted May 25, the crop was ready for the table July 12. As a remarkably early, exceptionally dwarf, and unexceptionally prolific variety, the Minimum deserves a place in the family garden. Per package, 15 cents.

MARBLEHEAD EARLY SWEET CORN.

✍️ I SEND OUT THE MARBLEHEAD EARLY CORN (of which I am the original introducer) AS THE EARLIEST OF ALL THE VARIETIES OF SWEET CORN CATALOGUED. ✍️ When tested with such standards as Early Minnesota and Narragansett, it proved to be full a *week earlier than any of them*. A similar test with Tom Thumb, Dolly Dutton, and other early varieties, gave the same result. In all characteristics, except earliness it bears a close resemblance to the Narragansett. The stalk is dwarf in its habit of growth, and its ears very low down. It is of fair market size and *very sweet*.

I hope none of my friends will fail to try in their garden or on their farms my Marblehead Early Sweet Corn. I feel so assured after a careful trial of five years, that they will find it decidedly the earliest of all, that I will obligate myself to refund their money, should it prove otherwise.

For four years I made a special business of testing the Marblehead Early Sweet Corn side by side with all the varieties, advertised as the earliest of all, and the result has been that *without a single exception it has proved to be earlier than any of them*. For prices, see page 23. In the following recommendations (I have received many others) friends will please note the testimonials for *quality* as well as earliness.

One of my neighbors having raised a crop planted seed from one of the ripest ears and raised a second crop the same season.

Mr. S. F. Coombs of Bellingham, writes: "It proved to be fully two weeks earlier than any other variety, while its quality for table use stands without a rival among the earlier sorts. I also noted that it remains in good eating condition as long a time as any of the later varieties, not excepting Stowell's Evergreen."

Writes the Editor of the "Indiana Farmer":—"The Marblehead Early Sweet Corn comes to maturity from one to three weeks ahead of the five or six other kinds planted at the same time. Quality, excellent."

Writes the Editor of the "Household," from Brattleboro, Vt.:—"I planted it in two lots; two weeks apart, each time on the same day and side by side with Early Minnesota and Narragansett. It was ready to boil several days sooner than either of them and the quality was superior. It is unmistakably the earliest and best of the early varieties of sweet corn and as such a very valuable acquisition to every garden."

Writes a prominent seed dealer from Chicago:—"I shall recommend the Marblehead Early Sweet Corn above all other sorts the coming season."

Writes the Agricultural Editor of the "Live Patron":—"It was one week ahead of my earliest."

Writes Mr. George Parsons of N. Hampshire: "Your Marblehead Early Corn 'beats the Dutch.' All the neighbors are crazy for my seed. You had better give it an extra in your next Catalogue."

Writes Mr. H. C. Allen:—"It is so much earlier than any other it gives me a complete monopoly of the market. We planted it May 18, side by side with our old favorite, Early Minnesota, on a warm, gravelly loam, and awaited developments. The last week in July we had a mess of corn from Marblehead Early, and in two weeks the early Minnesota was fit to cook."

Writes Mr. M. H. Nothe of West Medford, Mass.:—"I planted it at the same time as Minnesota and it was ready for the table eleven days ahead of it."

Writes Mr. J. W. Johnston of Northumberland Co., Canada: "Your Marblehead Early Corn gave me the entire market here for at least 12 days before any of my competitors. These 12 days are worth more to me than the balance of the season."

Writes Mr. Abram J. Terhune, of Bergen Co., N. J.:—"Have tested your Marblehead Early Corn for the second time and find it the earliest of all. Of the six kinds I raised, this sold at \$2.00 per hundred while the other kinds when ready brought but 75 cents."

EARLY AMBER SUGAR-CANE.

This new variety of sugar-cane has created quite a sensation as a great resource for the manufacture of syrup and sugar by the farmers of the North and West. Any farmer can make his own syrup by filtering the juice and boiling down in a Cook's evaporator, more than 200,000 pounds having been made at one establishment in New Jersey, the present season. In Indiana 150,000 lbs. of sugar and 22,000 gallons of syrup were made from 250 acres of cane, at a profit of \$50.00 per acre. Up to latitude of 42° 30', which includes almost every portion of the northern states, the yield per acre of syrup is from 140 to 280 gallons, and the produce of sugar is about 6 pounds to the gallon of syrup. This syrup is equal in quality to the best syrup of the stores and brings as high a price in the market. My seed has been specially selected for purity.

The editor of the "Country Gentleman" as the result of his experiments anticipates a great field of usefulness for the Amber Cane as a fodder plant, as it possesses several important advantages over Indian Corn, either when fed young and soft or when chopped short, fully grown. It is much plumper and more juicy than corn-stalks, remaining plump and juicy later in the season and cattle eat it up clean with huge relish.

✍️ WITH EVERY PACKAGE OF SEED I WILL SEND A SAMPLE OF THE SUGAR MADE IN THE NORTH FROM SUGAR-CANE GROWN ON THE SPOT.

Per lb., per express, 25 cts.; by mail, post-paid, 40 cts.; per qr. lb., 15 cts.; per package, 10 cts. The standard work of Mr. I. A. Hedges, giving full instructions for the manufacture of syrup and sugar, sent to any address for \$1.00.

"From one eighth of an acre of Amber Cane I made 24 gallons of syrup and about 50 pounds of nice sugar." B. W. REED.
Oconee, Shelby Co., Ill.

"From 315 hills of Amber Cane I had 53½ lbs. of thick syrup. This excited my neighbors. It is splendid." GEO. W. LEE, *Vernon, Vt.*

TOMATO, TURK'S TURBAN, SCARLET.

This new Tomato is very prolific, producing rarely less than ten to fifteen fruits in a cluster. A great peculiarity of the sort is that each fruit contains only a few seeds and these lie close to the outer surface. It is too small for marketing, but is less affected by rot than almost any variety. The plants are very showy, and the fruit may be utilized for decorative purposes. Per package, 15 cents.

AMERICAN WONDER PEA.

This new American Pea originated in Canada and is the result of a cross between the Champion of England and Little Gem. It is of excellent flavor and of great productiveness besides being earlier than any other of the wrinkled varieties. After a trial of three years I am ready to endorse it as being under favorable circumstances a very early pea, a superior cropper bearing larger pods and peas than any of the early kinds. Fifteen pods have been counted on some vines, and nine large peas in some of the pods. The vine grows from six to twelve inches high, according

to the soil and season. *My seed was obtained directly from the original introducer.* Per package, 15 cents; pint, 50 cents; quart, \$1.00, by mail, post-paid.

ALPHA TOMATO.

This new tomato is of a roundish shape, smooth and symmetrical. It grows to a good market size, ripens capitally around the stem, and does not crack when, after a rain, some other kinds show a decided weakness in that direction. It is solid, rich colored, very symmetrical, and taken altogether, about as handsome a variety as is carried to market. Per package, 10 cents.

WHITE GERMAN CUCUMBER.

As will be seen by the engraving, this is an enormously large and exceedingly handsome cucumber; indeed, some of my workmen vote it to be the handsomest variety we have ever grown. The white color is peculiarly clear and strong. It surpasses most of the foreign varieties in vigor and productiveness. To those who have the English fancy for a cucumber having but few seed, and to all who desire to raise the handsomest possible variety for exhibition purposes, I know of no sort which can give greater satisfaction than the White German. A customer in Georgia writes me that he grew one, three feet long. Per package, 25 cents.

EGYPTIAN SWEET CORN.

I don't think I ever ate a white variety of sweet corn more sweet and tender than this. I present herewith an engraving made from a photograph of stalk grown in my garden. It is very tall and very late, coming in about the time of Stowell's Evergreen, but surpasses that variety in sweetness.

Mr. Hyde, who introduced this variety, says:—"I received first premium for this corn at all County Fairs that I sent it to for exhibition in this state. For prices, see page 23.

My customers write me of this corn as follows:

Mr. E. R. Ogier of Maine, writes:—"My Egyptian Sweet Corn had from three to five ears on a stalk, and was the sweetest corn I ever tasted."

Mr. Hardin G. Back of Mass., writes:—"It was the tenderest and sweetest corn I ever saw; and as for yield I never saw anything beat it. I have now what grew from one kernel, and there are nine ears on the main stock and six on the suckers, making fifteen in all, seven of them well filled out. I keep it for a show."

BLACK PORTUGAL MELON.

Leaves stout and stiff, leafstock short; melons very deeply ribbed and rather watery; color of so dark a green as to look nearly black. Flesh remarkably thick, very fragrant, salmon-colored and quality first-rate. Late for the extreme north, but I recommend it for all other sections.

Mr. E. A. Joslyn writes me, "My largest Black Portugal weighed 52 pounds, measuring forty-four inches in circumference."

Price per package, 20 cents.

ROSE BEAN.

A new bush bean, remarkably prolific and vigorous. It is exceedingly productive and the beans are exceptionally large. The vines are the stoutest and the leaves the largest of any bean I have ever raised. One of my workmen reports an extraordinary yield of the new bean in his garden. The color of the bean is of a rich dark rose. It is entirely distinct from the variety known as the Chili or Red Kidney. Per package, 15 cents; per quart, 45 cents by express, 75 cents by mail.

CRAWFORD'S HALF DWARF CELERY.

This variety is very extensively grown by the market gardeners who supply the markets of New York City. It has a rich, nutty flavor and great vigor of growth, and with those who do not succeed with the Boston market has grown to be quite a favorite as it differs from that favorite variety in being in market condition much earlier. Per pound, by mail, \$6.00; by express, \$5.85. Per oz., 60 cents; per package, 15 cents.

Ferry's Peerless Watermelon.

Of medium size, thin, rind mottled-green, flesh bright-scarlet, solid to centre, very sweet, very prolific. An excellent sort for garden cultivation. Per package, 6 cents; per oz., 15 cents; per lb., by mail, \$1.25; by express, \$1.10.

Excelsior Melon.

This new melon is the largest of water-melons raised in the North. It is early, of large size and fine quality; rind thin; flesh of a bright red color; very delicate and sweet. Samples have been grown weighing over seventy pounds. It took the first premium at the annual exhibition of the Massachusetts Horticultural Society in 1877 and 1878, specimens being shown weighing sixty-five pounds. Per package, 10 cents; per ounce, 20 cents; per pound, by mail, \$1.50; by express, \$1.35.

Little Rock, Arkansas, Jan. 17, 1882.

"The Excelsior Water-melon I got of you is immense. Got 120 melons from the 1 oz. of seed got of you, many of them of 40 lbs. weight and very early for so large a melon."

WILLIAM GALLAGHER.

Danvers Carrot.

In the town of Danvers, Mass., the raising of carrots on an extensive scale has for years been quite a business—the farmers find a large market in the neighboring cities of Salem, Lynn and Boston. After years of experimenting they settled upon a variety which originated among them (as did the Danvers Onion), known in their locality as the "Danvers Carrot." It is in form about midway between the Long Orange and Short Horn class, growing generally with a stump root. The great problem in carrot growing is to get the greatest bulk with the smallest length of root, and this is what the Danvers growers have attained in their carrot. Under their cultivation (see my treatise on Carrots and Mangolds) they raise from twenty to thirty tons to the acre, and at times even larger crops. This carrot is of a rich dark orange in color, very smooth and handsome, and from its length is easier to dig than the Long Orange. It is a first-class carrot for any soil. The seed I offer is from carefully selected stock. Per package, 6 cts.; per oz., 15 cts.; per lb., by mail, \$1.40; express, \$1.25.

WHITE RUSSIAN SPRING WHEAT.

The White Russian Wheat is a bald white chaff wheat, of a lighter red color than most varieties of spring wheat. It has proved itself to be the best spring wheat ever grown in Wisconsin and is very popular in northern New England. No wheat ever tried in this country has received a more unanimous commendation from those who tried it; has such long, strong, healthy yellow straw, standing straight several days after ripening, and bearing large, long white chaff heads, well filled with plump kernels, weighing oftentimes from 60 to 62 lbs. to the measured bushel, while the wheat produces 5 to 10 bushels more per acre than other once well thought of varieties.

The following statements were received from parties who tried the wheat:

From Chas. A. Flint, North Waterford, Me. "The White Russian Wheat I had of you last spring did one-fourth better than the Lost Nation, sown side by side. I think it good for 50 bushels to the acre on good soil."

From George F. Gore, Antrim, N. H. "I sowed the one bushel and a half of White Russian Wheat, from which I harvested twenty-two bushels of very fine and large grain and making the first quality of flour."

From A. G. Quin, Humphrey, Plat Co., Neb. "Of the White Russian Wheat I sowed 1-4 of an acre, and harvested 11 1-2 bus. at the rate of 46 bus. per acre. I shall sow all I raised."

From Myron Turrell, Bay View, Wis. "The twelve bushels of White Russian Wheat I purchased was divided among five of my neighbors, reserving 3 bushels for myself, from which I harvested 80 bushels of No. 1 wheat, or 40 bushels per acre. My neighbors had equally good crops as mine. It is the best wheat ever raised in this vicinity, and yielded twice as much as life wheat."

From George W. Abbott, Harvard, Clay Co., Nebraska. "I sowed one bushel of White Russian Wheat from which I threshed 49 3-4 bushels of very good wheat. Other wheats in this vicinity yielded 10 to 20 bushels per acre."

From Jas. M. Williams, Monroe, Iowa "I sowed 2 bushels on 1 acre and harvested 42 1-2 bushels. I sowed two other varieties, and I think the White Russian produced double that of any sown on my farm."

From John Way, Albany, Orleans Co., Vt. "I sowed 1-2 bushel of White Russian Wheat purchased of you, on 1-4 acre of ground, and harvested 12 bushels of nice plump wheat, and it makes better flour than any other variety of wheat ever raised here."

PRICES.—3 lbs. by Mail, \$1.00; per Express or Freight at purchasers' expense; half bushel, \$1.50; 1 bushel, including bag, \$2.75; 2 bushels, including bag, \$5.25; 10 bushels, including bags, \$25.00 per bushel. No discount on ten-bushel lots.

TEOSINTE. (Reana Luxurians.)

It somewhat resembles Indian corn in aspect and habit of growth, but the leaves are much longer and broader and the stock is filled with sweeter sap. In its perfection it produces a great number of shoots, growing three or four yards high, thickly covered with leaves, yielding such an abundance of forage that one plant is estimated to be sufficient to feed a pair of cattle for twenty-four hours. In the extreme South, Teosinte would be a perennial. In the North a single seed will make from 12 to 16 stalks, when planted in the open ground, and from 25 to 30 if first started in a hot-bed, attaining to the height of five and six feet with a vast mass of long broad leaves.

Mr. S. A. Cook, of Georgia, writes me as follows: "It surpasses either Corn or Sorghum as a soiling or fodder plant.

I counted 85 stalks from one seed. They grew eleven feet in height, and but for excessive dry weather would have been much taller. Cows are extravagantly fond of them." Per ounce, 50 cents; per package, 15 cents.

From Samuel A. Mather, St. Augustine, Fla., Oct. 10th, 1882. "My Teosinte has grown 16 feet high, by measurement, and had 40 stalks. The remainder has been cut 4 or 5 times, and I am now cutting it again. It far surpasses all other kinds of fodder."

From W. H. Ritter, North Springfield, Mo. "The Teosinte seed I got from you last spring grew about 7 feet. The finest fodder plant I ever saw."

WHITE EGG TURNIP.

Four years ago I experimented with every variety of the early turnips found in the catalogue of the most extensive seed grower of England to determine whether this turnip claimed to be a new American variety really was

such. After a careful comparison with all these foreign varieties I am satisfied that it is a new variety as distinct from any of the sorts tested as they are from each other. The engraving gives a very correct idea of its shape. It is perfectly smooth, of a pure, clear white, growing half out of ground, and at times to the size of a ruta бага; being a very choice kind for table use, of excellent flavor, sweet and mild. It pulls clean from the ground, and with its thin, snow-white skin looks almost as attractive as would a basket of huge eggs. It is a first-rate keeper for winter use. In both appearance and quality it holds a very high rank and must be considered as quite an addition to our Fall Turnips.

Comes to size for use just

after Early Red Top. Per pound by mail, \$1.00; half pound, 60 cts.; 1/4 lb., 40 cts.; per ounce, 15 cts.; package, 10 cts.

From Samuel S. Harold, Westfield, Ind., Jan. 23, 1882. "The White Egg Turnip you sent me last spring excels any turnips I ever had, they are nice and sweet. My customers and friends think they are hard to beat. I raised about ten bushels from that package."

ECLIPSE BEET.

A prominent market gardener writes me: "In an experience of fifteen years I find the Eclipse surpasses all in earliness, color, smallness of top, and smoothness, and moreover it is a splendid cropper." The engraving is from a photograph.

Price per lb. per mail, \$2.40; per ounce, 25; per package, 10 cents.

From Mr. Alfred Duflote, of Paducah, Ky. "I will recommend your Eclipse Beet as one of the earliest now in cultivation. I sowed them with the Egyptian and I pulled Eclipse

first, being larger beets. What I like about them is that they grow smoother than Egyptian and are globe shaped. All of the gardeners about here are surprised to see me with such fine beets; they all want me to send for seed for them next year."

Writes Mr. Nathan Busby of Essex Co., Mass. "In an experience of fifteen years a market gardener I find the Eclipse Beet for earliness, small top and smoothness to be the best."

**Early Bleichfeld Cabbage.**

This new Cabbage is well worthy the attention of farmers and market gardeners. I raised it on a large scale and am much pleased with it. I find it to be the earliest of the large hard-headed drumheads, maturing earlier than the Fottler's Brunswick. The heads are large, very solid, tender when cooked and of excellent flavor. Stump short. It is as reliable for heading as any cabbage I have ever grown. The above engraving I have had made from a photograph of a specimen grown on my grounds. The Bleichfeld appears to hold a place distinctly by itself among the early drumheads raised in the United States. Price per package, 10 cts.; per ounce, 50 cts.; per pound by mail, \$5.00.

**CHINESE BEAN.**

The above engraving is copied from a photograph of an average sample of a lot grown on one of my farms. I counted eighty pods on the vine, containing from six to ten beans each. The beans themselves are of a light drab color, and in shape half-way between a pea and a bean. Though the individual beans are quite small, (in the engraving they appear to be larger than they really are,) yet the vines crop so enormously they yielded at the rate of forty bushels to the acre. A friend tells me that he finds it the best of all beans for vegetable soup. Its immense growth of stalk and leaves which are eagerly eaten by cattle must make it of great value for fodder purposes and it will very likely prove to be reliable for ensilage. Per package, 15 cents.

**GERRY ISLAND CAULIFLOWER.**

I would advise my customers to test this cauliflower for earliness side by side with any variety in the market. If it reports itself in other localities as it has in my experimental ground it will excel all other varieties in earliness, while in reliability for heading it will be excelled by none. Per package, 25 cents; per ounce, \$1.50.

Cocoanut Squash.

A magnificent little squash for table use, very prolific, yielding from six to a dozen to the vine. In beauty it excels every variety of the Squash family; indeed, specimens very naturally find a place on the mantel-piece as ornaments to the parlor—not being surpassed in beauty by any of the gourd family. The color is an admixture of cream and orange, the latter color predominating in the depressions between the ribs; while the bottom over a circle of two or three inches in diameter is of a rich grass green. The flesh is fine-grained, sweet and very solid, (the squash being remarkably heavy for its size,) and the quality excellent, closely resembling Canada Crookneck, in flavor, but in every way much superior. Per pkg., 10 cts.; per oz., 30 cts.; per lb., by mail, \$2.50.

Marblehead Squash.

This squash, as a rule, is characterized by a shell of a more flinty hardness than the Hubbard. It is usually thicker and flatter at the top. It has a greater specific gravity. The flesh is of rather a lighter color than the Hubbard, while its combination, in good specimens, of sweetness, dryness and delicious flavor is something really remarkable. Its outer color is a light blue. For price, see page 30.

I add extracts from letters received from various farmers and gardeners:—

"The Marblehead Squash seed I had of you produced a very fine crop of the first quality of fruit. I had 1,200 pounds from 12 rods of ground, which was quite satisfactory." J. M. MERRICK.

Wilbraham, Mass.

"The Marblehead Squash did the best of anything I ever tried to grow; the neighbors all pronounced them first-rate, and I think them better than any sweet potato I ever saw." ROBERT STEWARD.

Paulton, Westmoreland Co., Pa.

"The Marblehead is the best squash that I ever had. I raised sixty-three from the package—nice ones they were too. We cut the last on the 23d of March. It was so hard that I had to cut it with an axe. I recommend them to all." S. B. GREENWOOD.

Wales, Me.

"THE 'MARBLEHEAD' SQUASH. Some weeks ago we received from Mr. James J. H. Gregory, of Marblehead, Mass., the introducer of the Hubbard, specimens of a new squash. The squash was tried by several, and unanimously pronounced to be of the very highest quality."—*American Agriculturist*.

Henderson's Early Summer Cabbage

This new drum-head Cabbage is much larger than the Early Wakefield, though not quite as early. It has a great and growing popularity among market gardeners, as a second early.

For a large extra early variety it is highly recommended. Per package, 15 cents; per oz., 60 cents; per lb., by mail, \$7.00; by express, \$6.85.

Paragon Tomato.

This fine new tomato for four years in succession took the first prize in its class, at the annual exhibitions of the Massachusetts Horticultural Society—where the critical standard is of the very highest character. It ripens perfectly around the stem and is one of the largest round tomatoes in cultivation. The engraving makes a good representation of its characteristic shape. It is of good size and remarkably solid. In time of ripening it comes between the early and the late varieties. Per pkg., 10; per oz., 50; per lb., by mail, \$4.00.

Hardy Ridge, or Prescott Melon.

Probably not one person in a hundred seeing the Hardy Ridge when growing would take it for a melon. Nevertheless it is a melon, and one of the very best quality, too. A very popular variety in the markets of London and Paris, the wonder is it has not before this been introduced into the United States. It is prolific, grows to a very large size, is of splendid quality,—being equal to the best cantaloupes, while it is by far the thickest-meat of all melons, being, in fact, very nearly solid and having but very few seed. Price, 15 cents per package; per ounce, 45 cents.

LONGFELLOW'S FIELD CORN.

This fine field corn I have thought worthy to have its portrait taken. It is the result of careful selection in a family of Massachusetts farmers for forty-five years. The ears are remarkably long, some of them fifteen inches, and oftentimes two or more good specimens grow on one stock. The cob is quite small. It is the largest kernalled variety of yellow field corn that I have ever found it safe to plant in the latitude of Massachusetts, where it is quite extensively grown. *Two hundred bushels of ears have been raised to the acre in Massachusetts.* Per package, 10 cents; per quart, by mail, 50 cents; by express, 30 cents; per peck, \$1.00; per bushel, \$3.00.

Log-of-Wood Melon.

This new melon is a variety of the yellow-fleshed musk-melon. It grows to the enormous length of *from two to three feet*, the form and general appearance of most of the specimens being very well shown in the above engraving, which was taken from a photograph. Early and prolific, in quality nothing extraordinary, but equal to the common Musk-melon. Per package, 15 cts.

Vick's Early Watermelon.

I think so highly of this melon, particularly as an early variety, that I have had a specimen grown on my grounds, photographed and engraved. Of medium size, oblong and smooth; flesh bright-pink, resembling strongly the southern varieties, solid and sweet. I consider this one of the best of early watermelons.

Per package, 10 cts.; per oz., 20; per lb., by mail, \$1.25; by express, \$1.10.

PERFECT GEM SQUASH.

I am exceedingly well pleased with the result of my trial of this squash this season. It is certainly what is claimed for it, a most important addition to our list of squashes. In its habit of growth it is like the Coconut, and is very productive, as many as twenty-four squashes having been grown on a single vine.

The squashes are from four to six inches in diameter of a light straw color, slightly ribbed and have a thin, smooth skin. The flesh is dry and fine grained until late in the fall when it is less dry and remarkably sweet.

It is proving a good keeper as a winter squash. It ripens about with the Hubbard. It certainly deserves a place in every kitchen garden. I think every one of my customers would consider it a decided acquisition. The general testimony of those who raised it last season is emphatically in favor of the Gem as an acquisition. It is so prolific that over 20 have been raised on a single vine. Per package, 10 cents; per oz., 35 cents.

SOYA BEAN (*Soja Hispida*); or, Oleaginous Japanese Pea.

This is a half pea, half bean in appearance, with singular leaves and pods. It is a prominent article of food among the Chinese and Japanese, and within a few years has come into cultivation in Europe; and whether grown in China, France or Hungary, it maintains the same fixed characteristics in its chemical composition and has been pronounced by agricultural chemists to be the richest of all human food. It is hardy and productive and ripens as far north as Central Massachusetts. The plant yields leaves and stems more abundantly than the cow peas of the South and I think it may prove superior to them in value for fodder purposes. Baked with the common field beans it will be found to be finer grained and richer flavored. The engraving is from a photograph. Price, per package, 15 cts.

Early Schweinfurt Quintal Cabbage

Little Pixie Cabbage.

Early Ulm Savoy Cabbage.

Early Jersey Wakefield Cabbage.

Early Winnigstadt Cabbage.

Premium Flat Dutch Cabbage.

Improved American Savoy Cabbage.

Early Wyman Cabbage.

CABBAGES.

For full directions for raising Cabbages, see my treatise, "Cabbages, How to Grow Them." Price, 30 cts.

The public may not be aware of the fact that as a rule the Cabbage seed raised in this country is from plants that are sown so late that but few make heads. These are covered in the ground over winter (more or less of them making small, soft heads) and in the spring are set out to grow seed from. The imported seed is grown from stock even poorer than this, the heads being sold in the market and the seed raised from the stumps. In contrast with this, the seed I offer my customers, I grow as a rule from extra large and extra hard Cabbage heads, larger and harder than those sold in the market, so superior are they that for several years in competition with the best growers in the best Cabbage section of New England, I have carried off the annual prize for the best field of Cabbage in Essex County, and only the very best of them are set out to raise seed from. As an illustration I may state that the Flat Dutch seed which I raised in 1881 was grown from a lot of Cabbages that took the county premium, the heads of the whole averaging nearly fourteen pounds in weight when ready for cooking.

MARBLEHEAD MAMMOTH.

This is, without doubt, the largest variety of the Cabbage family in the world, being the result of extreme high culture. I have had heads, when stripped of all waste leaves, that could not be got into a two-bushel basket, having a diameter two inches greater! In a former circular I quoted from persons residing in fourteen States and Territories, and also in the Canadas, East and West, expressing their great satisfaction with the Stone-Mason and the Marblehead Mammoth Cabbages, in their great reliability for heading, the size, sweetness and tenderness of the heads. They had succeeded in growing the Mammoth to the weight of thirty and forty pounds, and in some instances over fifty pounds!

STONE-MASON CABBAGE.

This Cabbage is distinguished for its reliability for heading, the size, hardness and quality of the heads. Under proper cultivation nearly every plant on an acre will make a marketable head. The heads vary in weight from nine to over twenty pounds, depending on the soil and cultivation. In earliness the Stone-Mason is upward of a week ahead of the Premium Flat Dutch and makes a harder head.

EARLY WINNIGSTADT CABBAGE.

No variety of early Cabbage, in my experience as a seedsman, has had a more regular and rapid growth in popularity than the Winnigstadt, which I attribute mostly to the fact that it is so remarkably reliable for heading even under very adverse circumstances. The Winnigstadt is also a large-sized Cabbage among the early kinds, and probably the hardest heading of all the conical varieties. In earliness it comes in about a week later than Early Oxheart. Should the soil of any of my farmer friends be of so sandy a nature that they find it extremely difficult to perfect any variety of Cabbage, before bidding a final farewell to the Cabbage family I would advise them to try the Winnigstadt. Planted in the latitude of Boston, July 1st, the Winnigstadt makes a good Cabbage for winter use.

IMPROVED AMERICAN SAVOY.

This is probably the best of all the Savoy for the general market. It grows to a large size, is as reliable for heading as the Stone-Mason or Premium Flat Dutch, and has as short a stump as either of these varieties. I heartily recommend it to all those market gardeners who grow Savoy by the acre for the general market.

Little Pixie, Early Ulm Savoy, Schweinfurt Quintal.

(For engravings, see the previous page.) I recommend these three sorts as the best early Cabbages for family use. The first two are the earliest Cabbages grown, being each of them earlier than Early York. Little Pixie heads very hard (all cook very tender and sweet), is earlier than Early York, and in many localities makes a first-class market cabbage. The Savoy is the tenderest and the richest flavored of all Cabbages, and for boiling are decidedly the best being much superior to the Drumhead and Cone-shaped varieties. Schweinfurt Quintal is decidedly the earliest of all the larger Drumheads; the heads attain to a diameter of from 10 to 18 inches, are very symmetrically formed, and are remarkably tender. When cooked they are very sweet, and quite free from any strong cabbage taste. They are so very tender they will not bear transportation in bulk any distance without serious injury; hence I recommend it as a capital Cabbage for early use in the family, but not as a market Cabbage, fitted for all localities, though very valuable for this purpose where the market is near at hand.

Fottler's Improved Early Brunswick.

After an extensive trial on a large scale by market farmers in all parts of the United States, Fottler's Cabbage has grown in estimation, in all the great Cabbage districts.

CANNON BALL CABBAGE.

This Cabbage is so called because the head is as round, and almost as hard and heavy, as a cannon-ball. I pronounce it as forming the roundest, hardest and heaviest head in proportion to its size, of any cabbage known. It matures about ten days later than the Early York. While about all varieties of early cabbage make rather soft heads, this, though early, makes the hardest headed cabbage known. The heads when fully grown attain to the size of from six to eight inches in diameter.

I present a few extracts from letters received from customers relative to my Cabbage seed, including Marblehead Mammoth, Stone-Mason, Fottler, Winnigstadt, Cannon Ball, Schweinfurt Quintal, Early Wyman and other cabbages. Please note how well Marblehead Mammoth and Fottler cabbages do in the South.

"Of the ten thousand cabbage plants we planted nearly all headed up large and hard, weighing from ten up to twenty-five pounds. Fottler's Improved Brunswick is my choice." PATRICK DOWD.
Muskegon, Mich.

"Notwithstanding the very dry season of last year I was able to boast of cabbages, of your Mammoth variety, weighing nearly fifty pounds and had one on exhibition in Troy to the astonishment of the sight-seers, which received a favorable notice from the papers." WINFIELD S. FLINT.
Sand Lake, N. Y.

"From the seed of Fottler's Early Drumhead Cabbage we raised cabbages that weighed 35 to 40 pounds. The rest of the seed did as it was recommended." **JACOB F. SELDOMRIDGE, Ephrata, Pa.**

"Your Cabbage seed have always proved most excellent. The Fottler's Early Drumhead is the best cabbage for general crop that I know of for this climate. With ordinary cultivation it is sure to make fine large heads. Last season I planted my Fottler's in the open air, in May, and raised very fine cabbage, weighing from 10 to 20 pounds." **Pembina, Dakota Territory. WM. K. GOODFELLOW.**

"Those Fottler's were splendid. Every plant made a respectable head, weighing from 8 to 25 lbs. each. I shall depend on you for what few garden seeds I need in the future." **S. J. WESTON. West Peterboro, N. H.**

"My cabbages were a perfect wonder to all who saw them. The great inquiry was where did you get the seed and what kind are they? Fottler's was my reply. From 15 cents' worth of seed purchased of you I have sold \$50 worth, and have two or three hundred heads left yet. Cabbages were a general failure in this town except mine." **Westford, Mass. E. J. WHITNEY.**

"I send the weight of part of the vegetables raised on this farm in 1877 from your seeds: Red Drumhead Cabbage, 30 lbs.; Fottler's Drumhead Cabbage, 40 lbs.; Marblehead Mammoth Drumhead Cabbage, 50 lbs." **GEO. N. ENGLISH, Sheridan, Clare Co., Mich.**

"Having tested your Early Wyman Cabbage two seasons I wish to let others know that they are superior to any other variety I have ever grown. I have heads of this season's growth weighing 10 and 12 lbs. each, and the quality is excellent. They are the tenderest cabbage known in this town." **L. P. WALKER, Union, Maine.**

"The Marblehead Dutch Cabbage that I had of you was the best Cabbage I ever grew; it appeared to be perfectly pure and headed up nearly to a plant." **W. L. CONOVER, La Fayette, Ind.**

"Your seeds are splendid. Those Cannon Balls were the best cabbage that we ever had." **BENJ. P. MARSHALL, Unity, N. H.**

"We find your cabbages to be as good as you represented them to be. The Cannon Ball, Pixie, Stone Mason and Winnigstadt did splendidly. We had no success in raising Cabbage until we began having seed from you." **MRS. G. A. MORRILL, West Alton, N. H.**

"I must acknowledge that your early Wyman and Wakefield Cabbages are the right kind for this hard woodland. This is the second year I have raised them. I find the one-half was not told me, for I believe every seed came forth, and all are matured. I have already sold all I have. People all say I have the best lot of cabbage ever seen in this vicinity. They are also of good flavor and size." **PAGE R. MERRILL, Weare, N. H.**

"As this is, I think, the 8th season we have ordered seeds from your house, I feel it my duty to tell you that in no case were we disappointed in either name, quality or purity. All vegetables, and most especially Cabbages, Mammoth, Stone Masons, Fottler's, Winnigstadt and Cannon Balls presented a striking contrast to those generally raised in our neighborhood. Last year I ordered heavily and divided among friends who were astonished at results, and are now ordering of you for themselves." **DANIEL LUTZ, Millersburg, Ind.**

"My cabbages produced from seed purchased from you are the admiration of the whole neighborhood. In fact, all your seed are far superior to any ever introduced into this country, and any one has only to become acquainted with them to use no other." **J. M. FORD, Spring Cottage, Miss.**

"I raised, from seed purchased from you, heads of Fottler's Early Drumhead that weighed 45 pounds apiece. I had an acre of Fottler's and Premium Flat Dutch that were the best lot I ever saw together. Scarcely a plant failed to head, notwithstanding the green worms were very bad about here." **JOHN D. MILLER, Elmira, N. Y.**

"The seed you sent me gave great satisfaction, particularly your Marblehead Cabbage. They were marvelous. They grew to the weight of 43 lbs. and 2 oz." **SAMUEL BAKER, Ottawa, Canada.**

"You sent me a package of the Early Schweinfurt Quintal and it was the best Cabbage we ever raised. I could sell it readily at twenty-five cents per head. Some heads weighed 36 lbs." **GEORGE SWARTZ, Orbisonla P. O., Pa.**

"Your Wyman Cabbage is the Cabbage for this place. I transplanted in April 300 plants, commenced to sell on 12th of July; on the 25th of September had sold 2,550 lbs. at 5 cents per lb. They weighed from 5 to 13 lbs. each. I do not write this as an advertisement, but to say that I have faith in your seeds." **CHARLES MAYNARD, Hay Fork, Cal.**

My customers at the South will please observe the following:

"The package of Marblehead Mammoth Cabbage seed you sent me did finely. I raised the largest heads of cabbage from them I ever saw grown in this country. They excited my neighbors and some are old cabbage growers." **S. W. CLOUSE, Card Hill Post-Office, Texas.**

"The Fottler Cabbage is my favorite. It headed up uniformly and splendidly." **E. J. WHITNEY, Houston, Texas.**

"Your Stone Mason cannot be beat for early Spring. I have raised them to weigh 16 lbs. Our inhabitants never saw such large ones grow South before." **J. S. STEBBINS, Riceboro, Ga.**

"Mr. H. J. Van Pelt, of Mandarin Point, Florida, has been very successful in vegetable raising. Yesterday he deposited in our office a cabbage which weighs 38 pounds. It is solid and perfectly formed, of the Marblehead Mammoth variety. The seed were sown in September last, transplanted in October on an area of three-fourths of an acre, fertilized with 500 pounds of fish guano, procured of Mr. J. W. Hawkins, of this city, composted with swamp muck, and applied broadcast and in the hill. The cabbage have varied from 10 to 20 pounds in weight. Total receipts from three-fourths of an acre, over \$400. The seed was procured from Mr. Gregory, of Marblehead, Mass., who makes cabbage a specialty." **Jacksonville (Florida) paper.**

"I think it would be a difficult matter to find a finer lot of Cabbages than those I have growing from the Little Pixie, Cannon Ball and Winnigstadt seeds obtained from you in the winter." **Waterboro, S. C. W. S. HARLEY.**

"The paper of your Mammoth Cabbage seed sent me last summer was duly received, and from them I raised the largest and finest cabbages that I have ever grown, in a trial of about 40 years." **J. S. JONES, Griffin, Ga.**

"I have got out and am heading up nearly 40,000 Cabbages from seeds obtained of you—the largest Cabbage crop ever grown in the state. They are looking splendidly." **H. M. STRINGFELLOW, Galveston, Texas.**

Cream-Fleshed, Sculptured-Seeded Melon.

In size about medium, color much like Phinney's but darker

and more regularly striped; flesh very tender and melting, sweet and delicious. Melons quite thin-shelled, but first-rate keepers notwithstanding. The seed present a singular and striking appearance, as though engraved with oriental characters. Price, 15 cents per ounce; 6 cents per package.

Large White Russian or California Winter Radish.

The largest of all the winter sorts. From seed sown in June (for winter use the latter part of July is better) roots can easily be raised to weigh three pounds each. To obtain the best results the soil should be made rich, light and pliable. In the absence of rain, water freely. For winter use, pack the roots in earth or sand out of danger from frost. Immerse for a short time in cold water before using. To be used as a salad or served in all the ways of the spring and summer radishes. For prices, see page 30.

The Hubbard and American Turban Squashes, &c.

THE HUBBARD SQUASH. As the original introducer of the Hubbard Squash, I offer to the public seed taken from squashes

grown specially for seed. Let me not be understood as saying my seed is *perfectly* pure, for, as every farmer who has had experience knows, *perfect* purity in the Squash family is impossible; but the seed I raise is nearly perfectly pure,—as near as the utmost care by isolation for years can make it, and the great difference in purity between this and the average seed of the market, every farmer who has tried it knows.

AMERICAN TURBAN SQUASH. I have sent this fine Squash out as the best of all fall squashes, as good for fall as the Hubbard is for winter, in proof of which please see extracts in former catalogues from letters received.

I note that by one or more of the Philadelphia seed firms the Turban Squash is spoken of as a showy variety of but little value for domestic use. It is very evident that they have confounded it with the showy but worthless French Turban Squash.

MAMMOTH SQUASH AND SQUASHES FOR FEEDING TO STOCK. Mammoth Squashes, though of but little value for table use, on rich land, in those sections where roots are but little cultivated, are very profitable as food for cattle. I give the substance of letters received from a few of my correspondents, that my friends may be able to compare notes. A half acre of these Squashes have averaged 75 pounds each in weight. The Vegetable Marrow though not a mammoth variety holds high rank among kinds raised for feeding to stock. I have raised fourteen tons on a single acre of land.

Of the Mammoth Squash, Mr. James B. Pickering of New Hampshire raised one which weighed 192 lbs. Mr. H. Y. Diefer of Nebraska grew from two seeds 640 lbs., the largest squash weighing 239 lbs. Mr. J. C. Notenstern of Ohio raised from one vine, one weighing 164 lbs., another 145 lbs., and several others weighing from 30 to 50 lbs. W. Hester of Iowa, one that weighed 239 lbs., and James Arnold of Minn., several that weighed from 75 to 139 lbs.

"I have had Turbans this month (March), just as good as they were last November."

A. W. VALENTINE, Bethel, Maine.

"The American Turban Squash is just the thing it is represented to be. One Squash is worth a dozen eggs in the way of making egg custards, and no person should be without them that likes something good to eat."

S. E. GROVE, Shady Grove, Washington Parish, La.

CANADA VICTOR TOMATO.

This remarkably early tomato which I introduced several years ago will be found to excel in that most desirable characteristic *in earliness of ripening, the great bulk of the crop,* a trait of great value to market gardeners.

Generally symmetrical and handsome, in ripening it has no green left around the stem (a great fault with many other kinds otherwise good). It is heavy, full meated and rich, between round and oval in shape, and red in color.

I offer headquarters seed by the package, ounce and pound. For seed of my own growing, saved from selected specimens—per package, 10 cents; per ounce, 40 cents; per pound, \$1.00.

EXTRA SELECTED SEED. I have a special selection of seed stock made for me, from a crop grown in Canada, by the originator; a few bushels of the very earliest being selected for seed from a field of some acres. This seed is 15 cents per package, and \$1.00 per ounce.

One large firm after trying the larger and globe varieties of Tomato for canning purposes has selected the Canada Victor as the most profitable of all for their business. A number of very emphatic recommendations of the Canada Victor as an early market sort when contrasted in their experience of many other kinds may be found in my catalogue of 1881 and in those of former years.

"I have grown the Victor Tomato now for 8 years. It is a cross between Cook's Favorite and Large Red, I have taken special pains to save no seed except from the earliest and very best shaped tomatoes; this has made a decided improvement upon it. With me, it is fully a week ahead of anything I have tried, and I have tried nearly all kinds. The Early York and Hubbard's Curled were the earliest with me, but are fully a week behind Victor. The Victor Tomato is a very solid tomato, weighing 60 pounds to the bushel, plump weight. It is first-class in point of flavor. Moreover it has the remarkable quality of keeping its flavor late in the season; what I mean is, that when ripened in cool, wet weather, it is of fair flavor, when other varieties are insipid."

S. H. MITCHELL.

St. Marys, Ontario.

Marblehead Champion Pole Bean.

After testing it on my experimental grounds for several years I find this new pole bean excels every other known variety *in earliness*. While as is well known to market gardeners, the pole varieties do not usually begin to blossom until the first picking has been made on the early sorts of bush beans that were planted at the same date, the Marblehead Champion Pole will be found to be so early as to have beans ready to pick for market *as early or earlier than the earliest bush varieties*. To have the vines take well to the pole give the best of manuring and a sheltered, warm location. Per package, 15 cents.

Tailby's Hybrid Cucumber.

Mr. Tailby made this choice new variety by his skill and perseverance in crossing the Early White Spine on one of the largest of the English Frame varieties. These Frame cucumbers are much larger than our American varieties, some of them growing to thirty inches in length, but the vines are so tender that they cannot usually be relied upon in open-air cultivation in this country. In Tailby's Hybrid, however, we have a perfect success in hardiness, as it proves to be equally hardy with our American varieties. In size it is larger than White Spine, while it retains all the smoother beauty of its English parentage. It is literally an enormous cropper, and for size, beauty and number it is a sight to behold. Price, 25 cents per ounce; 10 cents per package.

The editor of the *Rural New Yorker* who has been testing this with other varieties on his experimental grounds gives the following as the result:

"The results of our cucumber experiments this season, may be summed up in a very few words. We choose Tailby's Hybrid for cucumbers and Green Prolific for pickles."

"We have taken the premium at the fair three years from the 'Tailby's Hybrid Cucumber' received from you. Some grew to the length of thirteen inches."

Hampden Co., Mass.

HENRY CAMERON.

The Hanson Lettuce.

The above cut represents a sectional view, showing the inside of this truly superior Lettuce, the heads of which grow to a remarkable size and are deliciously sweet, tender and crisp, even to the outer leaves. This variety is free from any bitter or unpleasant taste found in some sorts. The heads weigh from 2 1-4 to 3 lbs., and measure to outer leaves 18 to 25 inches in diameter. It is not recommended for forcing, but for outdoor cultivation it cannot be excelled, if grown in ground well manured and well cultivated. Per package, 6 cents; per oz., 25 cents.

"Your seeds give satisfaction, especially the Hanson Lettuce. I had some heads that weighed 3 lbs., trimmed." CARL A. BUSCH.
Monee Hill Co., Ill.

"Myself and neighbors agree that the Hanson Lettuce is the finest we ever saw. One head is plenty for a large family at one meal."

Wesley, Texas.

GREGOR C. MCLEOD.

"As to the Hanson Lettuce, you don't half praise it. I raised one head that measured twenty-five and a half inches in diameter."

Bloomington, N. Y.

MRS. LOUISE M. LENNON.

Blunt's Prolific Field Corn.

(Reduced from Rural New Yorker.)

Prof. Blunt has produced this remarkably prolific field corn (*it will yield all the way from three to six ears to the stalk*) by proceeding on the theory that since every joint that has a groove contains an elementary ear, therefore, by a scientific selection of seed ears and proper cultivation, these dormant ears may be fully developed. The result is that, starting with two ears to the stalk he has succeeded in so improving the variety, that the yield now, as stated above, is from three to six ears to each stalk. It has cropped over a hundred bushels shelled corn to the acre. My customers in New England will please note that *the corn is too late a variety to mature in their section*, but is a capital variety to grow for ensilage for that or any part of the United States.

For prices, see page 23.

BRANCHING DOURA.

Branching Doura yields from six to sixteen stalks from one seed. It is much sweeter than corn-stalks, being allied to sugar-cane, and cattle, horses and hogs will eat it ravenously. All the varieties of Douras stand firm against the highest wind; root deep, and will endure, without injury, a drought that ruins corn, as our friends in Kansas are well aware. Some of our most intelligent farmers believe that Doura will prove superior to corn for ensilage, because it is much sweeter and has much less water in its composition. This variety sprouts readily after being cut for fodder, producing two or three crops. Of its merits, the enterprising editor of the *Rural New Yorker* and his correspondent speak as follows:—Says Mr. Ott, "Though, during the severe drought corn dried up within a few feet of it, the Branching Doura suffered but very little, producing from four to a dozen branches and grew sturdily from six to ten feet high. If cut down it starts again with renewed strength." Writes Mr. Henry Stewart, "It yielded at the first cutting, at the rate of 68 tons to the acre, far surpassing Amber Cane and Corn, growing side by side." Writes Mr. Satterthwait, from S. Carolina, "We have cut it three times in one season and two of the crops were heavy." My correspondent in whose family it has been grown for two generations, writes me, "I did not fully realize its value until I noted that when in a severe drought all the crops failed, this was not affected in the least." The editor likes it better than any fodder plant he has ever tried, and sums up its good qualities under six heads. 1. Its suckering or branching proclivities. 2. The firm hold it takes upon the soil. 3. Its abundance of leaves. 4. The sweetness of the stalks. 5. Its continued growth after being cut. 6. Its power to resist drought. Price per mail, post-paid, per package, 10 cents; per 1/4 lb., 20 cents; per lb., 60 cents. Four pounds will plant an acre.

NEW VEGETABLES FOR 1883.**RARE, NOVEL, OR VERY DESIRABLE.**

While most of these new and rare vegetables will be found to be of universal value, some may vary in quality with the soil and locality, and the value of others vary with the varying tastes of my customers. As a general rule we are not rendered capable of passing judgment on a new vegetable by the result of a single trial. Oftentimes the most we learn from the result of planting one season is what are possibly the merits or demerits of it; a second may develop what are probably its merits or demerits; and usually a third season will be required to enable us fully to determine its value, and give the new-comer its true place in the vegetable garden. Take Mexican Sweet Corn, for an example; should the first season of experiment be wet and cold at the time it matures for table use, this variety being more desirable, than the old standard sorts, may be more affected in its quality than they, and not superior to them in sweetness. Now let the next season be a hot and dry one, and the same corn, having a season more congenial to its tropical origin, will develop its full quality and demonstrate its full claim to the rank given it in my catalogue. So with many of the varieties of our Tomatoes; from an extended cultivation of many kinds, I am fully convinced that though some have been overpraised, yet with a majority an experience of three years would reverse or greatly qualify the hasty, deprecatory opinions, sometimes expressed of them, from a trial of but a single season.

For Prices per bushel, pound, quart, etc., please see pages 19-32 inclusive.

	Price per P'k'ge		Price per P'k'ge
CALIFORNIA BRANCH BEAN. This is a white field bean growing to height of 18 to 20 inches, branching out in all directions and bearing the pods so high that they are not so apt as the common sorts to touch the ground and be injured by wet weather. A single vine has yielded 130 pods. They closely resemble the Navy bean, and have yielded over 45 bushels to the acre. The variety is so prolific that but one plant should be allowed to grow each 18 or 20 inches in the row,—the rows being 2 1-2 feet apart. Per pint, 40; per quart, 80.		LETTUCE, EARLY PRIZE HEAD. This gathers a very large head, as large as any grown, though hardly as hard as Red Besson or Princess Head. Runs to seed slowly; very tender, of fine flavor. An acquisition.	15
WHITE VALENTINE BEAN. Being more white in color this will be preferred by many for a green shell or for baking purposes, to the common red variety.	15	LETTUCE, GREEN FRINGED. This is an exceedingly ornamental variety, the edge being elegantly fringed. It is of the Boston curled class and fully as ornamental. It remains a long while in condition for the table.	15
VERY EARLY ETAMPE'S CABBAGE. A very fine extra early or heart-shaped cabbage. Per oz., 50.	15	GOLDEN TANKARD MANGOLD. A new variety; flesh deep yellow, with rings of a rich yellow color; outside color a rich yellow. Tankard shape; flat on the bottom.	10
TOURLAVILLE CABBAGE. About as early as Early York; firm pointed head with yellow heart. Its great recommendation is said to be that it keeps its head after maturity a longer time than other cabbages without splitting. Per oz., 50.	15	ICING, OR ICE RIND MELON. This has become exceedingly popular wherever grown. Oblong in shape, rind light green, white seeded, of good size and very prolific; flesh melting and of fine flavor.	10
PERFECTION HEARTWELL CELERY. In the experimental grounds of a neighbor, and of several varieties tested, this was the most vigorous of all and made the largest heart. Per oz., \$1.	15	EGYPTIAN, OR PERENNIAL TREE ONION. These onions should be planted and will be sent out in August or early September, making a growth, and keeping sound in the ground over winter. The bottoms divide, making several onions resembling the old-fashioned, rare-ripe, being homely but valuable from the fact that they come into market two or three weeks ahead of any other early onion. The young sets grow on top of the stalk-like top onions.	15
CHINESE GOLDEN CORN. This formed a part of the Centennial exhibit by the Chinese government. It has the richest golden color of any variety of yellow corn. The habit of growth, size and shape of ear, closely resemble that of our table varieties of sweet corn.	15	TENERIFFE OR EARLY BERMUDA ONION. This is decidedly the earliest of all onions, being three weeks earlier than the Danvers onion. It is the early pale red onion shipped to this country from the island of Bermuda, known as the 'Bermuda' onion. To get the largest size it needs to be raised from sets. Seed and sets are especially adapted for autumn sowing in the South, while heavy manuring would be likely to give it good market size and make it the early onion in the North.	15
SIBLEY'S PRIDE OF THE NORTH. This on my experimental grounds proves to be decidedly the earliest of all the Dent varieties. It will mature in 90 days, and can be ripened as far north as northern New England.	10	JOHN BULL PEA. A new wrinkled pea which proves to be remarkable for the large size of the individual peas and for the length of pods. Grows three feet high, with vine and leaf stoutest of all peas. There is no better pea grown. An acquisition.	25
RURAL THOROUGHbred FLINT CORN. This is a variety sent out by the enterprising editor of the <i>Rural New Yorker</i> as an improvement on the standard varieties. It appears to have given great satisfaction, as high as \$1.00 having been offered for single ears, some of which were over 16 inches long. I have not as yet tested it on my experimental grounds.	15	CORNE DE BELIER SUGAR PEA. The sugar peas are to be used just like string beans, boiled pods and all, as they are entirely free from strings. This is the largest of the sugar peas, the pods being as broad as two fingers.	20
WAUSHAKU CORN. This is an eight-rowed yellow-flint, made eight years ago by Dr. E. L. Sturtevant by crossing the Longfellow on a choice local variety. The result was a very small cob well filled out at both but and end, with kernels of good size, very compactly set and weighing 64 lbs. to the bushel. A ten acre lot of the variety raised in Framingham, Mass., averaged over one hundred bushels shelled corn to the acre. The stalks are stout, making good fodder.	10	GOLDEN DAWN MANGO PEPPER. This is a remarkably prolific pepper of the Bell class, and of a magnificent golden color.	15
PEERLESS WHITE SPINE CUCUMBER. A decided improvement on the White Spine in size. Crisp, of fine flavor and enormously productive. An excellent variety for forcing or for an early market. Per oz., 30.	10	LONG SPENDING SPINACH. As every gardener knows, the great source of loss in raising spinach is in the pushing of the shoots so early as to ruin the crop for market purposes. In this new spinach we have an acquisition, therefore; for, as its name indicates, it surpasses all other varieties in this important quality, thus prolonging the market season and increasing the profits of the crop. See page 2.	10
HENS' EGG GOURD. These so closely resemble hens' eggs in size, form and color that they are usually mistaken for them. The vines yield enormously, and they make capital nest eggs.	15	NIMBLE SIX WEEKS TURNIP. Among the earliest of the strap leaf class. In shape like a rutabaga. Handsome and well flavored.	10

MAYFLOWER TOMATO. (*Hosford.*) Large, smooth skin, solid flesh, few seed, fine flavor, bright red color, per oz. 50, cts.

Price
per
P'k'ge
10

LONG WHITE VERTUS TURNIP. This new turnip has given me great satisfaction when tested side by side with 26 different stocks, most of them different varieties. It makes a small neck, is pure white in color, and oblong in shape. It is not of the Rutabaga class, but of the same class as the early red top.

10

EXTRA EARLY FRENCH TURNIP. A distinct variety, oblong in shape. Valuable for its earliness, size and quality. An acquisition. It belongs to the early red-top class.

Price
per
P'k'ge
10

SEVEN-TOP TURNIP. The seed of this is planted in the ground (in the South) in the Fall, and the bulbs left standing in the open ground over winter. The tops are cut for green early spring. It will bear several cuttings. The bulbs are useless.

10

The following, with varieties illustrated on Pages 3—14, are the select varieties of vegetables of former years.

For Prices per bushel, pound, quart, etc., please see Pages 19—32 inclusive.

ALFALFA OR LUCERNE. This has until recently been considered too tender to stand our northern winter. Mr. Albert Chapman and Mr. Solomon Jewett have met with fine success with it in Vermont, and Mr. C. cut four heavy crops from it in a single season. The success appears to turn on using American grown seed and planting it in deep porous soil. Doubtless a top dressing with fine manure would serve to help it through its most tender period of the first winter.

10

MARBLEHEAD EARLY HORTICULTURAL BEAN. What would my customers say to a variety of dwarf horticultural that with all the fine traits of that excellent variety, large beans and large, rich-colored pods, excellent either for shelling or stringing, there could be added the capital trait of being in the very front rank for earliness. The Marblehead Early Horticultural is, I think, the very earliest bean grown.

10

DWARF MONT D'OR BEANS. A new variety of wax bean, from Germany. A profuse bearer, and a decided acquisition.

10

TRANSYLVANIAN BUTTER POLE BEAN. A new bean from Germany, described thus: Pod very broad and long, very fleshy and quite stringless. Quality excellent; plant very robust and exceptionally productive.

15

GOLDEN BUTTER BEAN. A new, German, wax pole, early and prolific. This bean closely resembles the Indian Chief, but it is a better bearer and the pods are rather longer.

15

YELLOW PODDED WHITE WAX BEAN. This is a very superior early pole wax or stringless bean. The pods are as long as Giant Wax, but it surpasses this old variety in earliness and productiveness.

15

SOJA BEAN, YELLOW ETAMPES. This variety has a fine flavor, cooks well, and is very nutritious either green or dry. It does not exceed 21 inches in height, and under ordinary circumstances is early enough to ripen the greatest portion of the large number of pods it produces.

15

DWARF GOLDEN WAX, alias YORK DWARF WAX BEAN. In the year 1871 I introduced this bean to the public, giving it the name of "York Dwarf Wax." It proves to be more prolific, and yields larger and broader pods than the common kinds of dwarf wax beans. It is entirely stringless, threshes out easily, and is also a good shell bean for winter use.

10

YARD LONG BEAN. A curious bean of very dark and glossy foliage. The pods grow two feet and upwards in length.

15

KENTUCKY WONDER BEAN. The most productive variety, that I have ever known. The vines take to the pole exceedingly well and the pods grow in clusters of three or four, being remarkably long, round and pulpy, covering the poles from top to bottom. I do not recommend it as a shell bean, but as a snap bean it is a "Wonder!" as every market gardener will find. The pods are nearly a foot long, yielding from eight to ten beans to each pod.

15

BOSTON DWARF WAX BEAN. I would invite the special attention of my customers to the new dwarf wax bean. They will find it a decided improvement on the German Dwarf Wax Beans in three important particulars, viz.: 1st, they will yield double the crop; 2d, they are taller, thus keeping the ground; 3d, they were perfectly healthy and vigorous, where the Germans growing side by side were badly blighted.

15

WEBB'S NEW KINVER YELLOW GLOBE MANGOLD WURTZEL. Considered by some growers the best Yellow Globe Mangold in cultivation; very solid and grows quite free from side roots.

6

EARLIEST BLOOD RED ERFURT CABBAGE. A new German variety. The earliest of all red cabbage. Of medium size, very short stump, and heading almost as hard as a nut.

10

MARBLEHEAD DUTCH CABBAGE. My customers will find this an improvement on the common Flat Dutch, in its producing a remarkably symmetrical, round and handsome head: firmer and harder heads than the common sort.

Price
per
P'k'ge
10

VERY EARLY PARIS SAVOY CABBAGE. A fortnight earlier than Ulm Savoy, which it resembles in shape and color.

10

VILMORIN'S EARLY FLAT DUTCH CABBAGE. This is the French strain of the Early Flat Dutch, the heads being rounder and harder than in the strains of this early cabbage as grown in the United States.

10

CARTER'S THOUSAND-HEAD KALE. This variety produces great weight of green stuff per acre. It is the hardiest of the cabbage tribe and used in England for cattle feeding and also for marketing.

10

EARLY ORANGE CANE. This is a stronger grower, yielding 24 per cent. more cane, and is also richer in juice than any other variety. A little later than the Amber and not quite so tall, the stalks are every way stouter. It is not safe to attempt to cultivate north of Lat. 43 deg.

10

EARLY SNOWBALL CAULIFLOWER. Very early and very reliable for heading, besides being very dwarf in its habits of growth, and with short outer leaves, thus allowing planting 20 inches apart each way.

50

CARTER'S DEFIANCE EXTRA EARLY FORCING CAULIFLOWER. Messrs. Carter & Co., the introducers, say of this, "A very distinct and valuable Cauliflower. It is much earlier than any other variety, producing beautiful white heads about the size of a cricket ball. For forcing or very early use, it is unequalled—very dwarf and of compact habit."

50

LATE ALGERIAN CAULIFLOWER. One of the new large, French varieties. Very fine.

20

EXTRA EARLY DWARF ERFURT CAULIFLOWER. (Seed specially selected.) Very early, hardy, dwarf and compact; larger than Walcheren. One of the very best for forcing and for general purposes as an early variety. Its compact habits admit of a large number being raised on a given area. I have grown some heads for seed stock, that measured 18 inches in diameter.

50

BOSTON MARKET CELERY. This is the short, bushy compact, solid celery, for which Boston Market is so famous.

10

LARGE SMOOTH PARIS TURNIP-ROOTED CELERY OR CELERIAC. A favorite variety with the Paris market gardeners. It makes exceedingly fine bulbs of a regular shape, smooth and large, and with but a few roots, and of excellent quality. It yields much better and smoother roots than any other variety.

10

LA PLUME CHESTNUT CELERY. This is said to be a magnificent, new, half dwarf white celery, having uncommonly large and solid leaf-stalks which possess a true chestnut flavor, greatly admired by all lovers of good celery. It has been produced by long-continued selection and is a vigorous and rapid grower.

15

DWARF GOLDEN HEART CELERY. A half dwarf sort, silvery white with golden heart and perfectly solid. One of the most extensive of the Boston Market gardeners considers it an acquisition.

15

CHUFAS. These very closely resemble in sweetness and richness of flavor a cocoanut. Very prolific, a single one yielding from two to four hundred. Plant, one foot by eighteen inches.

6

	Price per P'k'ge		Price per P'k'ge
POTTER'S EXCELSIOR CORN. I don't think there is a sweeter, richer-flavored, white sweet corn for the table than this. Its quality is a surprise to me and I think it will be to any of my customers, who have not as yet grown it. Stock directly from the originator.....	10	ALL-THE-YEAR-ROUND LETTUCE. Very hard, crisp eating and compact. May be sown for succession all the year round. Does not tend to seed.....	15
MARBLEHEAD MAMMOTH SWEET CORN. Ears of this corn have been exhibited weighing, as gathered from the stalk, between two and three pounds each. It is a very sweet corn for family use; and the earliest, sweetest and largest of all the Mammoth Sweet varieties. I offer packages from selected ears. For price per quart, see general catalogue.....	10	SATISFACTION LETTUCE. A new English variety, large and unusually tender, remaining in head a long time.....	10
QUEEN OF THE PRAIRIE, DENT CORN. Has proved one of the earliest varieties of Dent Corn in cultivation. Planted after the Wheat Crop has been harvested, it matured the crop perfectly. It was planted on Long Island, July 4th, and fully matured the first of October.....	10	SUGAR LOAF LETTUCE. See engraving and description on page 2.....	15
CHESTER COUNTY MAMMOTH CORN. A Yellow Field. This stands at the very head of the large Dent varieties for Southern and Western growth. A hundred and fifty bushels of shelled corn of this variety per acre were grown this season, single ears being over fourteen inches in length.....	10	DEER TONGUE LETTUCE. This new variety was sent me by friends in New York as an acquisition, and I have tried it and can fully endorse it as such. It belongs to the Cos family and its unique appearance while growing it would honor any lady's flower garden) is fully supplemented by its good qualities for the table.....	10
BALDING'S BRANCHING CORN. I find this grows half a dozen stalks from a single seed, yielding from six to eighteen medium-sized ears. It is probably too late to be depended on to ripen the grain as far north as central Massachusetts, but it would prove magnificent for ensilage purposes, as the grain would be sufficiently ripe for that, while the stalk in height and bulk is enormous.....	10	BLACK-SEEDED SIMPSON LETTUCE. Like the common Curled Simpson, it does not properly form a head, but a compact mass of leaves; it differs in being much lighter colored, almost white, stands the summer heat exceptionally well, and attains a size nearly double that of the common Curled Simpson.....	10
BISMARCK CUCUMBER. A cross between the White Spine and Long Green, of even color, straight, tender, crisp and of fine flavor.....	10	STONE-HEAD GOLDEN YELLOW LETTUCE. A new variety from Germany. As early as the White Tennis Ball, with larger heads—quality, first class; the decision of several experienced gardeners was, that they had never eaten anything of the lettuce kind that surpassed it.....	10
MARQUIS OF LORNE CUCUMBER. Messrs. Carter & Co. describe this new frame cucumber as follows:—"Of great value for exhibition purposes. It has a beautifully short neck, smooth skin, is very straight and prolific. It has gained many valuable awards.".....	10	RED BESSON LETTUCE. An all-the-year variety, of a dark-green color, tinged with bright, bronzy-red. It produces in summer fine solid heads.....	10
NORBITON GIANT CUCUMBER. This is one of the frame varieties, sent out by the English seedsman of "The finest, longest and most prolific cucumber cultivated." I have grown them longer than an ordinary flour barrel.....	20	CUBAN QUEEN MELON. My test makes this a very near cousin of the Excelsior. It has all the good qualities of that capital variety and if really it is different and superior, my customers will have the advantage of it for my seed came directly from the original firm.....	10
SNAKE CUCUMBER. A very long variety (I have raised them six feet in length), growing coiled up, having much the appearance of a large snake with the head protruding. Fine specimens will sometimes bring \$5.00 each, as curiosities.....	20	CHICAGO NUTMEG MELON. This variety grows to a larger size than the Boston Nutmeg, and hence is very popular with those who lay great stress on size for market purposes.....	10
RUSSIAN NETTED CUCUMBER. A native of the Ukraine country and very prolific; surpasses all others in hardness; middle size, flesh white, and the skin covered with a pretty brown net-work which imparts to the fruit a peculiar appearance.....	50	LARGE BOSTON NUTMEG MELON. Larger than common Nutmeg.....	10
LONG GREEN SMOOTH CUCUMBER from Athens. It is one of the remarkable long frame varieties, and what is rare with all that class, does well in the open air in this country.....	20	VALENCIA MELON. A new variety from Spain. It grows from eight to twelve inches in length and from six to eight inches in diameter. In form somewhat egg-shape. Surface roughly netted, but not ribbed. For quality they are remarkable. Two gardeners, whose special business has been the raising of melon, write me, "For flavor and sweetness we never tasted the like; they can not be beat the world over." They are shy bearers and too late for the extreme North.....	15
DANDELION. Improved Very Early. A new French strain sent out by Messrs. Vilmorin & Co., and especially recommended to market gardeners.....	15	BOSTON PET MUSK-MELON. This choice early melon averages in size larger than the common Nutmeg, and surpasses it in sweetness and quality. It is of thicker flesh than the common Nutmeg, deeply ribbed and but slightly netted. At one State Fair it bore the palm from all others. Per oz., 20 cents; per lb., \$1.25.....	10
VERY EARLY DWARF EGG PLANT. A new French variety of Long Purple. Earliness in the egg plant family is exceedingly desirable, and in this new sort we have an acquisition....	15	PERSIAN MUSK-MELON. One of the deliciously flavored, salmon-fleshed class. Rather later than Ward's Nectar, grows rather larger and is very thick fleshed.....	10
ORNAMENTAL GOURDS. The packages contain seeds of Apple, Orange, Pear, Quince, Bottle, Egg, and other varieties. Peculiar, attractive and ornamental. Don't manure too high.	15	SILL'S HYBRID MUSK-MELON. This has all the earliness and sweetness of the White Japan, but is more spicy and delicious. Very vigorous and productive. The flesh is of salmon color. No garden should be without it.....	6
SUGAR TROUGH GOURDS. These grow to the capacity of several gallons, and will last years as sap vessels, or for holding liquids.....	10	THE SURPRISE MUSK-MELON. This new melon has a thin, cream-colored skin and a thick, salmon-colored flesh. Early, very productive, and of delicious flavor. Externally it resembles White Japan, but grows to twice the size. A first-class melon.....	10
BONNET GOURD, DISH CLOTH GOURD OR LUFFA. The peculiar lining of the fruit, so tough, elastic and enduring, has given it its name. The vine is very ornamental, having dark green foliage with silvery shade, and large yellow blossoms in clusters. It requires a frame or support. The seeds should be started in hot-bed. As the name indicates, it is sometimes used as a dish cloth.....	15	HACKENSACK MELON. Considered in New York the most popular variety of Musk-melon grown for market. It attains a large size, is round in shape, flattened at the ends, is of most delicious flavor, and wonderfully productive. It somewhat resembles the Green Citron, on which, however, it is a decided improvement.....	10
CABBAGE LETTUCE, EMPEROR FRAME. A new, very early variety, highly recommended by a German seedsman for forcing. Heads very firm. He considers this the best and earliest of all forced lettuces.....	15	RATTLESNAKE WATER-MELON. This is the long, large, mottled green Water-melon of commerce, making up the great bulk of melons sent from the South into the markets of the North.....	10
		PHINNEY'S WATERMELON. This is one of the best early varieties I have introduced. Red-fleshed, early and excellent. Those who could not succeed with other kinds of watermelons have succeeded well with this. It stands transportation remarkably well.....	6
		LONG HILL WATER-MELON. This new variety is large in size, dark-green in color and nearly round in shape. An improvement on the Black Spanish.....	6

	Price per P'k'ge		Price per P'k'ge
ODELLA WATER-MELON. This new sort has fairly leaped into popularity, where known, among market gardeners, some of them now growing it to the exclusion of all other kinds. It is both early and of a large size, growing to weigh from 25 to 50 lbs. Color, dark-green; form, round.....	6	"NEGRO," OR NANTUCKET PUMPKIN. This is the true, old-fashioned black-warted-shelled pumpkin of old times. The "pumpkin pie" pumpkin of our grandmothers.....	6
GOLDEN-FLESHED WATER-MELON. The flesh of this melon is of a rich honey color and the flavor sweet and rich. Slices alternating with those of the scarlet-fleshed variety make a pleasing show on the table. Shape nearly round. Size above the average.....	6	GOLDEN YELLOW SUMMER TURNIP RADISH. Its shape is that of the Yellow Summer Turnip Radish, but the root is more spherical, its neck is finer and the leaves are smaller. Of very rapid growth, it is fit for use from four to six weeks after having been sown. A novelty of great merit.....	6
PEARL MILLET. (<i>Penicillaria spicata</i> .) This new forage plant will not give satisfaction unless planted on warm soil after the ground has become heated by the sun's rays. Mr. Henderson's crop in three cuttings, on warm land, very highly manured, yielded per acre as follows: 95 tons green on 16 tons dry fodder within 135 days. Two quarts are sufficient for an acre in drills, and four when sown broadcast.	6	BLOOMSDALE SPINACH. Fast becoming popular with market gardeners. It has a blistered leaf which makes it springy. It lies lighter than the common sort in boxes or barrels, and being therefore less liable to heat, will keep longer in good condition.....Per oz., 10 cents.	6
SOUTHPORT YELLOW GLOBE ONION. In this we have a variety precisely like in shape the Southport white and red globe, differing in color only. It is hardly safe to plant in a latitude north of Connecticut.	10	PERFECT GEM SQUASH. (See description on page 9.).....	10
CARTER'S NEW GOLDEN QUEEN ONION. This variety possesses all the characteristics of rapidity of growth and good-keeping, properties for which the White Queen is famous, whilst the flavor is unusually delicate.	10	ESSEX HYBRID SQUASH. A cross between the Turban and the Hubbard, having the shape of the former and the shell of the latter. It is a very handsome looking squash. The flesh of rather darker color than Hubbard or Turkan.	10
NEW IMPROVED DWARF OKRA. Is said to grow but fifteen inches high and is very productive, bearing long, slender pods.	10	VEGETABLE SNAILS. Singular seed-vessels of low-growing plants, which have a striking resemblance to the snails of the garden.	10
FERN-LEAVED PARSLEY. A most beautiful thing. Valuable as a decorative plant. Resembles a beautiful moss.....	10	TOMATO, PRESIDENT GARFIELD. This variety originated in Servia and the fruit is said to have weighed from 2 to 2 1/2 lbs., and they are susceptible of attaining the unusual weight of 3 lbs., particularly if but few are allowed to remain on the same plant. There is probably no sort better adapted for exhibition purposes.....	15
HOLLOWAY RIVAL PEAS. A new pea. Described as "A splendid new, early, wrinkled variety, of branching habit, good robust constitution, quite free from mildew, 5 feet in height, a first-rate cropper and very prolific.".....	10	HOWARD TOMATO. This new tomato originated in New York, where it is preferred by some growers to the Paragon or Acme, being larger and, in their opinion, less liable to rot. A large, red variety, generally round in shape.....	10
NEW PEA, "EARLIEST OF ALL." Seedsmen say: "This variety appears to have fairly proved itself to be the earliest of all peas. It is a blue-seeded pea, and in common with all such, is of excellent and rich flavor.".....	25	YELLOW VICTOR TOMATO. A beautiful golden Tomato, in earliness and shape resembling Canada Victor. Per oz., 40 cts..	10
CARTER'S STRATAGEM PEA. Says the "Gardener's Magazine" of this new pea—"The Stratagem is a pea for everybody, whether rich or poor; it is a pea that will always pay, whether for the best table in the land or the people's market, the plant being dwarf and hardy and prolific, the pods of good shape and color and well filled with first-class handsome peas.".....	15	LITTLE GEM TOMATO. A prolific variety and desirable for those who wish a small, remarkably nice tomato a little larger than the Plum Tomato.....	10
CARTER'S PRIDE OF THE MARKET PEA. Says the "Gardener's Magazine" in speaking of this and the Stratagem—"Both peas have a robust habit and are immensely productive. They are indeed such heavy croppers that I know no peas from which so large a bulk of produce can be obtained from a given space. It is possible that the Pride of the Market will ultimately take the lead for market culture and the Stratagem be held in high esteem for private gardens.".....	15	CONQUEROR TOMATO. Handsome. Resembling somewhat Canada Victor, but not as large, solid or early. Vines small....	10
CARTER'S COMMANDER-IN-CHIEF. A grand Pea for exhibition and general purposes of cultivation. It is a green, wrinkled marrow of exquisite flavor, with fine, slightly curved pods sometimes containing ten large peas.....	20	LIVINGSTON'S ACME TOMATO. This is a purple variety having all the fine symmetry and smoothness of the Paragon, differing indeed from it in color mostly.....	10
TELEGRAPH PEA. Messrs. Carter & Co., the English seedsmen, speak of this new pea as follows:—"This is an extraordinary acquisition, the peas often being so close together as to appear to be forming a double row in the pod. It is likely to be the forerunner of a new type of this indispensable summer vegetable.".....	15	LIVINGSTON'S PERFECTION TOMATO. This tomato is blood red in color, perfectly smooth, has very few seed, is the largest early sort known, ripens all over and through at the same time. It is a good shipper and for canning cannot be excelled. It has taken first premium at three state fairs in Ohio and at an Iowa state fair.....	10
DR. MCLEAN'S PEA. Our English friends declare this to be a splendid pea, even superior to Advancer. A wrinkled variety, large-podded, with 8 or 10 peas to a pod. If it proves to surpass the Advancer it will be a great acquisition.....	15	PURPLE TOP MUNICH TURNIP. Messrs. Vilmorin, Andreux & Co., say of this turnip: "It is the earliest variety in cultivation, forming bulbs 6 inches in diameter within three months. White below ground, with a red top and a few small leaves.....	10
HANCOCK EARLY PEA. A new American pea of the first early class. See notes elsewhere.....	10	PURPLE TOP GLOBE TURNIP. An early variety, similar in earliness and size to Red Top Strap Leaf, but is globe-shaped. It is growing in favor and may in time become as popular as Purple Top Flat is now. Excellent for either the table or stock.....Per oz., 12 cents.	6
LAXTON'S SUPERLATIVE PEA. Messrs. Carter & Co., the English seedsmen, speak of this new pea as follows:—"The largest and finest podded pea yet raised; pods have been grown 7 inches in length. Second early, color and flavor unsurpassed.".....	10	YELLOW RED TOP, FLAT, MONTMAGNY TURNIP. Large, nicely-shaped, smooth, golden yellow, purplish-red top; flesh pale yellow, solid and sweet. Excellent for the field and the kitchen garden.....	10
CARTER'S CHALLENGER PEA. A dwarf, dark green, marrow, growing about 2 1/2 feet in height. Very productive, handsome pods, and of dwarf habit.....	10	FRENCH IMPERIAL SPRING WHEAT. This wheat weighed the last two seasons 62 to 64 pounds per measured bushel. The kernel is very large, and it grades extra heavy No. 1 Hard. A good wheat to grow where other kinds do badly, in a poor wheat season. It is said to be best adapted to soils of ordinary richness, as a very rich soil tends to make too much straw. Price per bushel, by freight or express, \$4.15 including bag; 3 pounds by mail, \$1.00; 1 pound by mail, 60 cents.....	10
SWEET POTATO PLANTS. Nansemond variety. Ready early in June. I have raised Sweet Potatoes in Massachusetts, weighing a pound. They are not so sweet as those grown South, but succeed very well in a warm location and sandy loam.....Per 100, 75 cents; per 1,000, \$6 (each by express).	10	DEFIANCE WHEAT. Another of Mr. Pringle's new hybrids. It is a beardless white chaff wheat with long heads closely set, with large, white kernels, frequently numbering 75 to 80 to the single head. Early and characterized by great vigor. Stiff, white and erect. Price per lb., by mail, 50 cents; 3 lbs., \$1.25; by express or freight at purchaser's expense, per peck, \$1.50; per bushel, \$5.00.....	10
		WHITLOOF. A most distinct and entirely new vegetable, somewhat resembling Chickory in habit. It produces a moderate-sized and beautiful white heart, in shape similar to Cos Lettuce; the top, either boiled or eaten as a salad, or the root boiled will be found a valuable acquisition.....	10

VEGETABLE SEEDS.

ASPARAGUS.

Sow the seed in the seed bed late in the fall or in the early spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. Thin the plants to three inches in the row. The roots may be removed to the permanent bed when one or two years old. In preparing the ground no pains should be spared, as a well-established and carefully cultivated asparagus bed will continue in good condition for twenty-five years or more. Select deep, rich, mellow soil, and trench the ground two feet deep, using a liberal quantity of well-decomposed manure, with a small admixture of common salt. Set the roots so that the crowns will be three or four inches below the surface of the ground. Apply a dressing of manure in autumn (rotten kelp is excellent), digging the same into the ground in the spring, taking care not to injure the roots. The bed will produce shoots fit for cutting the second or third year after transplanting. An occasional application of salt will be found beneficial.

Defiance. (New.) Said to be earlier than Conover's, and to grow much larger in the same time.....
Conover's Colossal. The largest variety grown.....

BEANS.

Dwarf, Snap or Bush.

Select light, warm soil, and plant when danger from frost is past in the spring, in drills two to two and a half feet apart, dropping the beans about two inches apart in the drill, and cover one inch deep. Keep the ground clean and loose by frequent hoeing, but do not draw the earth around the plants. Avoid working among the vines when they are wet, as it will tend to make them rust.

California Branch. (New.) See page 15.....
White Valentine. (New.) See page 15..... package only
Marblehead Early Horticultural. (New.) See page 16..... package only
Soja Yellow Etampes. (New.) See page 16..... package only
Soja. (New.) See page 9..... package only
Dwarf Red Cranberry. The pure old-fashioned sort, such a favorite with our fathers..... 35 65 10
Dwarf Mont d'or. (New.) See page 16..... 50 80 10
Boston Dwarf Wax. (New.) See page 16..... package only
Chinese. (New.) See engraving, page 7..... per pint, 50
Dwarf Russian. (New.) A new variety, unique in appearance..... package only
Rose. (New.) See page 5..... 45 75 15
Crystal White Wax. (New.) Pods small but remarkably prolific..... 45 75 10
Dwarf Golden Wax or York Dwarf Wax. (New.) See page 16. More prolific with larger beans and pods than the common sorts..... 2.00 7.00 45 75 10

Early Fejee. Very early, hardy and prolific; on moist garden soil will bear more pickings than any other bean..... 1.50 5.00 25 55 10
Early China, or "Red Eye." An old, popular, early variety..... 1.50 4.50 25 55 10
Early Valentine. Pods long, round and tender; excellent, standard early bean in Middle States..... 1.50 5.00 25 55 10
Early Mohawk. Very hardy, early and productive..... 1.50 5.00 25 55 10
Early Yellow Six Weeks. Very early and productive; a standard sort..... 1.50 5.00 25 55 10
Early Rachel. A long, straight-podded, early kind; grown for the New York market..... 1.40 4.00 25 55 10
Dwarf Black Wax. Pods yellow. Early; for a snap bean, superior..... 2.00 7.00 40 70 10
Dwarf German Wax. Long variety. Considered more productive than the Round variety..... 2.00 7.00 40 70 10
Dwarf German Wax. Round. A great acquisition; white pods, very early, first rate; beans pure white..... 2.00 7.00 40 70 10
Dun Cranberry. One of the very best for stringing; yield first-rate; early, good either as a green or dry shell bean..... 1.75 6.00 35 65 10
Refugee, or Thousand to One. A very prolific bush sort..... 1.50 5.00 25 55 10
Intermediate Horticultural. A half bush variety, very prolific; a superior sort for market gardeners..... 1.50 5.00 35 65 10
Improved Yellow Eye. One of the best varieties for baking. Remarkably vigorous, healthy and prolific..... 1.50 5.00 20 50 6
True White Pea Bean. (New.) This strain of Pea Bean is round like a pea; fine for baking..... package only
Navy or Pea Bean. A small, almost round variety, very productive. A standard sort for field culture..... 1.25 4.00 20 50 6
White Medium. White bush variety, largely used by government..... 1.25 4.00 20 50 6
White Marrow. A standard sort for field cultivation; early..... 1.25 4.00 20 50 6
Red Kidney. A standard red sort..... 1.25 4.00 25 55 6

Pole, or Running Varieties.

Set the poles three by three or four feet apart, and plant six to eight beans, with the eyes downward, around each pole, thinning to four healthy plants when they are up. They require the same soil and treatment as the dwarf varieties with the exception that they crave stronger soil, and do best in a sheltered location.

Transylvanian Butter Pole. (New.) See page 16..... package only
Bliss' Early Lima. This is, as the name indicates, really earlier than the common sorts..... package only
Golden Butter. (New.) See page 16..... 75 1.05 15
Yellow Podded White Wax. (New.) See page 16..... package only
Marblehead Champion. (New.) I find that this variety excels every other pole bean in earliness..... package only
Early Lima, Sieva, or Frost Bean. Two weeks earlier than Large Lima. Requires the entire season in the North..... 60 90 15
Mottled Cranberry. Long podded, very productive; a very popular bean for garden cultivation..... 10
London Horticultural, or Wren's Egg. Productive, pods elegantly striped—excellent string or shell..... 1.75 6.00 30 60 10
Kentucky Wonder. (New.) See page 16..... package only
Large Lima. As a shell bean surpasses all in quality; too late for the extreme North..... 3.00 9.00 40 70 15
Dreer's Improved Lima. Rather later but more prolific than Large Lima..... 50 80 10
Indian Chief or Black Algerian. Always in order for stringing; pods almost transparent, of a yellowish-white..... 2.00 50 80 10
Boston Market Pole Cranberry. The Boston marketmen cultivate this as the most prolific for market..... 50 80 15
Concord Bean. This new pole bean takes exceedingly well to the poles, is healthy and very prolific; excellent either as string or shell, resembling the Horticultural to which it is related, but is considerably earlier..... 3.00 40 70 10
Caseknife. A white pole bean of great richness either as green shelled or when baked..... 40 70 10
Yard Long. (See page 16.)..... package only
Giant Wax. Always a snap bean; a variety that is never stringy at any stage of growth. Pods of a yellowish-white color, very long and remarkably tender. An acquisition..... 60 90 10
Painted Lady. Either for ornament or use..... package only

ENGLISH BEANS. Broad Windsor. Large and excellent.....

These thrive best in rich, moist soil and cool situation. Plant in early spring, two or three weeks earlier than the common beans, in rows two feet apart and six inches apart in the row, covering two inches deep. Pinch off the tops of the plants when the young pods first appear.

BEET.

Select a deep, rich, sandy loam, and manure with well-decomposed compost. Sow in drills fourteen to sixteen inches apart, and cover one inch deep. When the young plants appear, thin to four or five inches apart. For early use, sow as soon as ground can be worked in the spring; for autumn use, about the middle of May, and for winter use, from the tenth to the twentieth of June, according to variety, the LONG varieties requiring more time to mature than the ROUND, EARLY kinds. When sown late, increase the quantity of seed. When young, the plants make excellent "greens." To preserve during winter, cover with earth to keep from wilting. When cooking, boil new beets one hour, and old ones two hours or more. The Mangold Wurtzels are grown principally for stock, and as they grow larger require more room. They should be sown in drills about two feet apart, and be thinned to twelve or fifteen inches in the row. (See my work on Mangold Wurtzels, etc.)

Norbiton's Giant Mangold Wurtzel.

BEET.

Table Varieties.

Eclipse. (New.) See page 7. Quite as early as the Egyptian.
Egyptian. Earlier than Bassano. Tops remarkably small. I heartily recommend this valuable variety to the attention of market gardeners, who seek above every thing else, earliness.
Early Bassano. One of the earliest.
Bastian's Early Blood Turnip. As early as the Bassano, but of a much darker color; small top; handsome shape; one of the standards for early market.
Early Blood Turnip. A standard sort; good for summer or winter.
Hatch's Early Turnip. Somewhat flat in shape; quite a favorite with some of the market gardeners around Boston.
Dewing's Early Blood Turnip. Very symmetrical; free from fibrous roots; dark red. This has taken several first premiums at the Massachusetts State Fair.
Simon's Early Turnip. About as early as Early Bassano, but of a deeper red. Popular in the Philadelphia market.
Yellow Turnip. A very early sort, about as early as Bassano; of a beautiful golden yellow color.
Bastian's Half Long Blood. A new Philadelphia sort of a fine dark color; a good grower.
Henderson's Pine Apple. Excellent for family use.
Long Smooth Dark Blood. Excellent for winter use; smooth skinned; flesh dark red.
Dell's Ornamental Dwarf. This has leaves of a deep, rich red color, highly ornamental.

Mangold Wurtzels, Varieties for Feeding Stock and for Sugar Making.

Golden Tankard. (New.) See page 15.
Webb's New Kinver Mammoth. (New.) See page 16.
Knauer's Improved Imperial. New. A standard German variety for making sugar.
Improved American Sugar or Lane's. A long white variety of Mangold Wurtzel, for stock.
Vilmorin's Improved French White Sugar. This is the variety cultivated by the French for the manufacture of sugar. Of six varieties of beets tested for sugar at the Farm of the Maine Agricultural College last season my seed of this variety gave the highest per cent. of sugar.
Carter's Orange Globe Mangold Wurtzel. The best variety of Yellow Globe.
Golden Ovoid Mangold Wurtzel. The Ovoid Mangolds grow more symmetrical and freer of rootlets than the long sorts. They are heavier, bulk for bulk.
Red Giant Ovoid Mangold Wurtzel. Very large, oval shape; pulls up very free from dirt.
Norbiton Giant Mangold Wurtzel. A new English variety which tends less to a hollow neck than the old Long Red kind.
Red Globe Mangold Wurtzel.
White Sugar.
Yellow Globe Mangold Wurtzel.

BERRBERRY

One of the best shrubs for hedges. Perfectly hardy. Never winter-kills and grows on any soil; makes a thick, close, impenetrable hedge that will turn cattle, and promises to become the hedge plant of North America. The berries make excellent preserves. As the seeds of the Berberry do best when planted in the berry, I will receive orders and file them to be filled in the fall, as soon as the fruit is matured, when I will send the berries at prices named above with a page of full directions for making a hedge, and for preserving the fruit.

BORAGE

This is a profuse flowering plant, which is grown principally for bees, or as ornament in the flower garden. Sow in early spring in rich soil, and thin plants to one foot apart. It readily bears transplanting, and when thus treated flowers more abundantly.

BRUSSELS SPROUTS.

A class of plants allied to the Cabbage family, producing great numbers of small heads or sprouts on the main stem of the plant, which are used in the manner of Cabbages. Plant in rich soil in hills two feet apart each way, and thin to one plant to the hill.

Scrymger's Giant Dwarf. (New.) In habit close headed and compact. package only
Dwarf Improved.
Dalmeny Sprouts. A hybrid between Drumhead Savoy and Brussels Sprouts.

BROCCOLI.

The Broccoli are closely allied to the Cauliflower family, so nearly so that the Walcheren variety is sometimes classed with Cauliflower. They require similar cultivation and treatment to Cauliflower.

Walcheren White. One of the very best varieties.
Large White Early French. A standard French variety.
Knight's Protecting. Dwarf, very hardy; heads very large for the plants.
Purple Cape. Late, large, compact.
Early Purple. Early, excellent; color deep purple.
Elletson's Mammoth. A large English variety.

CABBAGE.

Cabbage will thrive on any good corn land, though the stronger the soil the better they will develop. New land is preferable. Plough deep and manure very liberally. The early sorts bear planting from eighteen inches to two feet apart in the rows, with the rows from two to two and a half feet apart. The large varieties to be from two to four feet apart in the rows, with the rows from two and a half to four feet apart, the distance varying with the size. The crop should receive as many as three hoeings and three cultivatings. Cabbage will not usually follow cabbage or turnips successfully in field culture, unless three or four years have intervened between the crops. For late fall marketing, plant drumhead sorts from June 10th to 20th. For full and minute information in every department of Cabbage culture, see my treatise on "Cabbages, and How to grow them."

Earliest Varieties.

Tourlerville. (New.) See page 15.
Very Early Etampes. (New.) See page 15.
Earliest Blood Red Erfurt. (New.) See page 16.
Very Early Paris Savoy. (New.) See page 16.
Henderson's Early Summer. (New.) See page 8.
Early Nonpareil. A choice, very early sort.
Wheeler's Cocoanut Cabbage. A new sort, conical in shape, making fine hard heads; one of the best of the English early market varieties.
Early York. One of the earliest; an old standard sort.
Large York. An improvement in size on Early York; a little later.
Early Jersey Wakefield. (True.) Resembles Oxheart. A standard early cabbage in Boston and New York markets.
Little Pixie. A small, very tender and sweet cabbage, of the pointed heading family. It is earlier than Early York and heads hard, and from its small size a great number can be matured on a small area of land.
Sugar Loaf. A popular early variety.

PRICES OF SEEDS.

CABBAGE.

Early Oxheart. An excellent early sort.
Early Wyman. It is allied to the early Wakefield, is about as early but grows to double the size; very popular with market gardeners as an early market sort.
Cannon Ball. The hardest heading of all early sorts. See page 11.
Early Ulm Savoy. One of the earliest; unsurpassed in quality; capital for family use. See page 11.

Second Early.

Wilmorin's Early Flat Dutch. (New. See page 16.) Heads rounder and harder than the common variety.
Early Bleichfeld Giant. (New. See page 7.)
Danish Drumhead. (New.) Much like Stone Mason in size and shape but is ten days or more earlier. package only
"Newark" Early Flat Dutch. The best strain of second early variety in the New York market; heads large, solid, broad and thick.
Fottler's Improved Early Brunswick. The earliest of the large-heading drumheads. This has given great satisfaction in every section of the United States. (See page 11.)
Fottler's, from Germany. The same strain and from the same person who sent the first Fottler seed planted in this country.
Early Winnigstadt. Heads large, cone-shaped and solid; one of the very best for all soils. See page 11.
Large French Oxheart. Popular as an early cabbage.
Schweinfurt Quintal. The earliest of all large drumheads; grows from a foot to eighteen inches in diameter; does not head very hard, but is remarkably tender. The heads are very handsome, and almost as rich as the Savoy class. See page 11.
Early Red Erfurt. Early, head round and very solid.

Late Kinds.

Marblehead Dutch. (New. See page 16.)
Green Glazed. A standard variety in the South.
Marblehead Mammoth Drumhead. The largest cabbage in the world. (See page 11.)
Stone Mason Drumhead. A standard variety in Boston market. (See page 11.)
Premium Flat Dutch. Large and excellent for winter; very extensively grown.
Improved American Savoy. An improvement on the old Green Globe Savoy; very reliable for heading. Very sweet and tender—much esteemed for family use. An excellent sort for market gardeners.
Drumhead Savoy. A cross between Savoy and Drumhead—very large.
Red Dutch. The old variety for pickling.
Red Drumhead. Larger than Red Dutch and more profitable; heads round; very reliable for heading, very hard under high cultivation.

CARROT.

Carrots thrive best in rather a light loam. The ground should be well manured with fine, well-rotted or composted manure, six or eight cords to the acre, and be thoroughly worked quite deep, by two ploughings made at right angles with each other. Also cultivate and drag if there are any lumps, and then rake level, burying all remaining lumps and stones. Plant in rows fourteen inches apart, and thin plants three to five inches in the rows. Plant from the middle of April to middle of May, to insure crop; though good success is often met with if planted as late as 10th of June. As the dry spells which sometimes prevail at that season are apt either to prevent the germination of the seed, or to burn the plants as soon as they appear above ground, it is therefore advisable to increase the quantity of seed, which under the circumstances will give the crop a better chance. Keep very clean of weeds. (See my work on Mangolds and Carrots, on page 4 of cover.)

Danvers. (New.) See page 5
Early Very Short Scarlet. The earliest and smallest of all varieties; of special value for forcing.
Early Scarlet Horn. The early short variety for forcing; excellent for the table; color very deep orange.
Short Horn. The standard early variety; sweeter than Long Orange and more solid. Good to color butter.
Improved Long Orange. I send this out as the most select strain of Long Orange.
Large White Belgian. Largest white; very productive; good for horses; entire crop can be pulled by hand.
Yellow Belgian. Grows partly out of ground. A capital sort for late keeping.

CAULIFLOWER.

Pursue the same course as with Cabbage, manuring rather heavier and hoeing oftener. Cauliflowers covet the cool, moist weather of the fall months to perfect themselves.

Eclipse. (New.) The leaves of this variety are said to protect the head especially well. package only
Carter's Defiance. (New.) See page 16. package only
Henderson's Early Snowball. (New.) See page 16. Very dwarf; very early; very reliable. Price per $\frac{1}{4}$ oz., 2.50
Gerry Island. (New.) See engraving and description, page 7.
Berlin Dwarf. By test I find that this for earliness, size and quality, about equals the Snowball.
Early London Market. The best strain of this standard English sort.
Extra Early Dwarf Erfurt. Extra choice. Specially selected. (See page 16.)
Early Paris. A standard early variety.
Early Erfurt. A choice German variety.
Italian Early Giant. Fine, large, white-headed and early.
Early Dutch. Early.
Nonpareil. One of the earliest varieties, resembles Improved Early Paris.
Lenormand's Short-Stemmed Mammoth. Dwarf, large and fine. One of the most reliable for general cultivation.
Carter's Dwarf Mammoth. Very early, with heads remarkably large for so dwarf a variety.
Autumnal Late Giant. (New.) Very large headed and extremely productive. package only
Large White French. Fine, large white.
Stadtholder. Fine; large size; late.
Late Algerian. (New.) See page 16.

CELERY.

Plant seed in hot-bed or very early in open ground. Transplant four inches apart, when three inches high, in rich soil finely pulverized; water and protect until well rooted, then transplant into rows five or six feet apart either on surface or in well-manured trenches a foot in depth, half filled with well-rotted manure. Set the plants from eight to twelve inches apart. To blanch draw earth around the plants from time to time, taking care not to cover the tops of the center shoots.

Perfection Heartwell. (New.) See page 15.
La Plume Chestnut. (New.) See page 16.
Golden Heart Dwarf. (New.) See page 16.
Crawford's Half Dwarf. (New.) See page 5.
Sandringham Dwarf White. Most dwarf of all; very solid; white.
White Solid. A standard sort.
Boston Market. Short, compact and solid—almost the only variety sold in the Boston market. (See page 16.)
Boston Market. (Mixed.) This contains, by accident, just a sprinkling of Crawford's.
Turnip Rooted. The root of this is eaten.

Seeds per mail post-paid by me; per Express or Freight at purchaser's expense.

PRICES OF SEEDS.

CELERY.

Carter's Crimson. Dwarf, solid and crisp; a first-class variety.
Turner's Incomparable Dwarf White Solid. Popular in England, and extensively grown by the New York market men. In dwarf habit next to Sandringham.
Old Celery. For flavoring pickles, &c.

CHICKORY.

Pursue the same manner of cultivation as for Carrot. If to be used as a salad, blanch the leaves by covering so as to exclude the light. If raised for its root, dig at about the same time as Carrots, wash the roots and then slice them, either way, and dry thoroughly by artificial heat.

Large Coffee Rooted. Used as a substitute for coffee

CHUFAS, or Earth Almonds. (See page 16.)

COLLARDS or COLEWORTS. True Rosette.

A class of plants closely allied to the Cabbage family, which are somewhat extensively used in the South, when small, as greens. Sow in early spring in drills one foot apart, covering the seed half an inch. The young plants are ready for use as soon as they have attained sufficient size, but if it is desired to keep them in good condition, thin the plants to six or eight inches apart, and pull off the larger leaves before using.

CORN.

Corn revels in a warm and rich soil. Do not plant before the ground has become warm—nothing is gained by it. Drill cultivation is more profitable than hill cultivation. The smaller varieties may be planted with the drills two and a half feet apart, and the stalks thinned to ten inches apart; the larger sorts should have the drills three to four feet apart, and the stalks a foot apart in the rows, and the largest varieties eighteen inches apart. Use some rich manure in the drills. Frequently stir the earth around the roots by hoe or cultivator, but do not draw it up about the stalks. For a succession of corn for family use to be planted at the same time, I would recommend Marblehead Early, Pratt's, Crosby's, Moore's, Stowell's and Egyptian Sweet.

Sweet Varieties for Family use and Marketing in a green state.

Potter's Excelsior Sweet. (New.) See page 17.
Marblehead Early Sweet. The earliest of all; allied to the Narragansett, but a week earlier. See page 3.
Pratt's Early. A capital sort for marketmen who are looking for an early sort, growing to a fair market size.
Early Minnesota Sweet. One of the very earliest sorts of sweet corn, with ears of suitable size for market purposes.
Early Narragansett. One of the earliest; kernels very large; ears large in diameter, and of medium length.
Crosby's New Early Sweet. First rate every way, either for market or family use.
Forty Days. Earlier than our standard early desirable in high latitudes as an extremely early sort for a flint variety.
Mexican Sweet. The sweetest and tenderest for table use of all varieties I am acquainted with.
Golden Sweet. The only cross ever made between the sweet and field varieties; flavor, peculiarly rich.
Egyptian Sweet. (New.) See page 4.
Stowell's Evergreen Sweet. Excellent; keeps green till cold weather; ears large; a standard late variety.
Marblehead Mammoth Sweet. The largest variety grown. (See page 17).
Moore's Early Concord Sweet. 12 to 16 rows, medium early, ears large; a good variety to follow Crosby's Early.
Sweet Fodder Corn. Sweet corn is preferred to the yellow kinds by our best farmers for fodder.

Varieties for Field Cultivation and Popping.

Sibley's Pride of the North. (New.) See page 15.
Rural Thoroughbred Flint. (New.) See page 15.
Waushakum. (New.) See page 15.
Chinese Golden. (New.) See page 15.
Balding's Branching. (New.) See page 17.
Queen of the Prairie Dent. (New.) See page 17.
Chester County Mammoth. (New.) See page 17.
Sanford. A white flint, planted extensively for fodder, the stalks being extra large and numerous.
Bailey's Ensilage. (New.) The tallest variety of Southern corn, especially suitable for ensilage.
Blunt's Prolific Field. (New.) See engraving and description, page 14.
Longfellow's Field. (New.) See page 9. My stock this season is fine.
Adams Early. A favorite in the South. The earliest of all the Dent sorts.
Improved Early Yellow Canada. A first-rate corn where the seasons are short.
Hundred Days Dent. Early. Capital for the Middle and in favorable seasons for Southern New England States.
Silver Laced Pop. The handsomest of all varieties of pop corn, and decidedly a growing favorite.
Nonpareil, or Pop. The popular variety for parching.
Dwarf Golden Pop. Small, but ornamental, and a favorite with the little folks; excellent for popping.
Egyptian Pop. Tenderer when popped than the common variety.

BROOM CORN.

Any good corn land will grow Broom Corn. Plant in rows three feet apart and thin to eight inches in the row.

Dwarf. Dwarf in habit; grows a finer brush than any other.

Improved Evergreen. An improvement on the Evergreen by careful selection of stock for years. Not as tall as Evergreen; brush fine and bright colored.

CRESS.

Plant on rich soil, finely pulverized, in drills six or eight inches apart. That grown in the cool of the season is of the best quality. To be used as salad before the flowers appear.

Curled. The best sort.

Plain or Common.

Water Cress. To be planted along the borders of shallow water-courses. The famous English Cress.

CUCUMBER.

The vines require a warm location. Plant after the ground has become warm, in hills four feet apart for the smaller varieties, and five feet for the larger sorts. Manure with ashes, guano, or some well-rotted compost, working the manure just under the surface. Sprinkle vines with plaster or air-slacked lime to protect from bugs. The frame cucumbers can be successfully grown in the open air in this country by giving them well sheltered location, plenty of manure, and having hills six by six.

Peerless White Spine. (New.) See page 15.

White German. (New.) See engraving, page 4. The handsomest frame variety I ever saw. package only

Extra Long Green Smooth. (New.) Very long, smooth and straight. package only

Long Green Smooth from Athens. (New.) See page 17. package only

Short French Pickling. A new French sort allied to the Green Prolific, makes a fine pickle.

Marquis of Lorne. (New.) A celebrated frame variety, short neck, smooth skin; very straight and prolific. package only

Green Prolific. A very prolific variety. Selected by one of the largest growers in the country.

Bismarck. (New.) (See page 17.)

Russian Netted. (New.) (For description, see page 17.)

PRICES OF SEEDS.

CUCUMBER.

	lb. exp. mail	lb.	1/4 lb.	oz.	pk'g
Tailby's Hybrid. (New.) (For description, see page 14.)	1.35	1.50	50	25	10
Norbiton Giant. (See page 17.) The longest prize frame cucumber known.					20
English Prize Cucumbers. Carter's Champion; Sion House. These yield but very few seed, and are great favorites in England. Each variety per package.					25
Gen. Grant. The hardiest and probably the most prolific of the English Frame varieties. In England the climate is not hot enough to grow cucumbers in the open air.					20
Early Russian. The earliest of all varieties; grows about four inches long.	85	1.00	30	12	6
Early Cluster. Bears mostly in clusters; very early and productive.	85	1.00	30	12	6
Improved White Spine. Great bearer; excellent for early forcing, or for outdoor cultivation; standard in Boston market. My stock is from one of the best Boston market gardeners.	85	1.00	30	12	6
Early Frame. Early, short, prolific.	85	1.00	30	12	6
Long Green. An old standard sort.	85	1.00	30	12	6
Short Green. An old standard.	85	1.00	30	12	6
Improved Long Green Prickly. Excellent variety, growing 18 or 20 inches long; makes a hard, brittle pickle.					6
West India Gherkin. A very small, elegant, peculiar sort, for pickles only, prolific to an extraordinary degree. Somewhat difficult to get the seed to germinate.			1.00	30	10
New Jersey Hybrid. The largest of all white-spined varieties.	1.35	1.50	50	15	6
Eight Varieties Mixed					20
Boston Pickling. A medium, long variety; the standard for pickling in Boston market.	1.10	1.25	35	15	6
Short Pickling. Very desirable for a short pickle.	85	1.00	30	12	6
Early White Japan. A variety recently introduced from Japan, exceedingly productive; resembles White Spine, but turns to a richer creamy white color, and is earlier.	85	1.00	30	12	6
Snake. I have grown these six feet in length, coiled up like a snake. (See page 17.)					20

DANDELION.

This vegetable has become very popular as an early healthful green, and the roots also are used when dried as a substitute for coffee. Its use in either of these forms is particularly recommended to those who are inclined to any disease of the liver. Sow in May in drills one foot apart, covering the seed a half inch deep. A rich soil is preferable, but this plant will thrive anywhere.

Improved Very Early. (New.) See page 17.				75	15
Improved Thick Leaved. (New.) Seven hundred bushels of this sort have been grown on three-fourths of an acre.	4.85	5.00	1.50	60	15
Common	2.85	4.00	1.30	40	10

EGG PLANT.

Plant the seed in March, in a hot-bed, or, for family use, in flower-pots, in a warm window. Transplant in open ground after weather has become warm and settled, in rows two feet apart each way. They require a rich soil and as favorable a location for warmth as the garden will afford.

Long White China. A very delicate and beautiful long white variety. Highly esteemed by amateurs.					15
Very Early Dwarf. A new French variety of Long Purple; extra early. (See page 17.)					15
Black Pekin. A new variety of Round Purple. Blackish violet leaves; fruit very large.				75	15
Long Purple. Earlier and more productive, but smaller than Round Purple.				50	15
New York Improved Round Purple. An excellent variety, surpassing in size of fruit.				50	15
Scarlet China. (New.) A fine ornamental variety.					15

ENDIVE.

For early use sow as soon as the ground can be worked in the spring, in drills fifteen inches apart, and thin plants to six or eight inches in the row. A succession may be obtained by sowing every two or three weeks until midsummer, when it will be proper time to plant for fall and winter use. Any common garden soil will do, but a rather moist situation is preferable. To blanch the leaves gather them carefully together when perfectly dry and tie with matting or any soft fibrous material. Another method is to invert flower pots over the plants. The leaves are very highly esteemed for use as salads.

London Green Curled. Very popular.				25	6
Fine Curled Mossy. Very ornamental.				30	10
Broad Leaved Batavian. A large summer variety.				25	10

GOURDS.

The larger varieties require the entire season to mature them, and the ornamental sorts are apt to grow too large if the ground is very rich.

Hens Egg. (New.) See page 15.					15
Hercules Club. Grows 4 to 5 feet in length.					10
Sugar Trough. (See page 17.)					10
Double Bottle.					10
Dipper. Used as its name indicates.					10
Angora					10
Dish-Cloth. The inside is tough, being sometimes used as a dish cloth. See page 17.					15
Fancy and Ornamental. Mixed varieties. (See page 17.)					15

GARLICS.

Plant the bulbs on exceedingly rich soil, in rows or in ridges fourteen inches apart and six inches apart in the rows. They are cultivated for their flavor, (which is similar to the onion but more powerful,) and are used in stews, soups, &c.

KALE, or BORECOLE.

Plant the larger sorts in hills two by three feet apart, and thin to one plant to the hill. Select deep, rich soil, and cultivate as Cabbage. Some of the varieties are very ornamental, and scattered singly are attractive in the flower garden, being finely curled and variegated with green, yellowish white, bright red and purple leaves. The tender leaves are used as Cabbage.

Carter's Thousand Head. (New.) See page 16.				25	10
Siberian, or German Greens. Sow in fall for use in spring.	85	1.00	30	15	6
Frisby's Crested. (New.)					15
Green Curled Tall Scotch. (New. See plate.) One of the best varieties.	85	1.00	40	20	10
Sea Kale. The young shoots when blanched are exceedingly delicate, being much superior to Broccoli.					10
Carter's Garnishing. Both ornamental and useful. The seed will produce many varieties of high colored plants.					15
Ornamental Kale, four elegant varieties. For ornament or the table.					15
Dwarf Green Curled. Very hardy; a standard market sort.	85	1.00	40	15	6
Cottager's. A new English variety.				20	6
Field Kale. For cattle. Can be cut several times during the season.				30	10
Abergeldie. A new dwarf variety, curled as fine as parsley; of delicate, mellow flavor.				30	10

KOHL RABI, or TURNIP CABBAGE.

Prepare ground as for Cabbage, then plant about the first of June in rows two feet apart, thinning plants to twelve inches in the row. To preserve over winter treat as turnips. When young their flesh is tender and resembles a fine ruta бага with less of a turnip flavor. When fully matured they are excellent for stock.

Early White Vienna. A standard early kind.	2.35	2.50	75	30	4
---	------	------	----	----	---

1

3

4

5

6

The specimens of corn are not fancy sketches, but were all engraved from photographs which I had taken from specimens grown on my farms. No. 1, Marblehead Mammoth Sweet Corn; 2, Moore's Early Concord Corn; 3, Mexican Sweet Corn; 4, Crosby's Early Sweet Corn; 5, Early Narragansett Sweet Corn; 6, Pratt's Early Sweet Corn.

Improved Large
Yellow, or Cracker
Onion.

Boston Market Celery.

White Solid Celery.

Deep Scarlet Olive-Shaped
Radish

Beginning at the left hand, the smallest Cucumber is the Early Russian, then follow Short Green, Early Cluster (two specimens), White Improved Spine, Long Green and Improved Long Green Prickly.

Casaba Musk-melon.

Nutmeg Melon.

Chinese Rose Winter Radish.

Sill's Hybrid Musk-melon.

Russian Netted Cucumber.

Bell Pepper.

Crookneck Squash.

Drumhead Lettuce.

Egg Plant.

Cayenne Pepper.

Seeds per mail post-paid by me; per Express or Freight at purchaser's expense.

PRICES OF SEEDS.

KOHL RABI, or TURNIP CABBAGE.

Large Purple. Very large, hardy and productive; for stock.

LEEK.

Select good onion soil, manure liberally, and plant in April in drills made six or eight inches deep and eighteen inches apart, and thin to nine inches apart in the drill. Gradually draw the earth around the plants until the drills are filled level with the surface. Draw for use in October. To be used in soups or boiled as asparagus.

Large Musselburg.

Broad Scotch, or Flag. A large and strong plant; hardy; color deeper than Rouen.

Very Large Rouen. A new French variety; best of all for forcing.

Extra Large Carentan. (New.) A very fine extra large winter variety.

LETTUCE.

Lettuce covets a rich and rather moist soil. The rows should be about twelve inches apart and the plants thinned from eight to twelve inches apart for the heading varieties. When heads are not desired it may be grown in a mass. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth.

Green Fringed. (New.) See page 15.

Early Prize Head. (New.) See page 15.

Sugar Loaf. (New.) See engraving and description on page 2.

Deer Tongue. (New.) See page 17.

Red Besson. (New.) See page 17. This heads as well as Fottler's Cabbage.

Black-Seeded Simpson. (New.) See page 17. An improvement on the Simpson.

Emperor Frame Cabbage. (New.) See page 17.

Stone Head Golden Yellow. (New.) See page 17. I invite gardeners to test this for quality with the best variety they know, believing that this will bear the palm.

White Tennis Ball, or Boston Market. (White seed.) The variety so extensively grown by the Boston market-men during winter for marketing in February and March. A fine early sort—small heads, very hardy; used for winter culture.

Black Seeded Tennis Ball. Hardy, excellent for early crops; earlier than Silesia; large heads. My stocks of this and White Tennis Ball are from one of the first Boston market gardeners. A favorite in Boston market.

Early Curled Simpson. Resembles Silesia, but is more curled and not so early.

Early Curled Silesia. Very early; very tender and sweet—a popular variety for hot-beds and early out-door culture.

Early Butter Head. An excellent sort—a great favorite.

Drumhead. Very large; heads crisp and tender. A standard sort.

Hanson Lettuce. (See page 14.) Extremely popular.

True Boston Curled. The most elegant Lettuce of all. Quality good; very popular.

Satisfaction. New. (See page 17.) This variety heads first rate and remains a long time in head.

All-the-Year-Round. New. (See page 17.)

Large India. Resembles Drumhead but later; of fine quality.

Brown Genoa Cabbage. Medium size, round head stained with red. One of the best for summer or winter use.

Improved Spotted Cabbaging. A fine head variety; color green shaded with brown; quality first rate; one of the finest for the table.

Large Princess Head. A new, very fine German variety, which does finely in the United States.

Perpignan. Heads sometimes seven inches in diameter. One of the best summer varieties. Not inclined to go to seed.

French Imperial Cabbage. Large-headed; one of the best for family use, as it does not run quick to seed.

Versailles Cabbage. A fine summer variety; light green; makes large heads.

Bossin. A new French variety; large; late; color dark green.

Neapolitan Cabbage. A good summer variety.

Six Choice Varieties. Mixed in one package.

White Paris Cos. Best of all the Cos varieties.

Kingholm Cos. Stands the summer heat splendidly and heads without tying; makes fine large heads.

Green "Fat" Cabbage. A fine summer cabbage variety; dark green; does not run to seed early.

Victoria Cabbage. One of the best English cabbage varieties.

MARTYNIA

Plant on any rich, garden soil, two by three feet apart, leaving only one plant in a place. It produces an abundance of large, showy flowers, and the young pods, when sufficiently tender to be easily punctured by the nail, are used for pickles.

MELON.

Select warm and light soil—a poor light soil is better than a cold and rich one. Thoroughly work the soil, manure with guano, phosphate or a rich compost, having the hills six feet apart for the musk varieties, and eight or nine for water-melons. Do not excavate hills, but work the manure just under the surface, as the roots of all vines naturally seek warmth. Pinch the more vigorous vines from time to time, and work in guano or phosphate between the rows. Plant a dozen or more seeds in each hill, but do not leave over two plants. Sprinkle young plants liberally with plaster or air-slacked lime to protect from depredation of insects.

Musk Varieties.

Hackensack. (New.) See page 17.

Black Portugal. Very deeply ribbed; color greenish black; flesh thick, salmon color. See page 4.

Boston Pet. (New.) See page 17.

Valencia. (New.) See page 17.

Large Boston Nutmeg. (New.) (See page 17.)

Persian. (New.) See page 17.

Bay View. (New.) (See page 2.)

Chicago Nutmeg. (New.) See page 17.

Surprise. (New.) See page 17.

Log-of-wood. New. (See page 9.)

Algiers Cantaloupe. (New.) Allied to the Hardy Ridge but longer, nearly solid.

Christiana. (True.) Remarkable for early maturity.

Improved Cantaloupe. (New.) A very early, large round sort; first-rate for market.

Hardy Ridge. (New.) (See page 8.) A remarkably thick fleshed melon, of good quality. A most vigorous grower.

Sill's Hybrid. (True.) Salmon-colored, flesh rich, sweet and delicious. (See page 17.)

Shaw's Golden Superb. Though small in size, superb in quality;—good for family use.

Skilman's Fine Netted. Of delicious flavor—early.

Early Nutmeg. Green-fleshed, highly scented; the Boston variety; is earlier than the Nutmeg grown further South.

Long Yellow. Large, sweet, productive; a well-known sort.

Green Citron. Green-fleshed; sweet, melting, and rich flavored.

Early Jenny Lind. An early sort; favorite with gardeners.

New White Japan. Flesh greenish white; early and prolific; sweet, delicious.

MELON.

Musk Varieties.

Pine Apple. Oval-shaped, rough-netted, thick-fleshed, juicy and sweet.
Casaba. (New.) A very large, long, green-fleshed melon, of delicate flavor, thick-fleshed, melting and delicious; has been grown to weigh 15 lbs. An acquisition.

Watermelon.

Iceing, or Ice Rind. (New.) See page 15.
Cuban Queen. (New.) See page 17.
Rattlesnake. (New.) See page 17.
Long Hill. (New.) See page 17.
Odella. (New.) See page 18.
Golden Fleshed. (New.) See page 18.
Excelsior. (New.) See page 5.
Ferry's Peerless. (New.) See page 5.
Vick's Early. (New.) See page 9.
Ice Cream, true, White Seeded. A very early melon of superior quality. Very popular.
Gipsy. Very large and very productive. The principal variety grown in New Jersey and sent to Northern markets.
Cream-Fleshed Sculptured-Seeded. (See page 12.) New; early, remarkably sweet, with seed singularly marked.
Mountain Sweet. An old standard variety; early, solid, sweet and delicious; one of the best for northern cultivation.
Mountain Sprout. Long, striped, scarlet flesh; an old standard sort.
Phinney's. For hardiness, vigor, and productiveness, unexcelled; early, very reliable, red-fleshed. (See page 17).
Citron. For preserves only; hardy and very productive.
New Orange. Improved in size—the rind will peel like an orange when fully ripe.

MUSTARD.

Sow in drills one foot apart, and cover seed half inch deep. Thrives readily in almost any soil. Water frequently in dry weather, and for a succession, sow every two weeks during the season. Used principally for salads.

Chinese. New. A fine sort.

White or Yellow. For salad or medicinal purposes.

1.10	1.25	40	20	10
45	60	20	10	6

NASTURTIUM.

Plant in May in rows; the climbing varieties to cover some arbor, or fence, or climb or twine around the house; the dwarf kind in hills or in rows two feet apart. The leaves are used for salad, and the seeds when soft enough to be easily penetrated by the nail, for pickles. If each plant of the dwarf variety is allowed room to perfect itself the plants grow very symmetrical.

Tall. An ornamental climber.

Dwarf.

1.10	1.25	40	15	6
1.35	1.50	50	20	6

OKRA, or GUMBO.

Select warm and rich soil and plant when the ground becomes warm, in rows two feet apart, thinning plants a foot apart in the row. The pods are used to thicken soups, being gathered when young. In the North they require the warmest locations and it is better to start them in a hot-bed.

Improved Early Dwarf. (New.) See page 18. package only

Early Dwarf. White, small and round; pods smooth.

Long Green. Later and more productive.

70	85	25	15	6
70	85	25	15	6

ONION.

(No discount on Onion seeds, except as noted on page 34.)

In some parts of the country the term "Silver Skin" denotes a white variety—in other parts a yellow variety. Please indicate in your order which you want. The soil should be rather light, and free from large stones. Apply from eight to twelve cords of rich, fine compost to the acre. Plough not over five inches deep, and work well with cultivator. Plough again at right angles with first furrows, and cultivate again. Now rake level and fine, and plant seed in rows fourteen inches apart at rate of four pounds to the acre. Keep very clean of weeds. When ripe, pull and dry very thoroughly before storing. For full particulars in every department for the cultivation of the Onion, see my work on "Onion Raising."

Egyptian, or Perennial Tree Onion. (New.) See page 15. Ready from middle of August. package only

Teneriffe or Bermuda. (New.) See page 15. package only

Carter's New Golden Queen. (New.) See page 18. package only

Philadelphia White. The best variety to grow sets from.

Southport Yellow Globe. (New.) See page 18.

New Queen. A new English white onion, the earliest of all varieties.

Early Flat Red. A capital sort where the seasons are short. A very quick grower.

Early Yellow Cracker. A decided improvement on Large Yellow, being much earlier; the kind for a short season.

Early Round Yellow Danvers. (True.) Large, round, profitable; 1,100 bushels have been raised from one acre.

Early Yellow Danvers. Not quite so round as mine, but reliable seed, though not my own growing.

Early Red Globe. One of the earliest and most productive and handsomest of all the red sorts.

Southport White Globe. Thick, globe-shaped, remarkably handsome. The favorite in the New York market.

White Portugal. Very early; mild flavored, not a good keeper.

Yellow Strasburgh, or Large Yellow. A late standard variety.

Southport Red Globe. A great cropper. Is late, would not advise to raise north of southern Connecticut.

Large Red Wethersfield. An old standard sort. Pleasant flavored, grows very large, keeps well; hardy.

Mammoth Tripoli. One of the largest of the giant foreign varieties; of mild flavor.

Nasbey's Mammoth. An Italian variety excelling in size and mild flavor.

Giant Rocca. A new Italian variety. Of the mammoth class.

Large Flat White Italian. A mild-flavored onion; grown from sets it attains to a very large size.

Marzajole. A silvery white-skinned variety, possessing the best qualities desirable for culinary purposes.

Potato Onions. The bulbs of these are planted.

Onion Sets. From these most of the early onions are raised.

Top Onions. I have a small quantity of sets of this variety.

PARSLEY.

Select rich soil and sow the seed in drills one foot apart, covering half inch deep. The seed is usually from fifteen to twenty-five days in vegetating. Thin plants to four inches apart when two inches high. The beauty of the plant may be increased by several successive transplantings. It is used principally for flavoring soups, &c., and for garnishing in its natural state.

Fern Leaved. (New.) (See page 18.)

Dwarf Curled. Finely curled; good for edging or table ornament.

Myatt's Garnishing. Double curled.

Dunnett's Selected. A new English sort.

Carter's Champion. (New.) Moss curled; elegant for garnishing.

Carter's Covent Garden Garnishing. Probably the best of its type.

PARSNIP.

Give the richest and deepest soil to the long varieties of Parsnip; the Turnip sort will grow well on shallow soil. Make the soil very fine, and plant the seed early in rows eighteen inches apart, thinning plants to five inches in the rows. The seed should be planted half inch deep. To keep well in the ground over winter, draw a little earth over the tops.

Sutton's Student. A good English variety

60	75	25	12	6
----	----	----	----	---

Seeds per mail post-paid by me ; per Express or Freight at purchaser's expense.

PRICES OF SEEDS.

PARSNIP.

Round Early, or Turnip. A new French sort ; excellent for shallow soil, shaped like a turnip.
Large Dutch. Large and sweet. A standard kind.
Hollow Crowned, or Guernsey. The hollow crowns are considered superior in quality to the other varieties.
Abbott's Improved Hollow Crowned. An improved English variety.
Maltese Parsnip. A new, long English variety.

PEAS. Of the numbers printed against the Peas, 1 indicates first early class ; 2, second early, and 3, late class. Those marked with a star (*) are wrinkled varieties, the sweetest of all ; but as they are liable to rot, need to be planted thicker than the round sorts.

Very Dwarf. These very low varieties require no sticking.

While the tall sort will run too much to vine if liberally manured (it being better to depend on the richness of land that has been previously in good cultivation) the dwarf varieties, on the contrary, will bear pretty liberal manuring. Have the dwarfs, that grow not over fifteen inches high, in rows two feet apart ; those varieties attaining the height of from two to three feet, in rows three feet apart ; and the rows of the tallest sorts, four feet apart.

3. Laxton's Superlative. (New.) (For description, see page 18.)	2.50		45	75	10
3. Dwarf Sugar. A string pea ; pods edible. My variety is of half dwarfish habit, with fine large pods.			45	75	15
3. Laxton's Supreme. Green marrow class, yields remarkably long and well-filled pods. A fine late family garden pea.			45	75	15
3. *Champion of England. An old favorite ; rich flavored and very productive. Four to five feet.	2.00	6.50	30	60	10
3. Black Eyed Marrowfat. An old favorite ; large podded ; prolific ; capital for market. Three to four feet.	70	2.25	25	55	10
2. Royal Dwarf Marrowfat. Not so tall as Large White Marrowfat ; earlier than Champion of England.	1.30	4.00	25	55	10
3. Large White Marrowfat. A standard late sort.	1.00	3.00	25	55	10

PEPPER.

Peppers should be started in a cold frame or hot-bed. Transplant the young plants into the open ground towards the close of May in a very warm location, having the rows eighteen inches apart ; thin plants a foot apart in the rows. The ground should be made very rich, either by high manuring before plants are transplanted, or by liberal application of guano, liquid manures afterward.

Large Field. Good for stock.			25	40	15 6

Seeds per mail post-paid by me ; per Express or Freight at purchaser's expense.

PRICES OF SEEDS.

PUMPKIN.

Sugar Pumpkin. Smaller than Large Field, but finer grained, sweeter and very prolific; first-rate for the table or stock Cheese. A variety popular in the Middle States. Cheese-shaped, resembling in character the Crookneck Squash....
Michigan Mammoth. A soft shelled variety, excellent for stock. It grows very large and is a heavy cropper....

RADISH.

For early use sow in spring, as soon as the ground can be worked, in drills six to ten inches apart, covering seed half inch deep. Thin plants an inch apart in the row. As the roots are more succulent and tender when grown quickly, a rich, light soil should be preferred, and frequently watering in dry weather will be found beneficial. For a succession, sow every two weeks. The Olive-shaped varieties are more tender, sweeter and earlier than the long kinds, and not so apt to be worm-eaten.

White Russian Winter. New. See engraving on page 12.....
Carter's Selected Long Scarlet. Sent out by Messrs. Carter & Co. as the best variety of Long Scarlet. Has proved a favorite among market gardeners around Boston.....
French Breakfast. French seed. A beautiful variety of the Olive radish, scarlet in the body and white at the extremity.
Wood's Fine Frame. French seed. Excellent for cultivation under glass; very early. A favorite with England market gardeners. In shape between Olive and Long.....
Covent Garden, or Long Scarlet short top. French seed. Considered the best of all the Long Scarlet varieties.....
London Particular Long Scarlet. Held in high esteem in London market; fine, long scarlet.....
Early Scarlet Olive-Shaped. French seed. Very early and handsome; quick growth, tender, excellent. A favorite.
Golden Yellow Summer Turnip. New. See page 18. Color very rich; very early.....
Early Rose Olive. Differs from Early Scarlet Olive in color only.....
Red Turnip-Rooted. French seed. A standard early, very popular in markets of New York.....
White Turnip-Rooted. French seed. For summer and winter use.....
Black Spanish. Round variety.....
Yellow Summer Turnip. French seed. An early and excellent summer variety.....
Chinese Rose Winter. The best for winter use. Grows large and tender.....
Raphanus Caudatus, or Rat-tailed Radish. Pods grow to a foot or more in length, and are edible. package only
California Mammoth White. (New.) A new winter sort, eight to twelve inches long, and two inches in diameter in the largest part. From the Chinese in California. An acquisition.....

RHUBARB.

For prices of roots, see page 33.
 Sow the seed in drills eighteen inches apart and cover one inch deep. Thin the plants to a foot apart. When the plants are one year old prepare the ground for the final bed by trenching two feet deep, mixing a liberal quantity of manure with the soil. Set plants five feet apart each way. Do not cut until the second year, and give a dressing of manure every fall. If it is desired at any time to increase the bed, the roots may be taken up in the spring and divided. The seed will not always give plants like the parent.

Linnæus. Large, tender, and of excellent flavor. A well-known market variety.....
Mammoth. The largest of all.....

SALSIFY, or VEGETABLE OYSTER.

Sow in early spring on light, rich soil, in drills fourteen inches apart and thin the plants to three inches in the row. The roots will be ready for use in October and will sustain no injury by being left in the ground during the winter. When cooked the flavor somewhat resembles the oyster.

SORREL. Large-Leaved French.

Sow in hot-bed early in the spring, and transplant to the open ground, on warm, mellow soil, when the ground has become warm, setting the plants in rows two feet apart and about sixteen inches apart in the row. As the seed is rather slow to germinate, it should be watered liberally in the hot-bed.

SPINACH. (Liberal quotations for Spinach in quantity upon application.)

For summer use sow early in spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil, and manure liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use, sow in August. The plants are sometimes protected through the winter by a thick covering of straw or some similar, light covering. Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose.

Long Standing. (New.) See page 2.....
Bloomsdale. (New.) See page 18.....
New Zealand. Makes a large plant and will endure drought; best quality. Thought to promise well as a forage plant
Prickly-Seeded. The hardest variety; thick-leaved—for fall sowing.....
Round-Leaved. The popular summer variety.....
Extra Large Round-Leaved. (New.).....

SQUASH.

All vines delight in warm and rich soil. Prepare the ground by thoroughly pulverizing. Manure at rate of six or eight cords to the acre, working it just under the surface with the cultivator or gang plough. Plant in hills nine to ten feet apart for running varieties, and five or six feet apart for bush sorts; work some rich, fine manure into each hill. Leave two plants to the hill. Keep well covered with plaster or air-slaked lime in early stages of growth. Cultivate frequently until runners are well started. For full particulars in every department, see my work "Squashes and How to Grow Them."

Perfect Gem. (New.) See engraving on page 9.....
White Early Bush. The earliest sort.....
Summer Crookneck. Early, fine for summer use.....
Golden Bush. A fine early summer sort.....
Boston Marrow. A standard fall squash; of a rich orange color, and very productive.....
American Turban. Decidedly the best of all fall squashes. (See page 13.).....
Essex Hybrid. New. See page 18.....
Marblehead. (New.) For full description, see page 8.....
Hubbard. A standard winter squash. (See page 13.).....
"The Butman." (Crops failed).....
Cocoanut. (See page 8.) A half-bush variety of small size, but remarkably heavy and very prolific; fine grained and of a very rich, chestnut-like flavor. This squash is worth raising as an ornament for the parlor.
Vegetable Marrow. The standard English squash; a fair summer variety with us; a heavy cropper; good for stock.
Yokohama. This squash has the flavor of the crookneck class, but is finer grained and much superior in quality.....
Mammoth Yellow. Has been grown to weigh from 100 to 300 pounds. See page 13.....
Canada Crookneck. The small, well-known, excellent kind.....
Large Winter Crookneck. The old standard sort, the best of keepers; cross grained.....

SUNFLOWER.

Sow thinly in drills three feet apart and thin two to three feet apart in the row.

Common......
Mammoth Russian. A fine variety. Valuable for poultry or vegetable oil. Flowers and seed very large.....

Seeds per mail post-paid by me; per Express or Freight at purchaser's expense.

PRICES OF SEEDS.

SWISS CHARD.

Plant and cultivate as Beets. The tops while young are boiled as greens and the center leaf cooked and served like asparagus.

Ornamental Varieties. The leaf veins are white or brilliant scarlet and yellow, highly ornamental. . . . package only
Common Chard 15 6

TOMATO. All but four of the varieties of Tomato seeds are of my own growing from carefully selected stock.

Sow the seeds in March or April in the hot-bed or in pots in a sunny exposure in the house. If it is desired to make very healthy, stocky plants, they may be transplanted or repotted when about two or three inches high. When five or six inches high, if the ground has become warm, transplant to the open ground, on a rainy or cloudy day if possible, if not, the young plants should be liberally watered and shaded from the hot sun. If it is desirable to have the fruit ripen as early as possible, in preference to a heavy crop, select rather light, poor soil, and a sunny location. Trimming off the laterals, training to a stake and propagating by slips, are believed by many to promote earliness. Set the plants four feet apart each way, upon mounds of earth, to allow the foliage to open and let the sun in amongst the fruit. A cheap trellis made by driving three stakes around the plants and encircling them with three or four barrel hoops makes a very nice support for training them on.

Tilden. First class on low, rich soil; of large size, thick-meated, smooth and of a high flavor.	3.85	4.00	1.30	40	5
Strawberry, or Ground Cherry. Excellent for preserves; will keep all winter.					10
Yellow Plum. Small, elegant. Nice for preserve.					10
Currant. Very elegant; resembles long bunches of currants; for ornament only.					10

TURNIP.

For early use sow the small sorts as soon as the ground can be worked in the spring, in drills fourteen inches apart—the Rutabagas thirty inches. As the seed is very fine it should be covered but slightly, excepting in very dry weather. Select light, if possible, new soil, and manure with plaster and ashes, or phosphates. Should the young plants be troubled with insects, a sprinkling of the same will be found beneficial. Of the early varieties thin the plants to six inches apart and the Rutabagas to one foot. For fall and winter use the early kinds should be sown from the middle of July to the middle of August, and the Rutabagas from the middle of June to the first of July, using from one to one and a half pounds of seed to the acre. Turnips are very extensively used as winter feed for cattle and sheep. "Swede" and "Rutabaga" being synonymous terms, the names below, given as they are generally used, will be readily understood. The English varieties are almost exclusively used for early planting for market

English Varieties.

Early Long White Vertus. (New.) See page 16.	95	1.10	40	20	10
Extra Early French. (New.) See page 16.	95	1.10	40	20	10
Nimble Six Weeks. (New.) See page 15.	95	1.10	40	20	10
Purple Top Globe. (New.) See page 18.	85	1.00	30	12	6
Montagny. (New.) See page 18.			50	25	10
Purple Top Munch. (New.) See page 2.	95	1.10	40	20	10
White Egg. (New.) (See page 6.) Large, handsome, early; keeps first-rate. per half pound, 60 cents.	85	1.00	40	15	10
Carter's Stone or Stubble. Almost as early as White Top or White Dutch, but much thicker; handsome.	60	75	25	10	6
Golden Stone. A fine, oblong, yellow-fleshed variety; very handsome; an acquisition.	60	75	25	10	6
Pomeranian White Globe. A very fine white globe variety; round and thick.	55	70	25	10	6
Early White Dutch, or Early Flat Dutch. Sharp leaves, small neck and top, color clear white, desirable.	55	70	25	10	6
Early Red (or Purple) Top Flat. Fine, sweet, mild, rapid grower; very early and popular.	65	80	25	10	6
Early White Top Flat. Differs from Red Top only in color.	65	80	25	10	6
Improved Yellow Globe. Fine for family use or for field culture. An excellent American variety.	60	75	25	10	6
Orange Jelly. A round, yellow English turnip of finer quality than Golden Ball.	60	75	25	10	6
Yellow Finland. Very elegant; less eaten by worms than most sorts.	60	75	25	10	6
Long White Cowhorn. Matures quickly, carrot shaped, fine grained and sweet.	60	75	25	10	6
White Tankard. One of the English varieties—in shape resembling a tankard. White-fleshed; a very heavy cropper.	60	75	25	10	6
Jersey Navet. A new English variety of white turnip; an underground turnip; early, very sweet.	85	1.00	30	10	6
Green Top Aberdeen. Round, yellow-fleshed and firm; a good keeper. This variety in earliness and for stock purposes is half way between the early varieties and the Rutabaga. It does not succeed in all localities.	60	75	25	10	6

Seeds per mail post-paid by me; per Express or Freight at purchaser's expense.

Prices for Red Clover, Lucerne, Timothy and Red Top in quantity given upon application.

HEDGE AND TREE SEEDS.

For Tree Seedlings, see next page.

Keep seed of Evergreens in dry sand until time of sowing. Sow these early in spring in well-prepared beds of sandy loam, covering to the depth of about the thickness of the seed, pressing the earth firmly over them. Water frequently but not much at a time. Keep down all grass and weeds, and the first season protect with brush or lath screens from the sun's rays. Transplant into nursery rows when two years old. Plant seed of deciduous trees early in spring in drills about two feet apart. The young plants will not require shading. Acorns, Chestnuts and Walnuts should be planted in autumn, in sand or moss, or be kept from shrivelling up over winter. Seeds of Locust, if not planted in autumn, require the action of frost on them. Seed of the American Elm may be planted as soon as they fall from the tree. The Berberry vegetates best when planted in autumn.

	per 100.	per 1,000.
Improved American Savoy	40	3.50
Stone Mason	40	3.50
Fottler's Improved Early Brunswick	40	3.50
Premium Flat Dutch	40	3.50

CAULIFLOWER. Out-door sown (ready in June).

	per 100.	per 1,000.
Early Paris	1.25	9.00
Extra Early Dwarf Erfurt	1.25	9.00

SMALL FRUITS. (Per Mail; or Express at purchaser's expense. No discount.)

STRAWBERRIES.

For hill culture plant 15 by 15 inches; for matted growth, plant rows three feet apart, and plants one foot apart in the row. This selection comprises the best of the standards, and the most promising of the newer varieties. I can supply in August potted plants of those marked with a * at 50 cents per doz., \$3.00 per 100, except Manchester, the price of which will be \$1.20 per doz.; \$8.00 per 100. Per express or freight at purchaser's expense.

*Manchester. New. Exceedingly productive on light soil; fine color.

*Bidwell. New. A Western sort of great promise.

Windsor Chief. New. A fine late variety.

Great American. Extremely large berries.

Crescent Seedling. Wonderfully productive; large.

*Sharpless. Vigorous grower; berries large.

*Triomphe De Grand. An old standard.

Mt. Vernon. Very late sort.

*Miner's Prolific. One of the best.

Jucunda. Fruit large and heavy.

*Monarch of West. This combines every good quality.

Wilson's Albany. The great market berry.

Black Defiance. Very early; deep scarlet fruit.

*Charles Downing. Very hardy and productive.

CURRENTS.

Currants do best on deep, strong, rich soil. Have bushes four feet apart each way. Cut back young shoots one-third

every year. To protect from currant worms dust with hellebore at time of blossoming, when dew is on, and repeat when fruit is about full grown.

Fay's Prolific. Says the introducer: "As compared with Cherry, it is equal in size, better in flavor, and far more prolific." 1-year vines; price, \$1.00.

Victoria. Red, very long bunches.

Cherry. Best, largest of the reds.

White Grape. The best white.

GOOSEBERRIES.

Plant three by four feet, in deep, rich soil, in as cool a location as possible. To protect from currant worms follow same instructions as given above for currants.

BLACKBERRIES.

Plant vines 6 by 6 and treat as with Raspberries with the exception that they should be cut back to four feet.

Wilson's Early. The largest and earliest, half hardy.

Kittatinny. Very large, exceedingly productive.

Snyder. Very hardy, enormously productive.

1.00	75	3.50
1.00	75	3.50
1.25	1.00	4.00

GRAPES. 1-year-old vines. Will send 2-year-old vines for half as much more.

Soil should be dry and warm. Plant 9 by 6. Cut back, after leaves fall, to two eyes. Cedar posts and wire for trellis.

Pocklington. Golden color, berries large, sweet red.

Lady Washington. Hardy, fruit of highest quality.

Duchess. White, hardy, early, fruit first-class.

Prentiss. Hardy, vigorous, flesh tender and sweet.

Jefferson. No out-door grape is more desirable.

Brighton. A red grape, nearly equals Delaware.

Moore's Early. Healthy, vigorous, remarkably early.

Diana. Pale red, tender, sweet, juicy.

Salem. Berry large, quality superb.

Concord. Standard for hardiness and productiveness.

Delaware. Unsurpassed for quality.

Agawam. Berry large, dark red, sweet, sprightly.

Wilder. Bunch and berries very large, quality No. 1.

SUPERIOR ONION SEED.

I am happy to state to my customers that my crop of Onion seed this season is so good a one that I hope to do what I have not been able to for years, fill all orders and not return thousands of dollars as I have had to some years. There is a good deal of seed sold of "Danvers Onion" that is a flattish variety, not the true "Round Danvers," for it is a fact of which my customers may not be aware that, if pure seed of the onion is planted in southern New England or west of New England, while the onions from this seed will be true, seed raised there from these onions will, in two years, give a flatter variety.

My stock of Onion Seed is raised with peculiar care, none but the very best onions being selected for seed stock, and from these I select carefully, by hand, my seed onions. In a careful test made this season of eleven different lots of Danvers onion seed sold in different parts of the United States, some of them claiming to be of the best strain, that of my own raising, growing side by side under precisely the same conditions, decidedly surpassed all others in earliness, uniformity of ripening and fineness. I have the best grounds for believing that not an ounce of seed is sent out from my establishment that is not perfectly reliable; and, exercising such care, I claim for it a quality superior to most of that in the market, which is raised either from very small refuse onions, from large coarse onions, or, again, from such onions as the seed grower chances to have on hand—either of which tends to produce poor onions. Owing to the high price of onion seed the past three years, an army of inexperienced growers have flooded the market this season with seed, much of which was raised from scullions and small onions used as pickles. No market gardener will use this poor unknown seed even as a gift; he cannot afford to.

Early Round Danvers Yellow Onion. The Danvers Onion excels in earliness, and commands in Boston market a readier sale and higher price than the Red sorts.

Early Flat Red. One of the very earliest; hardy and reliable. A capital sort for the extreme north where other sorts are too late to ripen well. In quality none is better.

Early Red Globe or Danvers Red. This ripens two or three weeks earlier than Red Wethersfield. Scullions are almost unknown with this onion when grown from most carefully selected seed stock, it being as reliable for bottoming well as Winnigstadt Cabbage is to make a head.

Southport Late Red Globe. Very popular in the markets of New York. It measures better and sells at a higher price than Red Wethersfield. It is quite late, and I do not recommend it for farmers who live north of southern Connecticut.

Southport Yellow Globe. In form and size like Southport Red and White Globe, differing from them in color only.

White Globe. As white and handsome as a newly-made snow-ball, sells at a higher price than other sorts. Too late to grow north of southern Connecticut. Should be dried in an airy and shady place.

The Early Cracker Onion is the earliest of all my Yellow sorts and an excellent kind to raise where the seasons are short.

PEDIGREE ONION SEED.

An observing, intelligent farmer claimed that earliness, reliability for bottoming, smallness of neck can be as thoroughly inbred in an onion, as capacity to transmit her good qualities can be inbred in a cow or in any class of animals. What is possible to attain to in this matter my customers find in my onion seed, as shown in the extracts from letters given below.

An axiom that every onion grower soon learns. "cheap onion seed is always dear."

THE SOUTH CAN RAISE ONIONS the same year of planting from the black seed. Please observe that several of the recommendations given below are from Southern States; and the onions were matured full-sized the first year from my black seed.

"I raised Onions, 4 1-2 inches in diameter, from seed bought of you."

HENRY R. DEYTER.

Palatine, Anderson Co., Texas.

"I raised Onions, from seed bought of you last year, measuring 4 3-4 inches in diameter, from black seed of the Early Red Globe variety."

East Liberty, Pa.

H. B. SNYDER.

"The Onion seed were superior to any I ever had. Where in the garden is economy so misdirected as in buying cheap onion seed?"

Mott's Corners, N. Y.

S. W. SEAMAN.

"I can get seed in my own neighborhood for two dollars per pound, but prefer yours at four dollars. The seed I got of you last year did well. From three pounds of seed I grew 430 bushels."

Perry, Ohio.

N. P. WATTS.

"I have bought Danvers Yellow Onion seed from you the last three years, and it has proved true to name every time. I could have bought onion seed last year for from one to two dollars per pound, but I was afraid of it. My experience is, good seed true to name is cheap at almost any price."

Oscego, N. Y.

HENRY SIVERS.

"I must say that all the seeds purchased of you did extra well, especially the Danvers Onion, which grew larger from the seed than any onion around here grew from the sets."

Phillipsburg, Warren Co., N. J.

JAMES MCGOWAN.

"From your Danvers Onion seed planted in February of last year, I grew specimens weighing over one pound each."

San Saba, Texas.

J. W. FLEMING.

"I have raised here from your Danvers Onion seed, bulbs averaging three inches in diameter, the first year from seed. Had as good success as I ever had in the best onion growing section of Vermont."

Rural Bower, Greenville Co., Va.

FRANK M. GAGE.

"The Early Cracker Onion seed I had of you last year did nicely for this part of the State. I raised some that were six inches in diameter, and I think they are just the sort to raise where the season is short as it is here."

Sedgewick, Me.

JAMES A. DODGE.

"I have bought seeds of you for 6 years, and had rather pay \$2 per lb. more for your own Onion seed than for any other kind."

Turner Mills, Iowa.

A. T. AYERS.

"I have had extra good luck with all the seeds I have received from you. Onions do remarkably well, your seed being the only seed from which we can raise good onions the first year."

Alhenepe, Wis.

J. M. L. PARKER.

IMPLEMENTS. See also third page of cover. (No Discount on Implements.)

By special arrangement I am enabled to ship directly from Chicago to any of my customers in the West Matthews' Seed Drill, Gem Cultivator and Ruhlman's Wheel Hoe at prices given below.

Matthews' Garden Seed Drill.

Greatly superior to any other drill I am acquainted with. It is tasty in appearance; simple in principle; may be operated with ease and rapidity; is thoroughly constructed throughout, and there are no parts subject to unusual wear.

The Agitator is an ingenious and effective device, without springs, cams, gears and belts, to get out of order. A simple contrivance gauges the deposit of the seed with mechanical accuracy to the depth required. Its adjustable markers answer the double purpose of markers and legs. Price in crate, per freight or express, at purchaser's expense, \$13.00. Sent at this price from Chicago, if desired.

Matthews' Combined Drill and Cultivator.

Those who prefer a Drill and Cultivator combined, something which is inexpensive and reliable, suitable chiefly in the cultivation of a small garden patch, will find the MATTHEWS' COMBINED DRILL AND CULTIVATOR exactly what they want. The above cut shows this drill with the cultivator attachment removed. When the cultivator attachment is affixed and

the coverer and roller are removed, it gives a Hand Cultivator. The change to either drill and cultivator is easily and quickly effected.

Full directions for use on the cover of each machine. Price, in crate, per freight, or express, at purchaser's expense, \$15.00.

Ruhlman's Improved Wheel Hoe.

This superior implement is especially adapted to the culture of all garden crops (particularly onions). I have placed the hoe in the hands of two of my foremen to give it a fair trial. Their report is very favorable. They lay especial stress on hard ground, where it takes hold of the weeds far better than the common wheel hoe, which is too apt to slide over them. I notice that several seedsmen and nurserymen have ordered from one to three for use on their own grounds after a trial of its merits.

It will do the work of six men with the hand hoe. Price, in crate, per freight or express, at purchaser's expense, \$5.50.

Clough's Adjustable Sieve.

"Universal" Sieve would have been a better name, for I find that it will do the work for which I before required twenty or more different sieves. Capital for cleaning all sorts of Seed, Beans, Peas, Grain, &c., &c. Price, per freight or express, at purchaser's expense, \$2.00.

Randolph's Hand Seed Sower.

A capital little hand seed sower, just what for years has been wanted by every one who plants a garden. It has holes adjusted for seed of various size, and has an agitator to prevent clogging under any circumstances. Being made of metal, it cannot easily be broken, and its construction is so simple that it cannot readily get out of order. I use one on my own garden and like it well. Price, per express, at purchaser's expense, \$1.25; per mail, post-paid, \$1.50.

Excelsior Weeder.

A handy and efficient tool in the flower and vegetable garden to be used when weeds are small. By express, 30 cts.; mail, 40 cts.

Noyes' Hand Weeder.

This is an excellent little implement for hand weeding in bed sauce, such as onions, carrots and the like; it is especially valuable where the ground is hard or baked.

To test its value on my own grounds I sent for a couple and put them in the hands of two of my boys to try; they liked them so well I sent for a dozen, and we have had them in use for several years, to our great satisfaction. Price, by express, 35 cents each; mail, 45 cents.

Peerless Corn Sheller.

I first saw this neat, little implement at the New England

Fair and was struck with its ingenuity, simplicity and cheapness. By means of a peculiar mechanical movement it is adapted to the shelling of all kinds of corn, cleaning every kernel from the cob. It is made wholly of iron and will not clog; will shell from eight to ten bushels per hour. It weighs but thirteen pounds. Price, per freight or exp. at purchaser's expense, \$5.00.

ATOMIZER.

This is a valuable article for showing a fine spray of carbolic acid or solution of tobacco on the leaves of plants to destroy injurious insects. It is also used to diffuse perfumes and disinfectants in the sick room, and for inhaling various medicinal preparations. The metal parts are nickel-plated. Price, by mail, post-paid, 90 cents.

Glass Cutting and Glazing Tool.

Some of my workmen who use this implement find it cuts glass as readily as a glazier's diamond, and for all the purposes of cutting and setting glass is just about equally valuable, though it costs not one-twentieth as much. One I have had in use four years is now as good as ever. Sent, post-paid, for 30 cents.

Okra.

Salsify.

Early Paris Cauliflower.

Hercules Club Gourd.

West India Gherkin.

Green Curled Tall
Scotch Kale.

London Green Curled Endive.

Laing's Swede Turnip.

Brussels Sprouts.

Turnip Rooted Celery.

Beginning at the left hand, the smallest carrot is the Scarlet Horn, then follow Short Horn, Long Orange, White Belgian, Altringham, and Improved Long Orange, in their order.

Round Early Parsnip.

Kohl Rabi.

Dwarf Curled Green Kale.

The above Tomatoes I have had engraved from photographs taken from specimens grown on my own grounds. No. 1 is the Mammoth Chihuahua; No. 2, Trophy; No. 3, Essex Early; No. 4, Tilden; No. 5, Canada Victor; No. 8, Boston Market; No. 9, General Grant; No. 12, Orangefield.

Choice Varieties of Flower Seeds.

Divided into Annuals, Biennials and Perennials.

For the convenience of my customers I have divided my list of Flowers into Annuals, Biennials and Perennials. I have aimed to include in my collection of Flower Seed standard varieties, with the addition of such kinds as have proved a real acquisition in floriculture. Many varieties that are usually advertised separately, I have thought best to include in a single package under the name of "mixed varieties." My three warrants I also throw around my flower seed, for it is my design that they shall be equally reliable with my vegetable seed. Let me remind my friends that flower seed, being for the most part very small in size, require extra precaution in the preparation of the soil, depth of planting, and protection from extremes of cold and wet. Do not, as a rule, plant in the open ground before the weather has become settled; better wait until the middle of May. Before planting, the soil should be made very fine and be well enriched. Then, seed the size of sweet peas may be planted one and a half to two inches deep, and the very smallest seed should be planted barely under the surface, having fine earth sifted over them and slightly packed with the hand or a strip of board pressed upon it. It will keep the moisture in and facilitate vegetation if a newspaper is spread over the surface, after planting, and kept down with stones for two or three days. Thin out the plants when very small with a bold hand, and after they have attained to the height of two inches, thin again boldly. Give each plant plenty of room, according to its habit of growth; a very common mistake is to crowd too much. Special rates when large amounts are ordered by Clubs. Terms to Dealers on application.

New Varieties of Flowers for 1883.

Offered This Season for the First Time.

Acroclinium Roseum. (New Double.)

For bouquets or wreaths nothing more beautiful in the way of Everlasting Flowers has been introduced. The bright, double, rose colored flowers are larger than those of the single sort and are very elegant.....Per package, 25

Browallia. Dwarf. (Blue.)

This variety grows only half as high as its parent and in such fine symmetry as to have the appearance of being shaped with scissors. A bed of these in full bloom looks like a blue carpet...Per package 15

Three-Colored Celeriac.

Of Ornamental-foliaged Plants in Europe this is admired as one of the most beautiful. The leaves of a deep, glossy green are richly and most elegantly streaked with a silver grey hue in the centre, and are bordered with a broad, creamy-white edging.

Beautiful for the decoration of meats.....Per package, 15

Godetia. "Bijou."

This new Godetia differs from the others which I offer. Its flowers are of the finest white with a bright rose-colored spot at the base of each petal. The plant is very dwarf, not exceeding 5 or 6 inches in height and forms a dense bush 12 to 14 inches in diameter, which is covered with 250 to 300 flowers. It is indeed a jewel among Godetias.....Per package, 25

Lobelia. "White Gem."

Dwarf and dense. So completely studded with pure white flowers as to have the effect of a solid white globe. Well adapted to appease the hunger of gardeners for a first-class white flowering plant for marginal beds.....Per package, 25

Mignonetto. "Golden Queen."

A remarkably distinct, yellow-flowered variety far ahead of any of this class. The habit is dwarf, sturdy and compact, with flowers closely set to form a good head. The spikes have more yellow in them than the yellowest of the yellow sorts. A tip-top market sort.....Per package, 20

Nasturtium. "Empress of India."

A new dwarf variety. The plant grows very compact and bushy and completely covers itself with flowers of such intensity of color as to be dazzling to look upon. Flowers are also peculiarly rich and velvety. Carter, the famous seed grower of England, says, "The Empress of India Nasturtium will rank far ahead of any variety that has previously been known".....Per package, 25

Pansies.

Azure Blue, very fine.....Per package, 15
Bronze-Colored.....Per package, 15
Gold-Margined, very odd and fine.....Per package, 15
Havana Brown, new shade.....Per package, 15
Mahogany Colored.....Per package, 15
Violet margined with White.....Per package, 15

Papaver. "Danebrog."

A new single flowering Poppy of very striking effect. The flowers are of a brilliant scarlet color bearing on each of the four petals a large silvery white spot, forming thus a white cross on scarlet ground similar to the Danish or Swiss national banners. Very desirable and showy.....Per package, 25

Petunia. (Double.) "Brilliant Rose."

This is recommended by Haage & Schmidt, the celebrated German florists, as the most brilliant of all double flowering Petunias. It is of lovely color and always constant in character. A first-class novelty.....Per package, 30

Phlox Drummondii, Grandiflora Aureo-stellata.

Very large-flowering, bright coppery-rose, with a large yellow star extending to the middle of the petals. A very striking color...Per package 20

ALSO OTHER NEW AND DESIRABLE FLOWERS.

Ammobium Alatum Grandiflorum.

After long years of trouble and careful culture, this almost indispensable Everlasting flower has been much improved and we offer now a very large flowering variety. Besides the large size, the splendid pure white color of the flowers is very remarkable.....Per package, 20

Aster, Dwarf. Brilliant-rose.

Quite a new and striking hue, wanting till now in the tribe of Dwarf Asters and very vivid. Because of its dwarf, compact habit, well adapted for carpet gardening.....Per package, 15

Clarkia, Double Carmine.

A splendid variety of this annual, with large, densely double flowers of a bright carmine color.....Per package, 15

"Fireball," Everlasting Flower.

A beautiful, new "Everlasting." The color of the flowers are of the richest crimson-maroon, a bright and pleasing contrast to the ordinary chocolate-red everlasting flowers. Invaluable as an everlasting.....Per package, 20

Forget-me-not, Alpine, Large-flowered.

The flowers of this new variety exceed by far in size those of any other Alpine Forget-me-not. They are of a sky-blue in color, with a clearly defined yellow eye. The plant in form is like a candelabrum. A great acquisition for those who grow flowers for market.....Per package, 20

Linaria Maroccana, Mixed.

Charming plants one foot high with slender upright branches. The flowers vary from *rose to red* and from *lilac to violet*, the inferior petal is generally white. Vilmorin, the eminent European authority, from which we imported this seed, recommends it highly.....Per package, 25

Gaillardia, Double.

This striking and beautiful novelty constitutes an introduction of great importance and one which will prove of lasting merit. It will become popular in the Horticultural world as a "Double Gaillardia" although the blooms are not double in the strict botanical sense. The effect however is the same. I offer a splendid mixture of *sulphur yellow, golden yellow, orange, amaranth and claret*. The bloom being borne on long stems will be found very valuable for bouquets.....Per package, 25

Calendula Meteor.

The handsomest variety of the Pot Marigolds, Cream white, center edged with orange, perfectly double.....Per package, 10

Larkspur Double Carmine.

This Larkspur surpasses in beauty the colors that have been obtained till now. It is of a *fiery carmine* and hence produces brilliant effects.....Per package, 15

Pansy, "Lord Beaconsfield."

"This highly effective and singularly beautiful Pansy, cannot fail to speedily become one of the most popular of the Pansies," says Benary, the famous German grower of choice flowers. The color of the flower is purple-violet, shading off in the top petals to a whitish hue, giving the flower an unusually bright and striking appearance.....Per package, 20

Phlox Drummondii, Globosa Rosea.

Every amateur will be impressed by the beauty of this new Phlox. It has a compact, symmetrically globular habit and every plant is covered all over with fine, large, sparkling, light rose flowers. A very valuable plant.....Per package, 15

ANNUALS, OR PLANTS THAT BLOOM THE FIRST YEAR AND THEN PERISH.

No.	ANNUALS.	Price per Pk'ge	No.	ANNUALS.	Price per Pk'ge
1	Abronia Umbellata. (See Plate.)..... Handsome, trailing plants, with clusters of sweet-scented flowers resembling the Verbena. Fine for baskets or for the garden. Sow seed under glass and set the plants eighteen inches apart. Bloom from August until October.	10	12	Amaranthus Tricolor. (Joseph's Coat.) Leaves scarlet, yellow and green; beautiful.....	5
	Acroclinium. The most beautiful of the everlasting flowers. For winter bouquets, cut as soon as they begin to expand. In a garden of more than two hundred varieties of flowers planted at the same time, this was the first to bloom. Half-hardy.		13	Ammobium Alatum. A very desirable white Everlasting Flower. Showy for the border and makes very pretty dried flowers. Hardy;	5
2	Acroclinium Atrorseum. Very large, of a dark rose color.....	5	14	— —, Grandiflorum. (New. See page 41).....	20
3	—, Roseum. Bright Rose.....	5	15	Anagallis, Mixed. Beautiful trailing hardy annuals about six inches high, and very desirable for small beds, edging, baskets, &c.	5
4	—, Alba. Pure White.....	5	16	Asperula Azurea. This is a new flower, of recent introduction. A profuse-flowering, hardy annual of Dwarf habit, with fine foliage and deliciously fragrant, bright sky-blue flowers; continues in bloom till frost. Well adapted for shady places.	5
5	Adonis Flower. A hardy plant with very pretty foliage, producing bright red flowers. Set plants one foot apart. Grows about one foot high and blooms for a long time.	5		Aster. Very beautiful and popular hardy annuals, growing from ten to eighteen inches high. For profusion of flowers and richness of display, the Asters are unrivaled. Sow the seed early in the spring under glass or in pots in the house, and transplant into rich soil, about one foot apart.	
6	Ageratum, Mixed. Suitable for beds and especially nice for cutting. Grows about one foot high, and continues in bloom all summer. Set six inches apart.	5	17	Aster, New Brilliant Vermilion. Very dazzling in color. The habit of the plant is beautifully bushy and compact, peculiar to the Victoria Asters, of which this is one. The flowers are densely double and of blameless forms. Very desirable.....	20
7	Agrostemma, Mixed. Very pretty, free-blooming, hardy plants, growing about one foot high, making a showy bed and fine for cutting. Can be easily transplanted, and should be set five or six inches apart.	5	18	—, Truffaut's Fiery Scarlet. A new very dazzling color, not yet existing among the tall varieties..	20
	Alyssum. Very fragrant, free-flowering, pretty plants for beds, edging or rock-work. Much used for bouquets on account of their delicate, honey-like fragrance.		19	—, Dwarf. Brilliant-rose. (New. See page 41)....	15
8	Alyssum, Sweet. White, very sweet, and blooms freely all summer. Hardy.....	5	20	—, Coppery Scarlet, Dwarf Chrysantha-flowered. New. (Very fine.).....	15
	Amaranthus. Ornamental foliated plants producing a striking effect as centres of flower-beds or mixed in with flowers. They are most brilliant on poor soil. Half-hardy.		21	—, Dwarf Turban. New. Very dark nearly black foliage. Flowers very handsome carmine mixed with white.....	15
9	Amaranthus Bicolor Ruber. Very fine; the lower half of a leaf a fiery red scarlet, the upper half maroon. It is sometimes tipped with yellow; said to be unsurpassed by any ornamental-leaved plant.....	5	22	—, Trophy. Mixed Varieties. As hardy as the old Globe Asters; profusely branched, forming fine self-supporting globular bushes, studded with beautiful symmetrically-formed flowers. The habit of the plant is extremely handsome, its height about twenty inches and perfectly constant. All the varieties are double, brilliant and true in color.....	10
10	—, Melancholicus. (See Plate.) Blood-red foliage of brilliant beauty when lighted by the sun. Fine for rib-boning or grouping. From Japan, one and a half feet.	5	23	—, Dwarf Fiery Scarlet. A variety, highly recommended for the brilliancy of its color, not before known among Asters. Dwarf and Symmetrical....	25
11	—, Salicifolius. This comparatively new annual is exceedingly beautiful, both in form and color. As a foliage plant it is one of the finest in cultivation. Plant of pyramidal form, two or more feet in height. Leaves long, narrow and wavy, changing in color from a bronzy green to a brilliant scarlet, as the plant attains age. From its graceful appearance, this is sometimes called "Fountain Plant.".....	10	24	—, "Prince of Novelties." This splendid novelty is strikingly distinct, and must prove a great acquisition. The outer ring of the flowers is of a bright crimson lake, the inner ring splashed irregularly with rose; center, pure white.....	25
			25	—, Dark Purple-red, Peony Flowered; magnificent.	20
			26	—, Black-Brown, Peony Flowered; very beautiful color.	20

No.	ANNUALS.	Price per Pk'ge	No.	ANNUALS.	Price per Pk'ge
27	Aster, "Goliath." An acquisition of extremely vigorous growth, forming large bushes from two to two and a half feet in height, <i>profusely</i> covered with flowers <i>immense</i> in size, measuring upwards of five inches in diameter, and very double. The seed which I offer is a fine mixture of <i>white, rose, dark, blue, ash grey and crimson</i>	20	51	Bocconia frutescens	15
28	—, Washington. <i>White.</i> Flowers very globular and extremely pure in color. Flowers extremely large....	20		Beautiful foliaged greenhouse plant, suitable for lawns in summer.	
29	—, Washington. <i>Peach-bloom.</i> Flowers immense, very globular and extremely delicate in tint. Seeds scarce.....	20		Browallia.	
30	—, "The Queen's Cockade." This gem differs in habit from any other kind of Aster. The plant is of robust growth with self-supporting habit, profusely branched, representing a perfect globe of great regularity, about one foot high, densely studded with extremely double flowers of a <i>bright deep satiny rose</i> , having a <i>well defined, pure white centre</i>	20	52	Browallia, Roezli, (New.)	10
31	—, "The Meteor." A beautiful novelty. The plant is completely studded with small, globular, extremely double flowers, <i>bright crimson</i> in color. <i>Extremely showy and brilliant.</i> Fine.....	15		A large-flowered bushy species with <i>azure-blue yellow-throated</i> flowers. Peculiar and elegant.	
32	—, German, Double Quilled and Striped. (See Plate.) Twenty splendid varieties mixed.....	10	53	—, Blue , with white centre. Very brilliant and beautiful, one and one-half feet.....	5
33	—, Globe Flowered, Double German. Twelve splendid varieties mixed.....	10	54	—, Mixed	5
34	—, Boltze's New Dwarf Bouquet. About eight inches high, are very double, rich and free-flowering; very fine for pots or beds. Six splendid varieties mixed....	10	55	Bryonopsis Laciniata	10
35	—, Truffaut's French Peony-Flowered Perfection. Very large and splendid. Perfect in form, size and fullness of flower. One of the very best of the Asters. Eighteen splendid varieties mixed.....	15		An elegant climber, with <i>Ivy-like foliage</i> and <i>brilliant scarlet fruit</i> exquisitely marked with white. Ten feet. Half-hardy.	
36	—, Pyramidal, Large and Double. These are similar in style to the Peony variety, but more branching, with splendid, large, extra, double flowers. Very showy. Sixteen varieties mixed.....	10		Callirhoe.	
37	—, Hedgehog (or Needle), with white centre. Six splendid varieties mixed.....	10	56	Beautiful hardy free-flowering plants, beginning to bloom when small and continuing throughout the summer and fall; excellent for beds or masses when sown thick.	
38	—, Giant Emperor. A tall, strong growing variety, with <i>immense</i> flowers. Flowers few, but very double and often four inches in diameter. Twelve fine varieties mixed.....	10		Callirhoe, Pedata. Rich <i>purple crimson</i> , with white eye, two feet.....	10
39	—, Dwarf Double. A very desirable variety, of a handsome, compactly branching, bouquet-like form; the best for dwarf groups. Several varieties mixed....	15	57	—, Involucrata. A trailing variety of great beauty; large <i>purple crimson</i> flowers; desirable for hanging-baskets.....	10
40	—, Dwarf Pompon Bouquet. A beautiful Aster with neat, pompon flowers. Many very fine varieties mixed.....	10	58	Canary Bird Flower	10
41	—, Above varieties mixed	15		A highly ornamental creeper, with exceedingly beautiful <i>yellow fringed</i> flowers and finely divided foliage; a general favorite. Half-hardy.	
42	Bachelor's Button. (<i>Centaurea</i> .).....	5		Candytuft.	
43	Balloon Vine	10	59	A well known hardy annual, very useful for bedding and bouquets, and also for pot culture.	
	Ornamental climbing plant, remarkable for an inflated membranous capsule (<i>white</i> in color), from which it derives the name of Balloon Vine. Suitable for the greenhouse or out-door decoration. Half-hardy.			Candytuft, New Carmine	15
	Balsams.		60	—, White	5
	Most magnificent, and popular half-hardy annuals, from one and one-half to two feet in height. Sow the seed early in frames, and transplant to a well-enriched border, one foot apart.		61	—, Purple	5
44	Balsams, Double Yellow. (New.).....	15	62	—, Crimson	5
45	—, Camelia-flowered, Carmine. (New.) Splendid new luminous color.....	20	63	—, Fragrant	5
46	—, Double Mixed Camelia-Flowered	10		Catch-fly.	
47	—, Spotted, Rose-Flowered, Mixed.	15		A hardy annual about one foot high:—produces brilliant flowers in great profusion in early summer.	
	Very large flowered, double and with perfectly formed flowers; from six to eight fine varieties, all spotted with white.....		64	Catch-fly, New Double, "Zulu King." Very striking and beautiful, of very compact habit; color <i>brilliant carmine</i>	15
48	—, Dwarf Camelia Mixed. From eight splendid double varieties; one-half foot.....	10	65	—, Red	5
49	Bartonia Aurea	5	66	—, White	5
	A showy, hardy annual, growing about two feet high, bearing very <i>brilliant yellow</i> flowers. Thin plants to six inches apart.			Centranthus.	
50	Beet, Dell's Ornamental Dwarf.	5		Exceedingly pretty, free-flowering plants, from six inches to one foot high, and very effective in beds or borders.	
	Leaves peculiarly rich in color; highly ornamental as a foliaged plant.		67	Centranthus, Rose	5
			68	—, White	5
				Chrysanthemums.	
				Handsome hardy annuals about two feet high, blooming from July to October.	
			69	Chrysanthemum, Lord Beaconsfield. New. Rich crimson maroon, <i>edged and striped</i> with gold.....	15
			70	—, Sultan. New. A beautiful velvety maroon, with golden rim and fine dark-brown centre. Very showy.	15
			71	—, Double White	5
			72	—, Double Yellow	5
			73	—, Mixed	5
				Cineraria.	
				A well-known greenhouse favorite. Remarkable for its free-flowering habit and beauty of foliage. May be had in bloom throughout the greater portion of the year.	
			74	Cineraria, Fine Mixed	25
				Clarkia.	
				A very pretty, hardy annual, about eighteen inches high—blooming from June to September. Set six inches apart.	
			75	Clarkia, Double Carmine. (New.) See page 41.....	15
			76	—, Rosea	5
			77	—, White	5
			78	—, Purple	5
			79	—, Mixed	5

No.	ANNUALS.	Price per Pk'ge	No.	ANNUALS.	Price per Pk'ge
80	Clianthus Dampieri. (<i>Glory Pea.</i>)..... One of the most attractive plants in cultivation. A shrubby climber, with neat foliage and drooping clusters of large, rich, scarlet, pea-shaped flowers, 3 inches in length. Each flower is beautifully marked with a black, cloud-like blotch. It requires a dry, warm soil and should be watered but sparingly. Remove to the house when cold weather comes.	25		Delphinium. Flowers remarkable for their great beauty, diversity of shades and striking appearance. Hardy.	
	Clitoria. Splendid, free-flowering, greenhouse climbers, with large, elegant, pea-shaped flowers. Particularly adapted for training on trellis-work, wire globes, &c.		103	Delphinium Candelabrum. (See Plate.) A new and elegant variety of <i>Larkspur</i> . The branches are beautifully curved, (pointing upwards,) diminishing in length as they approach the top of the centre spike, thus giving the plant the appearance of a candelabrum. Flowers brilliant and varied.....	10
81	Clitoria, Celestis. Sky-blue; from East Indies.....	10	104	Erysimum Peroffskianum. A very showy, hardy annual about eighteen inches high—bearing spikes of deep orange-colored blossoms. Blooms from June to September.	5
	Cobea Scandens. (See Plate.) A magnificent, climbing plant of rapid growth, producing large, bell-shaped flowers; adapted for outdoor growth in summer, also for the house and greenhouse. The seeds are apt to rot in the open ground, hence should be started in the house. Place the seed edgewise in planting.			Eschscholtzia. A very showy plant about one foot high, blooming from June until September. Produces a brilliant effect at a distance when grown in a mass. Hardy.	
82	Cobea Scandens. Purple.....	10	105	Eschscholtzia, Mandarin. New. This may, without much license to one's imagination, be called a scarlet <i>Eschscholtzia</i> . The inner side of the petals is of a rich orange color, the outside of a rich brilliant scarlet. Very showy.....	15
83	—, Alba. White flowered variety of that famous climber.	25	106	—, New Double White. This exquisite new variety of <i>Eschscholtzia</i> must succeed in winning many friends. Aside from its beauty, it is distinguished for the abundance of its flowers and the length of time which they live.....	25
	Cockscomb. Very singular and attractive hardy annuals, about two feet high.		107	—, Large Rose-Colored. The size of these flowers and the brilliant dark rose color, shading into pale rose at the base will keep this always as most a desirable variety of <i>Eschscholtzia</i>	15
84	Cockscomb, Japonica Alba. A new white Japanese variety. Said to be very fine.....	10	108	—, Yellow.	5
85	—, Cristata Variegata. New and beautiful. Gold and Crimson Variegated.....	10	109	—, White.	5
86	—, New Japan.	10	110	—, Tenuifolia.	5
87	—, Crimson. Tall, very fine (pure.).....	5	111	—, Mixed.	5
88	—, Dwarf Mixed. Very beautiful.....	10		Eternal Flower. (<i>Helichrysum.</i>) The Eternal Flowers are ornamental in the garden and very desirable for winter bouquets, as they retain their form and color for years if gathered and dried when first open.	
89	—, Feathered. New and very fine for bouquets.....	10	112	Eternal Flower, "Fireball." (New.) See page 41..	20
90	Coleus. (New and finest varieties Mixed.) (See Plate.) These gorgeous colored plants with their variegated foliage, are deservedly called the most popular plants in cultivation. Their leaf markings are rich and varied. No garden, basket, vase nor collection of flowers is complete without them. Start the seed in a hot-bed or pot in the house and transplant when warm weather comes.	35	113	—, Yellow.	5
91	Collinsia, Mixed. Beautiful, hardy annuals, very pretty when grown in a mass. Thin plants to three inches apart.	5	114	—, Mixed.	5
92	Collomia, Scarlet. A very pretty annual, producing heads of bright red flowers.	5	115	—, Gnaphalium Decurrens. A new species of <i>Everlasting Flower</i> . The plant forms a compact branching bush out of which rises numerous heads of white flowers in dense clusters, appearing profusely on the ends of the flower stems and of the many smaller side branches. It is a perennial and blooms the first year. The flowers being neat, showy and globular, are sure to become great favorites, and an extremely valuable acquisition.....	30
	Convolvulus. Beautiful and showy half hardy climbers, producing an abundance of rich colored flowers. Set plants one foot apart. Blooms from July until autumn.		116	Euphorbia, or Snow on the Mountain. A very pretty variegated, foliage plant, leaves edged with pure white. Tender.	5
93	Convolvulus, Minor, (Dwarf) Mixed.	5	117	Flax, Crimson. (<i>Linum Grandiflorum.</i>)..... A beautiful, half-hardy annual, one foot high and very effective and showy for bedding purposes.	5
94	—, —, Striped. Blue, beautifully striped with white...	5	118	Fuchsia, or "Ladies' Ear Drop." (Finest and newest varieties mixed.)..... Elegant flowering plants of easy culture in pots for parlor decoration or the garden. In the garden they require a slightly shaded situation. Soil should be rich.	35
95	Convolvulus, Major. (<i>Morning Glory.</i>) Fine varieties mixed. A well-known, beautiful, climbing annual, suitable for covering arbors, trellises, &c.....	5	119	Gaillardia, Mixed. (See Plate.)..... Hardy annuals, universally admired for their fine display. Grow about eighteen inches high, and bloom all summer.	5
	Coreopsis. (<i>Calliopsis.</i>) One of the most showy of all annuals, the colors being so striking as seldom to be passed without remark.		120	Gaillardia, Double. (New.) See page 41.....	25
96	Coreopsis, Drummonds. Large yellow flowers, with crimson centre.....	5		Gaura. An exceedingly handsome and free-flowering plant, continuing in bloom the whole summer. Of light and graceful habit, bearing spikes of white and red tinted flowers; a profuse bloomer. Succeeds best in sandy loam. Half-hardy.	
97	—, Mixed varieties. Yellow and brown and velvety-brown.....	5	121	Gaura, Lindheimeri. White with pink calyx.....	5
	Cosmea. These very showy annuals closely resemble <i>Coreopsis</i> and should be treated in like manner.		122	Geranium, Fancy, Splendid Mixed.	25
98	Cosmea Bipinata.	5		Gilia. Early and free-flowering, hardy annuals, growing from six inches to one foot high, and very desirable for planting in masses or detached patches.	
99	—, Purpurea.	5	123	Gilia, White.	5
100	Cosmidium, Burridge's. An elegant annual, growing about two feet high, with rich, brilliantly-colored flowers.	5			
	Cypress Vine. Most beautiful and popular tender climber, with very delicate fern-like foliage and numerous flowers.				
101	Cypress Vine, Scarlet. Very brilliant.....	5			
102	—, White.	5			

No.	ANNUALS.	Price per P'k'ge	No.	ANNUALS.	Price per p'k'ge
124	Gilia, Rose	5	145	Hibiscus Africanus	5
125	—, Tricolor	5		A showy and beautiful, hardy annual, eighteen inches high, blooming from June to September. Set eighteen inches apart.	
	Globe Amaranths. (See Plate.)		146	Hollyhock. Dwarf Chinese. Showy, hardy annual variety, two and a half feet high. Start early in hot-bed and transplant one foot apart.....	5
126	Globe Amaranth, White	5	147	Hyacinth Bean. (Dolichos.)	5
127	—, Purple	5		Tender, climbing annual from the East Indies, producing clusters of brilliant flowers.	
128	—, Variegated	5	148	Ice Plant. (See Plate.)	5
129	—, Mixed	5		A singular-looking, tender annual with thick, fleshy leaves, that have the appearance of being covered with crystals of ice.	
	Godetia.			Ipomea. (See Plate.)	
	Very attractive, hardy annuals of easy culture, about one foot high, flowering in July and August. Flowers of a beautiful satiny texture.			Very beautiful and popular climbers; deservedly so from the fine foliage and the brilliant and varied hues of its many flowers. Fine for covering old walls, stumps of trees, &c.	
130	Godetia, Lady Albemarle. Plants about one foot high, growing in a pyramidal form; flowers very large, and of the most intense glowing carmine color, the edges of the petals slightly suffused with delicate lilac. The flowers are produced in such wonderful profusion and are of such intense color that the plants have the most brilliant appearance. It is perfectly hardy, and if sown out of doors in autumn will bloom early in the following summer.....	10	149	Ipomea Atroviolacea, violet , bordered with <i>pure white</i> ; superb.....	10
131	—, Hybrida Splendens. <i>New.</i> This new variety of Godetia is pronounced by Platz, the German seed grower, as even an improvement upon "Lady Albemarle." Its splendid flowers of a <i>very bright carmine rose</i> , are <i>extremely large</i> and flamed white at the base. It surpasses other varieties of Godetia in remaining much longer in bloom.....	15	150	—, Bona Nox. (Evening Glory.)	10
132	—, Whitney's Brilliant. Of dwarf, compact habit, with large flowers of a brilliant carmine color, changing into tender rose at the margin of the petals.....	15		This very interesting plant is as its name indicates, allied to the "Morning Glory," but differs from it in choosing the evening for its time of blooming. It is also <i>deliciously fragrant</i> . The flower is pure white and very large. Soak the seed in lot water several hours before planting.	
133	—, Mixed	5	151	—, Coccinea. (Star Ipomea.) A beautiful, climbing, tender annual, closely allied to the Morning Glory, producing a profusion of <i>bright scarlet</i> flowers.....	5
	Grasses, Ornamental.		152	—, Limbata. <i>Blue</i> , elegantly marked with <i>white</i> ; superb.....	5
	The Ornamental Grasses are most desirable for bouquets both for summer and winter. For Winter use, cut about the time of flowering, tie up in small bunches and dry in the shade.		153	—, Elegantissima. One of the richest of the Ipomeas; <i>blue</i> with intense purple centre in the form of a star, with broad, pure white margin.....	10
134	Grasses Ornamental, Koeleria Berythea. (New.) An <i>extremely handsome</i> dwarf annual grass, very desirable for borders and bouquets.....	25	154	—, Nil Grandiflora. A very beautiful variety from Germany.....	5
135	—, Bromus Patulus Nanus. A new and very valuable <i>everlasting grass</i> . Extremely graceful and hence very desirable for winter bouquets.....	20		Jacobeas. (Senecio.)	
136	—, Eragrostis Brown, New. A valuable acquisition for winter bouquets for Florists and others. The panicles produce immense masses of flowers of a <i>reddish-brown</i> color and make a striking effect.....	10	155	Jacobeas, Double, White	10
137	—, Agrostis Nebulosa. The most delicate, fine and feathery of the Ornamental Grasses. Hardy.....	10	156	—, Double, Dark Blue	10
138	—, Eragrostis Elegans. ("Love Grass.") An exceedingly pretty and highly ornamental grass. Grows one to two feet. Hardy.....	5	157	—, Double, Mixed	10
139	—, "Job's Tears." This well-known variety of tropical grass is so called from the appearance of its shiny, pearly fruit, which resembles a falling tear. Half-hardy.....	5	158	Kale, Ornamental. Four elegant varieties. Very desirable as a foliage plant.....	5
140	—, Quaking Grass. This <i>graceful shaking grass</i> is very elegant in bouquets and may be dried and kept a long time; perfectly hardy.....	5		Larkspur.	
	Gypsophila.			Very beautiful, hardy annuals, producing dense spikes of flowers, which are very decorative either in the garden or when cut for vases. Set ten inches apart.	
	Elegant, free flowering, little plants, succeeding in any soil. Well adapted to rock-work and edging. Ladies will find this desirable for ornamenting their hair.		159	Larkspur, Dwarf Ranunculi-Flowered. New. The plant rises to a height of 12 to 13 inches and forms a columnar-shaped compact bouquet, thickly studded with spikes of shining brown violet blossoms of a uniform height. Very beautiful when grown in a mass.	15
141	Gypsophila Muralis. Beautiful, dwarf plant, completely covered with starry pink and white flowers. Very fine for hanging baskets.....	10	160	—, Double Carmine. (New.) See page 42.....	15
142	Hawkweed, Mixed. (Crepis.)	5	161	—, Tall Double Rocket	5
	A class of attractive hardy annuals, one foot high, of easy culture.		162	—, Stock-flowered. Eight varieties mixed.....	5
143	Heliotrope	10	163	—, Hyacinth-flowered. (See Plate.) A curious and very beautiful variety, strongly resembling a Double Hyacinth. Twelve fine varieties mixed.....	10
	Well-known, deliciously fragrant plants, excellent for bedding purposes or pot culture.		164	—, Tricolor Elegans. A very double variety of very handsome colors and most beautifully striped. Two and one-half feet.....	10
144	Helipterum Sanfordi	10		Leptosiphon. (See Plate.)	
	A new variety of everlasting flowers of great beauty; of dwarf, tufted habit, producing large, globular clusters of bright <i>golden yellow</i> flowers, excellent for winter bouquets.		165	The most desirable of plants for edgings; very beautiful with their numerous and many colored flowers; also suitable for rock-work, and nice for pot plants; succeed in any light, rich soil; from California. Hardy.	
				Leptosiphon Mixed. Colors <i>dark maroon, orange, lilac, purple, crimson, violet, golden yellow and white.</i> Exceedingly pretty.....	5

No.	ANNUALS.	Price per P'k'ge	No.	ANNUALS.	Price per P'k'ge
167	Linaria Maroccanna, Mixed. (New.) See page 42	25	186	Mignonette, Sweet. per ounce, 20 cents.	5
	Lobelia. Strikingly pretty, profuse - blooming plants; their delicate, drooping habit and the profusion of their charming little flowers render them exceedingly ornamental. Very fine for hanging-baskets. Hardy.		187	— Grandiflora. An improvement on the old variety in size.....	5
168	Lobelia Pumila Magnifica. (New.)..... This is by far the finest form of single Lobelia in cultivation. The habit of the plant resembles the fine foliaged Pumila variety, while the flowers are of immense size, and are of the richest ultramarine blue color.	25	188	— Victoria. New. Flowers unusually brilliant and large.....	20
169	—, Rosea Oculata. Rose, with white eye.....	10		Momordica. Trailing plants with ornamental foliage and golden yellow fruit which, when ripe, opens, disclosing its seeds and brilliant carmine interior. Planted on rock-work or stumps of trees and allowed to ramble, it produces a very striking effect. Half-hardy.	
170	—, Erinoides. Blue.....	5	189	Momordica Charentia, or Balsam Pear	5
171	—, Erinus, Mixed. Blue, white, and blue and white marbled.....	5	190	Morning Glory. (See Convolvulus Major.)	5
172	—, Double. New. This new product as a double Lobelia may be considered justly a great acquisition. Great preference can be given to it over the single varieties from its much longer duration of bloom....	25		Mourning Bride. (Scabiosa.) A class of very pretty annuals, from one to two feet high—suitable for bedding or bouquets. Hardy.	
	Lophospermum. An exceedingly elegant and highly ornamental climber with large and handsome foxglove-like flowers; very effective for conservatory and garden decoration, and also desirable for hanging-baskets. Half-hardy.		191	Mourning Bride, Golden. New. A fine novelty, growing in richly-branched bushes about a foot high with golden-yellow leaves and producing numerous scarlet and dark purple flowers, which contrast much with the golden-yellow foliage.....	15
178	Lophospermum Hendersonii. Flowers of rosy carmine, fine. Ten feet.....	15	192	—, Flesh-colored. New and lovely tint with very lovely flowers.....	15
174	Love-lies-bleeding. (Amaranthus Caudatus.)..... A hardy annual, three to four feet high, with pendant spikes of blood-red flowers, which at a little distance look like streams of blood. Desirable for grouping on lawns.	5	193	—, Mixed.	5
175	Love-in-a-mist. (Nigella.)..... A curious plant about one foot high, with finely-cut leaves and singular flowers. Hardy.	5	194	—, Double. Cherry color. An acquisition.....	10
	Malope. Handsome, half-hardy annuals, about two feet high. Set eighteen inches apart. Well adapted to mixed borders.		195	—, Dwarf. Six splendid varieties, mixed.....	5
176	Malope, Mixed.	5		Nasturtium. Nasturtium, Tall mixed.	5
177	Marvel of Peru, Mixed. (Mirabilis.)..... The old and well-known Four o'clock. A fine plant with flowers of various colors, making a fine summer hedge when set one foot apart. Grows two feet high. The roots may be preserved like Dahlias during the winter. Half-hardy.	5	196	—, Purplish-violet. (Tom Thumb.).....	10
	Marigold. (Tagetes.) Extremely showy, one to two feet high, well adapted to garden culture, blooming profusely through the season. Set one foot apart.		197	—, "Ruby King." Pure pink shaded with carmine....	10
178	Marigold, African.	5	198	—, "Spotted King." Bright yellow blotched with chocolate.....	10
179	—, Pot. (See Plate.) This variety of marigold is well worth much praise. The flowers are large, very brilliant and double; in color varying from a deep orange to a pale lemon and have a dark maroon centre. They begin blooming very early and continue till after the heavy frosts. They sow their own seed.....	5	199	—, Scheuerianum. Straw colored striped with brown.	5
180	—, French	5	200	—, Spit-fire. New. Very fine; bright fire-red. Flowers very freely and makes a strikingly showy appearance.	15
181	—, Gold-striped, new and fine.	5	201	—, Spit-fire Brown. (New.) A new variety of the favorite spit-fire, differing from it by the beautiful dark-brown color of its flowers.....	10
182	—, Calendula Meteor. (New. See page 42)....	10	202	—, Dunnett's New. Orange.....	5
	Maurandia. (See Plate.) An elegant, half-hardy climber, well adapted to the conservatory or trellis work in the garden. Start early in pots, transplant when the weather becomes warm. Flowers the first year from the seed and continues to bloom through the season. Desirable for hanging-baskets.		203	—, Atropurpurea. Dark blood crimson.....	5
183	Maurandia, Barclayana. Rich, violet flowers.....	5	204	—, Coccineum. Brilliant scarlet.....	5
184	—, Mixed. Violet, white, rose and pink.....	10	205	—, Dwarf Mixed.	5
	Mignonette. A general favorite on account of its delightful fragrance. Blooms throughout the season. Sow from middle of April to middle of June. Mignonette is most fragrant on poor soil.		206	—, Dwarf Scarlet.	5
185	Mignonette, Miles' Hybrid Spiral. This variety is far superior to any other in cultivation, the habit being dwarf and branching, with spikes often attaining a length of from 8 to 14 inches. By pinching the side shoots the centre spike attains a length of from 18 to 21 inches. The fragrance of this variety is superior to any other in cultivation. It is much hardier, and well adapted for market purposes.....	15	207	—, Rose.	5
			208	—, White. (The pearl.).....	5
			209	—, Yellow.	5
			210	—, King of Tom Thumb's. Deep scarlet blossom, bluish green foliage, new and fine.....	10
			211	Nemophila. (See Plate.) Charming, hardy, low annuals, producing an abundance of extremely delicate and beautiful flowers. Very useful for bedding or for pot culture. Sow early in pots and transplant into a cool, rather moist situation.	
			212	Nemophila Mixed	5
			213	Nolana, Mixed. (See Plate.) Very pretty, trailing hardy annuals, fine for rock-work, hanging-baskets, or for bedding. Select light rich soil.	5
			214	Oxlip, Sweet Scented, Mixed. Of beautiful colors.....	15
				Pansy. See Heartsease, in list of Biennials.	
				Parsley. I would recommend Curled Parsley as fine for edgings for the flower garden, fine for vase bouquets, and particularly desirable for flowers arranged in flat dishes.	
			215	Parsley, Dwarf Curled.	5
			216	—, Fern Leaved. A most beautiful thing. Invaluable as a decorative plant. Resembles a beautiful moss.	10
			217	Perilla Nankinensis.	5
			218	Phaseolus. (Scarlet Runner Bean.)..... A half-hardy annual, with beautiful dark purple foliage forming a delightful contrast with the lively green of the other plants in the garden or conservatory.	5
				A popular climber, with spikes of showy scarlet, white or variegated flowers. Extensively grown to cover arbors and to form screens; of very vigorous and rapid growth.	

No.	ANNUALS	Price per P'k'ge	No.	ANNUALS.	Price per P'k'ge
	Phlox.				
	A most brilliant and beautiful hardy annual, about one foot high, well adapted for bedding, making a dazzling show through the whole season. It succeeds well on almost any soil.				
219	Phlox Drummondii, Globosa Rosea, (New) See page 42.....	15	247	Salpiglossis, Mixed. (See Plate.)	10
220	—, Drummondii Grandiflora Striata Coccinea. A new scarlet striped Phlox of extra large size and hence a great improvement upon others.....	15		Salvia.	
221	—, Drummondii nana Compacta Punicea. This new dwarf growing Phlox is a first-class novelty. The striking brilliancy of its cinnabar-scarlet is unknown in Phlox till now. The plant forms globular bushes nearly covering itself with flowers; of great value both for pot and out-door culture.....	20	248	Salvia, Grandiflora Bicolor. (New.) The foliage is variegated with white, and the flowers are white and rose with scarlet tip.....	15
222	—, Alba Oculata Superba. New. Flowers in large umbels, pure white with fiery red eyes.....	10	249	—, Mixed.	5
223	—, Victoria. Flowers dark scarlet, more brilliant than "Fireball," very profuse in its flowers.....	15	250	—, Coccinea. Splendid scarlet.....	10
224	—, Heynholdii Alba. New. The flowers of this beautiful new variety are wholly snow-white. It is, indeed, the purest white Phlox yet raised, well adapted for pot culture.....	25		Sanvitalia. (See Plate.)	
225	—, Drummondii Grandiflora Splendens. (New.) Flowers large, handsomely rounded and of great substance; color vivid with a pure white disc; habit of growth free and robust.....	10	251	Sanvitalia, New, Double. Covered with dense masses of perfectly double flowers. This variety is considered by an experienced grower of rare flowers, as "without doubt the only dwarf, compact plant, of a yellow color, suited to beds and masses of low growth."	10
226	—, "Fireball." (New.) A splendid new dwarf variety. Grows in large robust bushes quite covered with brilliant-red flowers till late in autumn, giving the bush the appearance of a Fireball.....	20	252	Schizanthus, Mixed.	5
227	—, Pure White.	10		Scypanthus.	
228	—, Bright Scarlet.	10	253	A very ornamental, free-flowering climber, with curious yellow flowers, producing a fine effect trained against verandas, trellises, &c. Half-hardy.	
229	—, Crimson, striped with white, very beautiful.	10	254	Scypanthus, Elegans. Yellow, from Chili.	10
230	—, Splendid, red with white eye.	10		Sensitive Plant. (Mimosa Sensitiva.)	5
231	—, All Colors Mixed.	5		A pretty, curious plant, being so sensitive that the leaves close together by the slightest touch.	
	Pinks.			Stocks.	
	Most beautiful and highly prized, hardy plants, growing from one to two feet high. No garden is complete without them, as they keep up a brilliant display, almost the whole season. Start early in pots, and transplant six to ten inches apart.				
232	Pink, Carnation. (See list of Perennials.)	10	255	Stocks, New Perpetual Flowering, Double White. The introducer of this extremely desirable novelty, says: "This variety will produce fine spikes of double white flowers from January to December; the plants grow about 12 inches high, and if plenty of room is given, will grow three feet through, and produce thousands of bunches of bloom. If sown in the spring the plant will begin to flower in November and keep in bloom all winter and the following year, out of doors.....	25
233	—, Picotee. (See List of Perennials.)	20	256	—, Brompton's Salter's Scarlet. (See Biennials.) ..	20
234	—, Heddewig's. (See list of Biennials.)	10	257	—, Dwarf German. (Finest Mixed.)	10
235	—, Chinese. (See List of Biennials.)	5	258	—, Ten Weeks, Double Mixed. (See Plate.)	10
236	—, Laciniatus, Finest Double Mixed. Magnificent, double flowers; very large and beautifully fringed. Saved only from the finest double flowers and most beautiful colors.....	15	259	—, Dwarf, Large Flowering. One of the finest stocks in cultivation. Very double and of a rich dark crimson color.....	20
	Papaver. (Poppy.)			Sunflower. (Helianthus.)	
237	Papaver Umbrosum.	10	260	Well-known hardy annuals with large showy flowers.	
238	Very fine with flowers of a brilliant deep scarlet, marked with four large black spots.			Sunflower, Dwarf Double. Very ornamental, growing about four feet high and producing large double flowers.....	5
	—, Double Mixed. Brilliant and showy, about two feet high, fine for back ground or shrubbery.....	5	261	—, Variegated. Flowers and end of stock variegated.	10
	Portulacca.		262	—, Globosus. The finest of all sunflowers for ornament. The plant is middling-sized, flowers very large, completely double, of a bright golden yellow...	5
	Very popular, low-growing plants; making a most brilliant display in the garden, and very suitable for borders or edging. Sow early, in warm, light soil and thin plants to four inches. Hardy.		263	Swan River Daisy. (Brachycone.)	10
239	Portulacca, all colors Mixed.	5		Very pretty, free-flowering, dwarf-growing annuals, well adapted to edgings, rustic baskets, or for pot culture.	
240	—, Scarlet.	5		Sweet Sultan. (Centaurea.)	
241	—, Crimson.	5		Very showy, from one to two feet high, succeeding well in any soil.	
242	—, White.	5	264	Sweet Sultan, Mixed.	5
243	—, Yellow.	5	265	—, Yellow. Much may be said in praise of this the most beautiful of the Sweet Sultan family. The flowers are remarkably long-lived, which, with their beautiful fragrance and golden color, renders them very desirable for bouquets.....	5
244	—, Large flowered Double. (Benary's Best.)	20			
245	Ricinus Major. Castor Oil Plant.	5			
	A highly ornamental, half-hardy annual, growing from four to six feet high, presenting quite a tropical appearance. Select warm, dry soil, and plant six feet apart.				
	Rodanthe. (See Plate.)				
	A most beautiful and charming pink everlasting flower. The flowers, when gathered as soon as they are opened, are very desirable for winter bouquets, retaining their brilliancy for months. Half-hardy annual.				
246	Rodanthe, Maculata.	10

266	Sweet Clover. Valuable for its fragrance.....	5	278	Verbena, Fine Mixed.	10
	Sweet Peas. (<i>Lathyrus Odoratus</i> .)		279	—, Finest Mixed.	15
	Very ornamental, hardy annuals, desirable for their delightful fragrance and beauty. Fine for covering fences or walls, or for growing in little clumps supported by sticks. By picking off the pods as soon as they appear, the blossoms may be continued the whole season.			Virginian Pigmy Stock.	
267	Sweet Peas, White.	5	280	Virginian Stock, White. One-half foot.....	5
268	—, Black.	5	281	Virginia Stock, New Rose. One-quarter foot.....	5
269	—, Scarlet.	5	282	Viscaria, Mixed, or "Rose of Heaven."	5
270	—, Scarlet Striped with White.	5		Very pretty, profuse-flowering, half-hardy annuals, producing a fine effect in beds or mixed borders, and growing readily in any soil.	
271	—, All Colors Mixed. Per lb., \$1.00; per 1-4 lb., 30 cents; per ounce, 15 cents.....	5		Xeranthemum.	
272	Tassel Flower, Scarlet. (<i>Cacalia</i> .).....	5		Very showy, free-flowering everlasting flowers, valuable for winter bouquets. Hardy annuals.	
	Thunbergia. (See Plate.)		283	Xeranthemum Annum Superbissimum. Very showy and said to be the finest form of Xeranthemum yet obtained. The flowers are as double as those of Double Buttercup.....	10
273	Thunbergia Coccinea. New. A deep scarlet variety of this beautiful free-flowering climber.....	25	284	—, Double, White.	5
274	—, Mixed. Flowers white and salmon, with rich maroon centres.....	10	285	—, —, Purple.	5
275	Tropæolum, Mixed.	10		Zinnia. (Youth and Old Age.)	
	Very ornamental, and easily cultivated as climbers, producing an abundance of richly-colored flowers. These are selected from the finest English varieties. Half hardy.			A most splendid class of hardy annuals, succeeding well in any soil and making a very brilliant show. Start early in pots or under glass and transplant one foot apart. The same flowers will retain their beauty for weeks and a profusion will be produced until frost.	
276	Venus Looking-Glass, Mixed.	5	286	Zinnia, Tall. Finest varieties double mixed.....	10
	A very pretty, hardy annual, succeeding well in any soil. Grows about one foot high, and is well adapted to borders or edgings.		287	—, Double White.	15
	Verbenas.		288	—, Dwarf Double White. New. Very desirable from its regularity of growth and beautifully shaped flowers.....	20
	Well-known and universally popular bedding plants, blooming all summer. May be treated as half-hardy annuals. Sow the seed early under glass and transplant one foot apart. Tender perennials.		289	—, Haageana. Comparatively New; of dwarf, branching habit; each petal yellow flushed with orange. An exceedingly valuable plant for flower-beds, edgings or borders.....	10
277	Verbena Venosa. New. This does not much resemble the common Verbena. Grows about 18 inches high, branches freely and has dark-green serrated foliage. Should be sown in January and kept very moist till the seed germinate. It is a perpetual flowering plant. It does not mildew and is the proper size to contrast with most Geraniums.....		290	—, Double Sulphurea Striata. New. Sulphur colored, striped with scarlet. Very showy and beautiful when distinct in its colors.....	20

BIENNIALS, OR PLANTS WHICH LIVE AND GENERALLY BLOOM TWO YEARS.

No.	BIENNIALS.	Price per P'k'ge	No.	BIENNIALS.	Price per P'k'ge
	Alonsoa.		301	Heartsease, or Pansy. Pure White.	15
	Ornamental for bedding. Half hardy.		302	—, Lord Beaconsfield (New.) See page 42.....	20
291	Alonsoa Grandiflora, deep scarlet, two feet high.....	5	303	—, Fine Yellow, Large Flowered. The brilliancy and beauty of this Pansy make it a great favorite.	15
292	—, Warszewiezi, bright crimson, one and a half feet.		304	—, Finest Mixed. (very large stained.).....	25
	Canterbury Bells.		305	—, Odier, or Five Blotched. A new and beautiful Prize Pansy, of great variety of color and markings, each petal being most beautifully blotched or marked.	20
	Well known biennials, growing about one foot high.		306	—, Emperor William. One of the most valuable of the large growing pansies. Flowers of a rich ultramarine blue, with a well-defined eye.....	15
293	Canterbury Bells, Blue Single.	5	307	Honesty. (<i>Lunaria</i>), Blooms in May and June. The flowers are succeeded by singular seed-vessels that are quite ornamental and may be kept for a long time.	5
294	—, White Single.	5	308	Humea Elegans.	15
295	—, Double Mixed.	10		A magnificent, half-hardy biennial, four to eight feet high, blooming the second year through the summer and autumn.	
296	Foxglove, Mixed. (<i>Digitalis</i> .).....			Ipomopsis.	
	Very ornamental in the garden or amongst shrubbery, producing tall spikes of blue and white, bell-shaped flowers.			Most beautiful plants with spikes of dazzling flowers.	
	Heartsease, or Pansy. (See Plate.)		309	Ipomopsis, orange, from California; three feet.....	10
	A universal favorite; It blooms early the first season and produces a profusion of brilliant flowers from early spring until winter.		310	—, Elegans, scarlet.	10
297	Heartsease, or Pansy. International Paris. New. A superb strain comprising magnificent varieties. Selected as being the best of the numerous groups exhibited in the grounds of the Paris Exhibition....	30		Pinks.	
298	—, Fine Mixed.	5	311	Pink, Heddewig's Double Mixed. (See Plate.) Large flowers, three inches in diameter, of beautiful and rich colors, often finely marked and marbled.....	10
299	—, Extra Choice Mixed. These varieties are very superior.....	15	312	—, Chinese.	5
300	—, King of the Blacks. Deep Coal Black.....	20	313	Stock Brompton's Salter's Scarlet. A strong-growing biennial variety, combining well with the wallflower in the spring. Very brilliant in color.....	20

PERENNIALS, OR PLANTS WHICH LIVE MORE THAN TWO YEARS.

No.	PERENNIALS.	Price per P'k'ge	No.	PERENNIALS.	Price per P'k'ge
314	Aconitum. (<i>Monks-hood</i>)..... A hardy perennial, grows well in any good soil, even when in the shade.	5		Datura. (<i>Trumpet Flower</i> .) A showy, half-hardy perennial, producing large, sweet-scented, trumpet-shaped flowers. The roots should be removed to the cellar in autumn. Two and a half feet.	
315	Alyssum, Saxatile. <i>Yellow</i> , extremely showy.....	5	332	Datura, Wright's. Flowers bell-shaped, of extraordinary size, <i>white</i> bordered with <i>lilac</i> . Two feet.....	5
316	Aristolochia, Mixed Highly ornamental and attractive climbers, with curiously-shaped flowers of the most varied and beautiful colors. The flowers resemble a Dutchman's pipe.	15	333	—, Humilis Double. Double flowers of a rich, <i>golden yellow</i> , a magnificent, free-flowering, sweet-scented variety.....	10
317	Azalea. (<i>Finest varieties mixed</i>)..... One of the most ornamental of greenhouse shrubs and admirably adapted for a window plant. It flowers with great profusion. The roots being very fine, it requires a light soil. The seed which I send out, I have imported from Germany, from one of the most celebrated of growers.	25		Delphinium. Flowers remarkable for their great beauty, diversity of shades and striking appearance.	
318	Baptisia Australis A handsome plant of the easiest culture; flowers <i>blue</i> and <i>white</i> . Two feet.	5	334	Delphinium, Formosum. (See Plate.) Flowers remarkably large and brilliant; color exquisite <i>blue</i> and <i>white</i> ; will flower the first season from seed. Two feet.	10
319	Begonia Rex, Hybrids. (<i>Ornamental leaved plants</i> .) My stock of seed embraces about 30 of the most showy varieties obtained from one of the most celebrated seed growers in Europe and may be relied upon, producing an endless variety of these most elegant plants; extra fine quality.	25	335	—, Chinese. Mixed. Two and a half feet.....	5
320	Bellis Perennis. (<i>Double Daisy</i> .)..... A favorite perennial for the border or for pot culture. Set plants six inches apart.	10	336	—, Elatum. (<i>Bee Larkspur</i> .) <i>Blue</i> , two feet.....	5
	Calceolaria. Flowers highly decorative; very desirable, indeed invaluable, for the house, greenhouse and the garden. Seeds should be started in pots, but not under glass. Half-hardy.		337	—, Hybridum. Fine mixed, splendid.....	5
321	Calceolaria, Tigris. (See Plate.) A new spotted variety, <i>extra fine</i>	25		Dictanus. (<i>Fraxinella</i> .) Handsome, fragrant, free-flowering, herbaceous plants, suitable for mixed borders. The leaves have a very pleasant smell like lemon peel, when rubbed. The seeds frequently remain dormant for several months.	
322	Chelone Barbata A hardy perennial, about three feet high, bearing long spikes of scarlet bells. Flowers from July to September; of easy culture.	5	338	Fraxinella, Mixed. Two feet.....	5
	Cineraria. A well-known greenhouse perennial. Remarkable for its free-flowering habit and beauty of foliage. May be had in splendid bloom throughout the greater portion of the year.		339	Erythrina or Coral Tree This magnificent half-hardy shrub, with its fine leaves and most brilliant scarlet flowers is a great acquisition. The gorgeous spikes of scarlet flowers from one to two feet long with which it covers itself bear a resemblance to Coral. Although a tropical plant, it grows freely out of doors if placed in a warm situation. Cut it down to the ground before frost and protect in a cool, dry cellar during winter.	25
323	Cineraria, Maritima. Flowers <i>yellow</i> , leaves large and silvery; an ornamental foliaged plant, fit for edgings, in which case it should be kept from flowering. It forms a fine contrast, in ribboning, with <i>Perilla Nankinensis</i> . One and one-half feet.....	10	340	Eupatorium. (<i>Fraserii</i>)..... Shrubby plants whose flowers are indispensable for bouquets. The flowers are <i>white</i> , growing in graceful feathery sprays and are admirable for mixing in with bright colored flowers.	10
	Clematis. Beautiful, hardy climbers, unrivalled for covering arbors, fences, verandas, &c; will succeed in any good garden soil.			Feverfew. (<i>Matricaria</i> .) A beautiful, half-hardy perennial, well adapted for beds.	
324	Clematis, Cirrhosa. Perfectly hardy, a very rapid climber, literally covering itself with large bunches of <i>white</i> , sweet-scented flowers. Twenty-five feet.	20	341	Feverfew, Double White. Very fine. One foot.	5
325	—, Graveolens. New. A free-growing, hardy variety, with beautiful yellow flowers over one and one-half inches broad. Bloom from June until November.....	20	342	—, Golden Feather. One of the ornamental foliage plants. Very desirable for vases and baskets to mix with other plants.....	15
326	—, Pitcheri. New. Hardy variety of elegant habit, neat foliage and prettily-shaped brilliant scarlet flowers.....	20	343	Forget-me-not A very pretty, little, hardy perennial, about six inches high. Will thrive best in a cool, moist situation; and is well adapted for bedding or rock-work.	5
	Columbine. (See plate.) A well-known, showy, hardy perennial, about two feet high, blooming in May and June.		344	—, White New, pure white, true from seed.	10
327	Columbine, Aquilegia truncata. New. The California red variety, elegantly variegated with orange and yellow.....	15		Geum. Handsome, free-flowering, long-blooming and remarkably showy and hardy plants. Succeeds best in a sandy loam.	
328	—, Aquilegia Canadensis Nana. New. A beautiful dwarf, brilliant scarlet in color.....	15	345	Geum, Mixed	10
329	—, Mixed	5	346	Gloxinia, (grandiflora). A superb class of greenhouse and in-door plants, producing, in great profusion, elegant flowers of the richest and most beautiful colors. The variety I send out is very choice and is one of the new varieties, with vigorous foliage and very large flowers in the best and liveliest colors.	20
330	—, California. Very large and handsome, the color being of waxy yellow. Remarkably fine.....	25		Grasses Ornamental.	
331	Dahlia, Mixed Seeds saved from very fine named sorts mixed, from France. Half-hardy.	15	347	—, —, Isolepis Tenalla. One of the grasses which is a great favorite for baskets, vases, etc. Very graceful.....	25
			348	—, —, Pampas Grass. The most stately and magnificent ornamental grass in cultivation, producing numerous long, silken plumes of flowers. When planted on lawns the effect is very fine. Flowers the second season; requires to be carefully covered during the winter, as this is not quite hardy.....	15

No.	PERENNIALS.	Price per P'k'ge	No.	PERENNIALS.	Price per P'k'ge
	Gypsophila.				
349	Gypsophila Paniculata. Remarkably hardy, dwarf plant, covering itself with small white flowers. Very desirable from their tenacity of life. I have known a cluster of these flowers to live three days without water and without showing signs of wilting. <i>Ladies will find this very desirable for ornamenting their hair, also for button-hole bouquets.</i>	5	366	Oxalis, Tropaeoloides. Deep yellow flowers with brown leaves; a very interesting variety. One-half foot....	10
	Hollyhocks.		367	Passiflora Incarnata. This is the only <i>Passion-flower</i> yet introduced that will stand our climate, requiring but a slight protection of leaves in winter. The flowers are large, nearly white, with a triple purple and flesh colored crown.....	15
350	Hollyhocks, English Prize. Very highly recommended. The seed I have was saved from one of the finest collections in England, and is of twelve prize varieties.	15		Pentsemon.	
351	—, Tall Double Mixed. A great improvement on the old variety. Very effective amongst shrubbery.	5	368	Very ornamental with long and graceful spikes of richly colored tubular flowers. Seed should be started early in March and planted out in May.	
352	Lantana. (Fine varieties mixed.) (See Plate.)..... This showy, greenhouse plant will succeed finely in any garden soil. It forms a small bush, covering itself with pink, yellow and orange flowers, and also flowers of changeable color. Start in the house. Half-hardy.	15		Pentsemon, Choice varieties mixed	20
353	Lavender This herb I consider desirable for the flower garden from the pleasing fragrance of its leaves.	5		Petunia.	
354	Lupins, Mixed. Showy, hardy plants, two to three feet high, producing tall spikes of attractive flowers. Some species are annuals, but most of these are perennials.	5	369	Favorite, half hardy perennials succeeding well in any rich soil. For the brilliancy and variety of their colors, and the long duration of their blooming period, they are indispensable in any garden, and are also highly prized for growing in pots for the greenhouse or sitting room.	
	Lychnis.		370	Petunia, Grandiflora, Compacta. New.....	30
355	Very handsome and highly ornamental plants of easy culture.			—, Superbissima Nigra. Gorgeous dark red flowers, with large jet black throat. Very fine.....	25
356	Lychnis Fulgens. Bright scarlet, from Siberia. One and one-half feet.....	5	371	—, Superb Inimitable. Very robust in habit. Large rose-colored, white spotted flowers with large white, oftentimes yellow tinged throat.....	25
357	—, Sieboldi. White, fine; one and one-half feet.....	15	372	—, Hybrida Robusta Flore Pleno. New dwarf, robust variety, forming a compact, upright, branched bush with double and sometimes even double-fringed flowers in all shades of color existing in Petunias. An extremely handsome and valuable sort.....	40
	—, Hybrida, mixed. Beautiful, with large flowers varying in color from the brightest scarlet to blood-red, purple, orange and white.....	15	373	—, Hybrida Compacta Elegantissima. (New.) This variety forms a dense globular bush of about 10 to 13 inches in height, and 14 to 15 inches in diameter, covered thickly with flowers of all colors and shades, which are peculiar to the Petunias. As a bedding plant, especially in sunny spots, this sort is unsurpassable and very effective, and it can be further recommended as a window or market plant, on account of its very regular habit and abundance of well-shaped flowers.....	25
	Malva (or Mallow).		374	—, Vilmorin's Hybrid large flowering striped. This Petunia is especially remarkable for the rich colors and large size of the flowers, which are beautifully striped, variegated and spotted, petals nicely festooned lacinated on the borders.....	25
	Showy and desirable plants with pretty, salver-formed flowers.		375	—, Fringed. Brilliant crimson.....	25
358	Malva Minita. Very desirable with its bright scarlet flowers. It blooms freely all the season.....	5	376	—, Fringed. Satiny white, blotched with purplish crimson.....	25
	Mimulus. (Monkey Flower.)		377	—, Fringed and Veined. Rose veined with black. Extremely pretty.....	25
	A half-hardy plant of the easiest culture, about nine inches high, producing a profusion of very pretty flowers. It is perennial in the greenhouse and may be easily propagated by cuttings. Select a moist, rather shaded location.		378	—, Fringed. Largest flowered, mixed in great variety.....	25
359	Mimulus, Cardinalis. Scarlet, from California; one foot.....	5	379	—, Fine Mixed.	5
360	—, Hybridus. (See Plate.) New; splendidly spotted and marbled in the most varied manner, rivaling the Calceolaria in the variety of its brilliant colors.....	10	380	—, Extra Choice Mixed.	10
361	—, New Double. Spotted, a beautiful variety for pot culture. Flowers double, of a brilliant yellow, spotted, striped and mottled with crimson. This, aside from its beauty, is very desirable from its remaining in bloom much longer than the single sorts.....	20	381	—, Buchanan's Hybrids. (See plate.) From the finest named flowers; beautifully blotched, marbled and variegated. Flowers of extra size as well as beauty.....	15
362	Musk Plant. (<i>Mimulus moschatus.</i>)..... Much esteemed for the strong musk odor of its leaves. It has a yellow bloom.	5		Pinks.	
	Niremburgia.			Hardy perennials, growing from one to two feet high. No garden is complete without them, as they keep up a brilliant display, almost the whole season. Start early in pots, and transplant six to ten inches apart.	
	These charming little plants are exceedingly valuable for hanging-baskets, rustic vases and edgings.		382	Pink, Carnation, Double Mixed	10
363	Niremburgia, Large flowering. It deserves to become a general favorite both for the open garden in summer and the green house in winter.....	5	383	—, Picotee. Very beautiful, combining the most perfect form with the richest of colors. They have a delicate perfume, and bloom profusely. The seed I send out is from one of the highly renowned growers of Germany, and is of the choicest varieties mixed.	25
	Obeliscaria.		384	Polyanthus Mixed. (<i>Primula.</i>)..... Showy and profuse-flowering, hardy perennials—about one foot high, blooming in April and May.	10
	Showy plants with novel and rich colored flowers, having curious acorn-like centers. From Texas.		385	Primrose, Evening A well-known, showy perennial, one and a half feet high, blooming the first year from the seed.	5
364	Obeliscaria Pulcherrima. Fine, rich, velvety crimson edged and tipped with yellow. One-half foot.....	5		—, Hardy. (New.) A remarkably pretty and varied strain of these popular flowers, embracing a great variety of colors.....	20
	Oxalis.				
	A splendid class of plants suitable for hanging-pots or rustic baskets. Particularly adapted for the parlor where they bloom in midwinter. Half-hardy.				
365	Oxalis Rosea. Rose colored flowers, blooms abundantly. From Chili. One-half foot.....	10			

No.	PERENNIALS.	Price per P'k'ge	No.	PERENNIALS.	Price per P'k'ge
387	Primula Auricula. (<i>From Liege.</i>) (See Plate.) This is the most beautiful and desirable of primroses. The flower stalk is six to eight inches high and bears a fine truss or cluster of from five to seven flowers of various colors, each having a clear white or light colored eye. Finest varieties mixed from named flowers.	25		Sweet Williams. Well-known, beautiful, hardy perennials, about one foot high, making a most splendid appearance in May and June.	
388	Pyrethrum Roseum. The flowers of this are ga hered, dried and pulverized, and form the true "Persian Insect Powder," so much in demand.	10	394	Sweet Williams, Mixed.	5
389	Scrophularia Chrysantha. A perennial for decorating purposes, 1 1-2 to 2 feet high. It forms a splendid and regular pyramid. Leaves slightly curled and of a greyish green. The flowers are round, dark red tipped with yellow. They stand in clusters and are very striking in effect.	15	395	— — —, Double Mixed.	10
	Sedum. An exceedingly interesting and pretty little plant, growing freely on rock or rustic work, where, during the summer, it expands its brilliant, star-shaped flowers in the greatest profusion. It is very desirable for hanging baskets.		396	— — —, Auricula Eyed.	10
390	Sedum, Cœruleum. <i>Blue;</i> from Africa.....	10	397	Tritoma Uvaria, or Red Hot Poker Plant. (SEE PLATE.)	25
391	Smilax. There is no climbing plant in cultivation that surpasses this in beauty and grace of habit and foliage. When the Smilax turns yellow, it wants rest, it is not dying. Withhold water for six or eight weeks, repot it in good soil and it will again grow.	10	398	Umbilicus Sempervivum. (New.) From Kurdistan. A small unique form of sempervivum; the second year it throws up a large umbel of beautiful blood-red flowers; the whole plant changes then from green to red. A capital plant for carpet gardening. Its hardiness has not yet been tested, but probably it is hardy throughout the Middle States. Sow in boxes or pans, and plant out in the following summer.....	15
392	Snapdragon. (<i>Antirrhinum.</i>)..... Very showy, about two feet high, and flowering the first season. Sow the seed early, in pots or under glass, and transplant six inches apart.	5		Wallflowers. Very fragrant and ornamental, tender perennials, suitable for background and amongst shrubbery.	
393	Snapdragon, Majus Nanum Picturatum. <i>New.</i> A new and distinct race of Snapdragons.....	15	399	Wallflower, Harbinger. (New.) A very early flowering variety, which has produced flowers in October from seed sown in March. It is <i>very hardy</i> , and continues to produce a profusion of bright red flowers throughout the winter months.....	15
			400	— — —, Mixed.	4
			401	— — —, Double Mixed.	15

COLLECTION OF FLOWER SEEDS, BY MAIL, FREE OF POSTAGE.

For the convenience of these who prefer to leave the selection to us, we offer the following Collections. They contain new and desirable varieties, such as we recommend.

Persons thus purchasing can make a great display at a much less price than when ordering by separate packages.

These Collections are *always to be of our own selection* and not subject to any discount from prices given below.

COLLECTION A, contains twenty-five choice varieties of Annuals	\$1.00
COLLECTION B, contains twelve varieties of extra fine Annuals, including choice French Asters, Double Camelia Balsams, Double German Stocks, and fine Double Zinnias	1.00
COLLECTION C, contains ten extra choice varieties of Annuals and Perennials, embracing many most desirable ones	1.00
COLLECTION D, contains six packets of the finest Large Pansies, finest Carnation and Picotee Pinks, choicest Verbenas, Prize Petunias, &c.	1.00
I will send Collections A, B, C and D on receipt of \$3.00.	
COLLECTION E, contains fifty varieties of the best Annuals, Biennials and Perennials	2.50
COLLECTION F, contains one hundred varieties of Annuals, Biennials and Perennials, including new and desirable sorts	5.00
COLLECTION G, contains ten select varieties of Greenhouse seeds	2.00

Purchasers who prefer to make their own Selections of Flower Seeds are Referred to the Following Prices.

Purchasers remitting \$1.00 may select Seeds, <i>in packets</i> , at Catalogue prices amounting to	\$1.10
Purchasers remitting 2.00 may select Seeds, <i>in packets</i> , at Catalogue prices amounting to	2.25
Purchasers remitting 3.00 may select Seeds, <i>in packets</i> , at Catalogue prices amounting to	3.50
Purchasers remitting 4.00 may select Seeds, <i>in packets</i> , at Catalogue prices amounting to	4.75
Purchasers remitting 5.00 may select Seeds, <i>in packets</i> , at Catalogue prices amounting to	6.00

BULBS.

We offer below a selection of Bulbs such as are most desirable both for their beauty and adaptation to general culture. Unless otherwise specified we will send the bulbs out in October, *carefully keeping on file all orders received for them previous to that time.*

TUBEROSES. (Ready in April.)

I offer this season "The Pearl." It is more dwarf than the common variety and the flowers are larger.

In planting, remove the small offsets around the main root, and plant a single tuber in a pot five or six inches wide. They should be started in April and afterwards transplanted to the open ground for summer blooming in the garden. Use good loam and leaf mould, with good drainage.

First quality Bulbs. (Very fine.).....10 cents each; \$1.00 per dozen.

GLADIOLUS BULBS. Ready in April.

These showy flowers are very easily raised, and with their tall spikes and brilliant colors of almost every variety, simple and blended, make one of the most magnificent displays of the flower garden. By planting from May till July, a continuous succession of flowers will be secured. Plant in rows a foot apart, six inches apart in the row and two inches underground.

Beautiful French Hybrid varieties—Splendid Mixtures—including various shades and colors—per doz.....50
per 100 by exp., \$3.00

SPLENDID NAMED SORTS.

Addison, dark Amaranth with white stripes.....	30	Lieut. Stearns, bright orange, yellow throat, distinct.....	20
Anna, cherry, tinged with bright orange, lower petals striped dark carmine on white ground.....	30	Lord Byron, brilliant scarlet, blotched and flaked, with pure white, very showy.....	15
Antonius, very fine spike of light orange.....	10	Meteor, dark and very brilliant red, large pure white stains.....	15
Angulo, white, slightly flesh, light carmine blotched.....	15	Mayie Dumortier, white, slightly striped rose, purple spots.....	15
Arsinoc, fine spike, of large perfect flowers, rose, blazed with bright carmine.....	25	Mazeppa, orange red, striped white.....	15
Brenchleyensis, rich, dark scarlet, very brilliant.....	10	Meyerbeer, brilliant scarlet, flamed with vermillion, amaranth red blotch.....	20
Bernard de Jessien, violet ground striped with cherry and purple.....	15	Napoleon III., bright scarlet and white.....	10
Ceres, pure white, spotted with purple rose.....	20	Oscar, brilliant rosy lake with white blotch.....	20
Cleopatra, soft lilac, the lower petals of a darker hue.....	15	Penelope, white, slightly tinged pink.....	15
Conde, light orange red, white blotch, feathered carmine.....	25	Princess of Wales, white, flamed with rosy carmine.....	10
Eugene Scribe, large and fine flower; rose blazed with crimson.....	20	Proserpine, rosy white, marked with deep rose and crimson.....	25
Entendard, white, slightly flamed lilac or bluish violet.....	25	Reine Victoria, pure white, carmine-violet blotches.....	25
Fulton, velvety vermillion with purple stain.....	20	Romulus, intense dark red, blotched with pure white.....	15
Felician David, cherry-rose, striped carmine on white ground.....	15	Robert Fortune, orange lake shading to purple crimson.....	25
Galathea, bluish-white, carmine blotch.....	15	Stella, white—slightly tinted yellow, flamed carmine blotches on white ground.....	10
Greuze, intense cherry blotched with white.....	15	Thalia, white, flamed and streaked with carmine.....	25
Isaac Buchanan, the best yellow, very fine.....	30	Thunberg, cherry orange, pure white spots.....	15
James Carter, light red with white blotch.....	10	Van Dyck, crimson-amaranth, striped with white.....	25
John Bull, ivory white, tinted with yellow and lilac.....	10	Zenobia, rose, tinged with violet, and flamed with dark crimson.....	15
La Candeur, white, lightly striped with carmine-violet.....	30		
LePoussin, light red with large white throat; very fine.....	15		

TULIPS. (Plant in October and November.)

EARLY DWARF DUC VAN THOLL.

	Each.	Per doz.
Single Red, bordered with yellow.....	.10	\$1.00
Single Yellow, bright yellow.....	.15	1.50
Single Vermilion, very bright.....	.12	1.25
Single Gold Striped, rare, beautiful.....	.10	1.00
Double Scarlet, bright, yellow edge.....	.05	.50

SINGLE EARLY TULIPS.

Alida Maria, white and crimson.....	.10	1.00
Alba Regalis, white, fine.....	.10	1.00
Belle Alliance, bright scarlet.....	.07	.70
Bizar Prunkert, yellow and red, striped.....	.05	.50
Canary Bird, rich yellow, fine cup.....	.05	.50
Cardinalshald, brown.....	.10	1.00
Duc d'Orange, orange.....	.05	.50
Globe-de-Rigault, violet and white.....	.08	.80
Grootmeester, white, striped and feathered with scarlet.....	.08	.80
Lac Van Rijn, purple, white edge.....	.05	.50
Ma Plus Amiable, brown and yellow.....	.10	1.00
Marquis de Westrade, gold, yellow and red.....	.20	2.00
Potter, violet, large flower.....	.15	1.50
Princess of Austria, red, golden edge.....	.10	1.00
Rachel Ruys, rosy.....	.15	1.50
Rosa Mundi, white, bordered with rose.....	.05	.50
Thomas Moore, buff orange, shaded.....	.05	.50

DOUBLE TULIPS.

Admiral Kingsbergen, yellow, with bronze stripes..	.05	.50
Blauwe Vlag, purple blue, large.....	.05	.50
Comtesse de Pompadour, red, yellow edged.....	.05	.50
Duc de York, rose, white bordered.....	.05	.50

DOUBLE TULIPS.

	Each.	Per doz.
Gloria Solis, bronze, crimson border.....	.05	.50
Hercules, splendid striped cherry.....	.15	1.50
La Baroque, violet, white edged.....	.10	1.00
La Candeur, pure white, fine, early.....	.05	.50
Pæony Gold, red and yellow.....	.05	.50
Tournesol, scarlet, yellow margined, early.....	.10	1.00
Velvet Gem, brown velvet.....	.15	1.50
Yellow Rose, golden yellow, very double.....	.05	.50

PARROT TULIPS.

Admiral of Constantinople, orange and red striped.....	.05	.50
Mixed Sorts.....	.10	1.00
Monster Rouge.....	.10	1.00
Perfecta, red striped.....	.05	.50
Orange.....	.05	.50

OTHER SPECIES OF TULIPS.

Cornuta (Chinese), scarlet and yellow, very curious.....	.05	.50
Florentina Odorata, yellow, sweet scented.....	.10	1.00
Gesnerianna, bright scarlet, fine for bedding.....	.08	.80
Sun's Eye, red and black.....	.08	.80
Persica, orange yellow, dwarf.....	.08	.80
Viridiflora, green, with yellow margin.....	.05	.50

MIXED TULIPS.

	Per doz.	Per 100
Mixed Early Single, beautiful varieties.....	.40	\$2.75
Mixed Double, very fine.....	.40	2.75
Mixed Parrot Tulips, very showy.....	.40	2.75

MADEIRA, OR MIGNONETTE VINE. Ready in April.

A beautiful climbing plant of rapid growth, adapted to outdoor growth in the summer or the house in the winter. It completely covers itself with long racemes of deliciously fragrant white flowers. In the autumn cut off the tops, dig up the tubers and put them in the cellar, where they will keep as well as potatoes—or take up the bulbs and pot them for the house, where they will thrive to a wonderful extent. Tubers, each 10 cents; per dozen, 75 cents.

SCARLET ANEMONE. (New.)

This splendid variety is almost unknown in horticulture; no plant can compete with it in beauty and brilliancy in the early spring. Flowers large and of a dazzling Vermilion—in bloom from February to April—very valuable for bouquets. Plant bulbs in open ground in September—during winter give the plants protection with leaves. The root may remain in the ground for several years. Per bulb, 10 cents.

DOUBLE PERSIAN BUTTERCUPS (Ranunculus).

Splendid mixed varieties. Plant in November. Each, 5 cents; per dozen, 50 cents.

CROCUS.

The Crocus is a universal favorite, and, excepting the Snowdrop, is

the earliest of all spring flowers, displaying its bright blossoms early in March. Plant in November.

All Colors Mixed. Per doz., 15 cents; per 100, \$1.25.

SMILAX. (Ready in April.)

There is no climbing plant in cultivation that surpasses this in beauty and grace of habit and foliage. Its cultivation has now become a specialty in every greenhouse, where it is extensively employed in all descriptions of floral decorations. Good bulbs, 20 cents; large bulbs, 35 cents.

LILY OF THE VALLEY. (Ready in April.)

A great favorite because of its delicious fragrance and low growth, bearing graceful bows of fairy-like lily bells. Each, 5 cents; per doz., 50 cents.

CROWN IMPERIALS.

An old-fashioned class of plants, liked because of their highly ornamental character and early blooming. Plant in November. Mixed varieties. Each, 25 cents; per doz., \$3.00.

NARCISSUS.

Showy, spring-flowering bulbs, possessing a delightful fragrance.

Single Varieties Mixed. Per bulb, 5 cents; per doz., 50 cents.

Double Varieties Mixed. Per bulb, 10 cents; per doz., 1.00.

HYACINTHS (For Fall Planting.)

DOUBLE RED AND ROSE.

Alida Catherine, deep rose, very early.....	20
Bouquet Royale, bluish pink, red eye.....	25
Grootvorst, delicate blush, very double.....	20
Perruque Royale, rose, large bells.....	30
Princess Royal, rich crimson, extra.....	25

DOUBLE WHITE.

A la mode, pink-eyed, fine truss.....	20
La Deesse, white, yellow eye.....	25
Nannette, yellow center.....	20
Sceptre d'Or, white, orange scented.....	25
Sultan Achmit, large, very double, late.....	30

DOUBLE BLUE.

Belle Mode, bright blue, beautiful.....	25
Duchess de Normandy, dark blue.....	30
Pasquin, delicate porcelain, violet eye.....	25

DOUBLE YELLOW.

Bouquet d'Orange, reddish yellow.....	30
Goethe, bright, very double, fine.....	25
Ophir, d'Or, light yellow, fine, late.....	25

SINGLE RED.

Amy, bright carmine, compact truss.....	20
Emelina, bright rose, fine.....	25
Madame Hodshon, dark red, striped.....	20
Norma, delicate pink, large bells.....	20
Sultan's Favorite, rich bright rose.....	25

SINGLE BLUE.

Argus, deep blue, white eye.....	25
Blue Mourant, dark blue, black eye.....	20

Charles Dickens, bright blue, splendid.....	20
Grand Lilac, beautiful, silvery lilac, large.....	25
Regulus, porcelain, large truss.....	20

SINGLE WHITE.

Blanchard, white, purple eye.....	30
Hannah Moore, pure white.....	25
Mammoth, white, large bells.....	25
Queen of the Netherlands, splendid.....	25

SINGLE YELLOW.

Adonia, lemon yellow, good form.....	25
Aida Jacoba, rich, canary yellow.....	25
Heroine, light yellow, tipped with green.....	25
Rhinoceros, orange yellow.....	20
Victor Hugo, light orange yellow.....	30
Single Hyacinths, Mixed, 12 cents each; \$1.25 per dozen.	
Double " " 12 cents each; \$1.25 per dozen.	

JAPAN LILIES—(Plant in Spring.)

These superb lilies are perfectly hardy, flowers elegant and fragrant, flowering during July and August, and forming one of the principal features of the flower garden. Each. Per doz.

Lilium Album, pure white.....	.50	\$5.00
Lilium Roseum, White, spotted with rose.....	.25	2.50
Lilium Auratum, Golden-rayed Japan lily.....	.50	5.00

AMARYLLIS—(Red Jacobean Lily.)

This is always a favorite from the striking elegance of its scarlet velvet flowers. Start in the house in March and plant out in May in rich ground; roots are preserved like Dahlias during the winter. Each, 25 cts.

NEW VARIETIES OF POTATOES.

For Prices, See Page 56. (No Discount on Potatoes.)

For the New Seedling Peach Blow, see Second Page of Cover.

I would advise our customers at the South to order potatoes in the fall, as there is more or less danger of their being injured by frost if forwarded between December 1st and March 20th. While, therefore, I will guarantee in filling such orders to use my best judgment, all potatoes ordered to be forwarded between those dates must be at the risk of the purchaser.

Every season brings a new crowd of applicants for public favor, most of which I test with great care, side by side with standard sorts on my experimental grounds. Most of these prove to be inferior in some one or more essential respect to the standard kinds, others on the whole are no better, while here and there one stands out decidedly superior in some desirable characteristic. Among the various new sorts introduced this season, the varieties named below promise to be acquisitions.

EARLY GEM.

This new potato is about as early as Early Ohio, which it closely resembles in color size and shape, but is not quite so round. With me it surpassed Early Rose in yield. Eyes shallow and but few in number. Should advise all my customers to give it a trial.

WINSLOW'S SEEDLING.

This is a seedling of Early Rose. It closely resembles its parent in form and color, but is decidedly a better cropper. The vines are stouter and more vigorous than Early Rose, and the splendid crop found under them at digging time has made this new potato quite popular with our Marblehead farmers, who are largely engaged in growing early potatoes for Boston market.

WALL'S ORANGE.

This new seedling is one of great promise; the yield when planted on a large scale has been enormous; the quality is excellent. The vines which are very stout, have a remarkably dark green color of their own, and prove to be exceptionally hardy and vigorous, withstanding the attacks of the potato bug better than most sorts.

BROWNELL'S BEST.

A new seedling of Mr. Brownell. It is closely allied to Pride of America, in form and its general make up, being oblong in shape, with few eyes, and nearly smooth. Tubers of medium size. Under favorable circumstances it is an enormous cropper; 16 bushels are said to have been grown on fifteen rods of ground. Quality excellent; medium early.

WHITE STAR.

A cross between Excelsior and White Peach Blow. It bears a close resemblance to Burbank seedlings in form, color and yield. It is medium early and one of the best of keepers. It is very white in flesh, and, whether baked or boiled, is of fine floury texture. The vines are stocky and vigorous and the tuber large, uniform and handsome.

EARLY SUNRISE.

This new seedling closely resembles Early Ohio in shape and its general make up. It is remarkably early, a very heavy cropper, beating Early Rose decidedly in both earliness and yield on my grounds. The potato grows to a large size and taken all in all it is hard to beat.

EARLY OHIO.

THE EARLY OHIO has been generally accepted throughout the United States as the standard early potato. THE EARLY OHIO, while in color like the Early Rose, its parent, is, in shape, distinct, being round-oblong instead of oval-oblong, so that side by side it is readily distinguishable. Quality excellent. *It is a week earlier than Early Rose, while in many instances the yield is a third greater.* To get the best results, plant on rich, rather moist soil.

"The Early Ohio Potato I got from you proved to be the best of any I have cultivated. They have three good recommendations—earliness, superior quality and an excellent cropper."

R. F. SHILLING, *Rural Dale, Ohio.*

"Early Ohio is the earliest, handsomest and best early I have ever grown, after 15 years' observation and experience—growing few small ones, and making a first-class size for table use. They are dry and white when cooked. As an early market potato, it almost literally drives every other out of use. When Early Rose sold at 30 cents per bushel, parties would pay 50 cents for Early Ohio, and declare that they would rather do it than have the Early Rose at 25 cents. It keeps well into the summer for an early potato. They were planted last year as late as July 10th, and made as large a crop as Early Rose planted early in May. The yield this year was 335 bushels per acre by measure." From W. S. L., in *Country Gentleman*.

"Another season's trial with this splendid early potato more than confirms my previous good opinion of its excellent merits; there is not a dissenting voice; they all say that it is the best early potato they ever grew."

J. L. PERKINS, *Little Sioux, Iowa.*

"The quality and size of your Early Ohios were excellent. Planted side by side with Early Rose I think I can safely say that they are about a week earlier."

J. R. NICHOLS, *Haverhill, Mass.*

"The Early Ohio is the best early I have, at present, far ahead of Early Rose as a table potato, yielding with me from 1-4 to 1-3 more and there was not so many small ones."

GEORGE WILLIAMS.

Minnesota Junction, Wisconsin.

QUEEN OF THE VALLEY.

Mr. Henderson describes this new seedling as "a really fine sort and possessed of many good qualities. It makes a large tuber, is enormously productive, and of fine quality, cooking mealy without falling to pieces." The results of a trial in my experimental grounds this season was somewhat of a disappointment, but the season was a terribly dry one and I will look for better results another year.

BELLE.

This is a potato above average size; broad and somewhat flat in shape, red skin, has few eyes, and is of good quality. It is characterized by about the entire crop growing to market-size, having fewer small potatoes than most any other variety. A first-class cropper.

DUNMORE.

A white-skinned and white-fleshed late variety which originated in Vermont, tested in my experimental plot side by side with over forty varieties, in every requisite of a first-class potato ranks but second to the Burbank. I would recommend all potato fanciers to try the Dunmore. As the same potato varies on different soils, probably on some soils the Dunmore will give greater satisfaction than the Burbank Seedling. It has proved a great favorite in the South. It is enormously productive and the tubers grow very large.

"From the peck of Dunmore (the best potato I ever saw in my life), I got the enormous yield of 27 bushels. I think they would weigh out over 27 bushels, and a nicer potato for table use I never saw. I would not sell my interest in them and do without them for all the other kinds raised. All wanted to know where I got the seed and I told them from my old stand, of Mr. Gregory. Some hills had 20 nice big potatoes all large enough to eat, from one eye on a piece, and one piece in a hill."

DANIEL M. CLUTE, *Fort Dodge, Webster Co., Iowa.*

"I grew 15 varieties of potatoes this year, but the Dunmore by far excelled them all in yield." Yours respectfully,

Mellersport, *Fairfield Co., Ohio.*

MATT MILLER.

"The Dunmore potatoes excelled anything I ever saw in the shape of potatoes; we raised some that weighed 2 1-2 pounds, each."

Tuftsboro, *N. H.*

THOMAS F. PIPER.

CLARK'S No. 1 POTATO.

This seedling originated in New Hampshire. It is earlier than the Early Rose and will yield from a quarter to a third more crop. It bears a close resemblance to Early Rose in appearance. It cooks mealy, is of excellent flavor, and is every way a capital variety for either the farmer or market-gardener. Raised on a large scale on my grounds, I found in every instance that it surpassed the Beauty of Hebron in yield—which is saying much in favor of any sort. This potato was held in such high estimation that the entire crops of 1877 and 1878 were purchased by the Government for distribution in the South and West. 450 bushels have been raised on an acre, and 22 bushels from one peck of seed.

"Last spring I got some Clark's No. 1 of you; they proved to be earlier than Early Rose and a better cropper."
Marysville, Ohio. D. S. CLEMENT.

PRIDE OF AMERICA.

This seedling of Mr. Rose is one of the handsomest of potatoes, having just about perfect symmetry in its proportions, a fair, white skin, with eyes but slightly prominent. It is a first-class cropper, and strikes me very favorably. Would advise my customers to try it.

CHICAGO MARKET.

This closely resembles Early Rose, but has the vigor of a new variety. My foreman thinks that for the past two years this potato was as heavy a cropper as any variety raised. The quality is excellent.

LATE BEAUTY OF HEBRON.

This is a new seedling from New York State, which closely resembles the early variety of same name, but excels it as a cropper. Where a medium late variety is desirable I know of no new kind more promising than this. The experience of last season demonstrated to some of us that it is not always wise to depend wholly on either a late or an early variety, as blight may catch either one at its tender period of growth.

MAMMOTH PEARL.

This new Ohio seedling was selected as the best from over 2,500 seedlings. It is of excellent quality for table use, large size, very handsome in appearance, and has thus far proved to be comparatively free from rot. Skin white and flesh very white; eyes few and even with the surface; in shape generally roundish; vines short and thick. In productiveness it is excelled by no potato I have ever raised.

AMERICAN MAGNUM BONUM.

I find this new seedling very large and handsome, and a great cropper. The potatoes are shaped much like the Peerless, and like them are white in flesh and color. Under favorable circumstances they will yield from 300 to 400 bushels per acre.

LATE OHIO.

This variety was originated by Mr. Reece, the same gentleman who originated Early Ohio. It has the same excellent characteristics as that choice variety, with the addition of a characteristic vigor—the comparative difference being just about that which is found between Early Rose and Late Rose. No variety I raise gives me better satisfaction for quality than this. I make it my winter potato for table use.

BEAUTY OF HEBRON.

This potato is a native of Washington County, New York. It closely resembles Early Rose in shape, but is of a lighter red in color, on medium low land. Very prolific, being equalled in this respect by but few, either of the early or late varieties. Quality excellent. Earlier than Early Rose, it will outyield that standard variety by from a quarter to a third, if it does as well with my customers as it has on my soil. Those who think of planting Early Rose will make more by giving their seed away and paying double what is charged for either this or Clark's No. 1.

These are a German Oat, well adapted to this climate, and so far have not shown that inclination to deteriorate or "run out" that is usually exhibited by other heavy varieties. It is somewhat taller than the common kind, of strong, rank growth, the leaves being very long and wide and of an unusually dark green color. The straw is *coarse and strong and not liable to lodge*. This is also a bush Oat, the grain being distributed on all sides of the heads, which are large and well-filled. The kernels are large and plump, and enveloped in a *soft, thin white husk*. It ripens two or three days later and yields much better than the common variety. The yield has varied from 56 bushels to 98 bushels per acre; the average for six years being a little over 74 bushels. They sometimes weigh 39 lbs. to the measured bushel. Price per pound, post-paid, 40 cts.; 3 lbs., \$1.00; peck, by express or freight, 50 cts.; half bushel, 75 cts.; bushel, \$1.25; 10 bushels, \$1.10 per bushel. No discount on ten-bushel lots.

GOLDEN GRAIN, or Palestine Mammoth Wheat.

The grains are really enormous, being three times as large as those of our common wheats, and therefore worthy of being put upon the market as a curiosity were it nothing more; but the grains are not only mammoth in size, but the wheat crops wonderfully, having yielded thirty-two bushels on half an acre of land. The first grain in this country, is said to have been brought from Palestine. It is a very hardy and most productive variety, with long, stiff straw, standing well, stools heavily, growing from twenty-five to seventy stalks from a single grain; the ears are of good length, closely filled with full, plump grains with but little chaff. Price per package, containing about five hundred grains, 25 cents. Messrs. Haines inform me that in the West and South it has proved a spring wheat, while in Pennsylvania it is a winter wheat.

WHITE RUSSIAN OATS.

This new variety of oats has leaped into popularity at a bound. Reports from New England and the Northern and Western States are emphatic in its praise. Mr. Charles Doie of Northern, Vt., writes me: "I am well satisfied with results thus far. I must have had at the rate of 100 bushels per acre from the best of my ground. Two of my neighbors who tried them say that at the price paid of \$2.25 per bushel, the increased yield over common oats much more than paid the extra cost of the seed. I saw as many as 22 stalks growing from one stool; the product from one seed was not less than 1,500. I had stalks with heads 18 inches long and having 160 grains." They are extremely hardy and thus far have proved rust proof. The straw is large and stiff and the chaff light. Mr. Alfred Rose raised from one ounce of seed, 157 pounds, and estimates that they will yield one-third more per acre than the common varieties. Mr. Dodson writes Messrs. Ferry & Co. that he raised four hundred bushels on four acres. Mr. S. R. McMahan raised one hundred and twenty-five bushels from two bushels. Mr. Myron Farrels finds them to be twice as prolific as ordinary oats. Mr. Augustus Moquin states that the Russian Oats stood five feet high and some heads contained 200 kernels. Price per lb., post-paid, 50 cents; 3 lbs., \$1.00; peck, by express or freight, 50 cts.; half bushel, 75 cts.; one bushel, \$1.30; ten bushels, per bushel, \$1.25. No discount on ten-bushel lots.

WHITE ZEALAND OATS.

I present my customers with an engraving of new oats, made from a photograph of a couple of average heads grown on my experimental grounds. In going over the field, note-book in hand, I found that

while every variety of oats had rusted badly (they were all planted rather late), and had, for the most, fallen down, there was one kind standing up very conspicuously with scarcely the sign of any rust. The straw of it was extraordinarily tall and stout, and the leaves remarkably broad. The heads were 15 inches in length and well filled. On turning to my note-book I found this new sort was the White Zealand Oats. Taken altogether, its merits were so striking, that I believe it well worthy of an introduction among my patrons. Price per lb., post-paid, 40 cts.; 3 lbs., \$1.00; per peck, by express or freight, 60 cts.; half bushels, \$1.00; bushel, \$1.50; 10 bushels, \$1.40 per bushel. No discount on ten-bushel lots

GEM OF THE GARDEN.

This hand cultivator has given great satisfaction among market gardeners. My old customer, W. H. Holmes, of Davenport, Iowa, writes to a dealer as follows: "For about twenty years I have used, as they were introduced, five or more of the improved hand cultivators, not one of which failed to pay well; but I have found none which, for thoroughness of work, adaptation to many crops and ease of handling and shifting to any desired width or depth, equals the 'Gem' you sold me the past spring. For onion or strawberry culture it leaves little to be desired."

A dozen other practical farmers testify to the same purpose. Price per Express or Freight at purchaser's expense, \$5.00.

MEEKER DISC SMOOTHING HARROW.

The engraving explains itself. I will only add that the discs on each set of rollers work between each other, grinding all lumps fine and pressing small stones below the surface. Onion ground and market gardens need no hand raking when this harrow is used. I used one on my own onion ground this season and the work was very satisfactory. Mr. Peter Henderson says it saves him \$500 a year; that it does the work on his clayey soil not only better than a rake but at one fiftieth part of the cost. Several other widely known cultivators testify to the same effect.

Price on board cars at Bridgeport, Conn., \$25.00.

AGRICULTURAL TREATISES.

Single copies of either of the four following treatises sent by mail for 30 cents; or the four for one dollar. Seed dealers and book-sellers supplied at the usual discount.

ONION RAISING, WHAT KINDS TO RAISE, AND THE WAY TO RAISE THEM. BY J. J. H. GREGORY, Marblehead, Mass.

This work, which I issued in 1865, has been warmly recommended by some of the best authorities in the country, and has gone through fifteen editions. It treats on Onions raised from seed, Potato Onions, Onion Sets, Top Onions, Shallots, and Rarieripes, the Onion Maggot, Rust, the merits of the different varieties of Onions, instructions in seed raising, and how to tell good seed,—beginning with the selecting the ground, and carrying the reader along, step by step, through the preparing of the soil, manuring, ploughing, planting, hoeing, weeding, gathering the crop, storing and marketing it, with a hundred minute details embracing every department of the subject. Illustrated with thirteen engravings of Onions, Sowing Machines and Weeding Machines.

SQUASHES AND HOW TO GROW THEM. BY J. J. H. GREGORY, Marblehead, Mass.

This treatise is of about the same size and style as my treatise on "Onion Raising," and contains several illustrations, including a section of my squash house, with full directions for erecting one. In plan and thoroughness it is similar to my Onion treatise, *very minute and thorough*. Beginning with the selection of soil, it treats of the best way of preparing it; the best manures and the way to apply them; planting the seed, protecting the vines from bugs and maggots, the cultivation, gathering, storing and marketing of the crops—giving hundreds of minute details so valuable to inexperienced cultivators. I have written this and my other treatises on the theory that what the public want is *minuteness and thoroughness of detail*.

CABBAGES, AND HOW TO RAISE THEM. BY J. J. H. GREGORY, Marblehead, Mass.

This treatise gives all the minute instructions so valuable to the beginner. It begins with the selecting the ground, and carries the reader along, step by step, through the preparing of the soil, manuring, ploughing, planting, hoeing, weeding, gathering the crop, storing and marketing it, with a hundred minute details embracing every department of the subject.

To prepare myself the more thoroughly to write on this work, I experimented on foreign and native varieties of cabbage for four years, raising not far from seventy kinds. The gist of my experience will be found in this treatise. It is illustrated by several fine engravings. I have added a paragraph on the green worm that is causing so much trouble in some localities.

CARROTS, MANGOLD WURTZELS AND SUGAR BEETS; WHAT KINDS TO RAISE; HOW TO GROW THEM AND HOW TO FEED THEM. BY J. J. H. GREGORY, Marblehead, Mass.

The increased attention given to the raising of roots for feeding to stock, particularly the Carrot and Mangold Wurtzel, has led me to write this treatise. I have endeavored to follow the manner presented in my other works, and give that minuteness of detail in every step of progress, from the seed to the matured crop, that is generally desired by the public. While this work is more particularly intended for persons of limited experience, yet it gathers up so much of experience and observation, covering so much ground in the growing and handling of these two standard crops, that I should be disappointed if about every grower did not find within its covers some facts of more value to him than the cost of the book.

BOOKS FOR FARMERS AND OTHERS.

In response to inquiries made for books treating on various subjects of interest to the farmer, I offer the following list of works, any of which will be sent, post-paid, to any address in the United States or Territories, on receipt of the price:

Allen's (R. L. & L. F.) New American Farm Book.....	\$2 50	Hop Culture	30
Allen's (R. L.) Diseases of Domestic Animals.....	1 00	Horse Training Made Easy. (Jennings.).....	1 25
American Bird Fancier	50	How to Make Candy	50
Amateur Trap Makers' and Trappers' Guide, Paper, 50 cts.; Cloth ..	75	Hunter and Trapper.....	75
American Rose Culturist.....	30	Jennings on Cattle.....	1 75
Bailey's New Book of Ensilage	1 50	Jennings on Sheep, Swine and Poultry.....	1 75
Barns and Out Buildings; 257 illustrations.....	1 00	Keeping One Cow.....	1 00
Barry's Fruit Garden.....	2 50	Miles on the Horse's Foot.....	75
Bement's Rabbit Fancier.....	30	Norris's Fish Culture	1 75
Bommer's Method of Making Manures	25	Our Farm of Four Acres.....	60
Broom Corn and Brooms.....	75	Pardee on Strawberry Culture	75
Brown's Taxidermists' Manual.....	1 00	Peach Culture. (Fulton.).....	1 50
Burnham's New Poultry Book	2 00	Pedder's Land Measurer	60
Canary Birds.....	75	Practical Floriculture, by P. Henderson.....	1 50
Charlton's Grape Grower's Guide.....	75	Quinn's Pear Culture for Profit.....	1 00
Cole's (S. W.) American Fruit Book.....	75	Quinn's Money in the Garden.....	1 50
Cranberry Culture, by Joseph J. White	1 25	Quincy's Mysteries of Bee Keeping	1 50
Dadd's (George H.) Modern Horse Doctor.....	1 50	Quincy (Hon. Josiah) on Soiling Cattle.....	1 25
Dadd's American Cattle Doctor.....	1 50	Randall's Sheep Husbandry	1 50
Ensilage, by H. R. Stevens.....	60	Richardson on the Dog.....	60
Flax Culture.....	30	Roe's Play and Profit in My Garden.....	1 50
Fuller's Forest Tree Culturist.....	1 00	Saunders' Domestic Poultry.....	75
Fuller's Grape Culturist.....	1 50	Stoddard's American Egg Farm	75
Fuller's Small Fruit Culturist, new edition, enlarged	1 50	Sweet Potato Culture	40
Fuller's Strawberry Culturist	20	The Horse, How to Buy and Sell.....	1 00
Geylin's Poultry Breeding.....	1 25	Tobacco Culture.....	25
Gregory on Carrots and Mangolds	30	Twenty-five-Cent Dinners for Families of Six.....	25
Gregory on Squashes	30	Waring's Draining for Profit and Health.....	1 50
Gregory on Cabbages	30	Warder's Hedges and Evergreens.....	1 50
Gregory on Onions	30	Wheat Culture.....	50
Guenon on Milch Cows	1 00	White's Gardening for the South.....	2 00
Harris on the Pig. By Joseph Harris.....	1 50	Youatt and Spooner on the Horse.....	1 50
Harris's Talks on Manures. (New).....	1 50	Youatt and Martin on Cattle.....	1 50
Henderson's Hand Book of Plants.....	3 00	Youatt on Sheep.....	1 00
Henderson's Gardening for Profit.....	1 50	Ville's Chemical Manures.....	50
